**POLICE HEALTH PLAN
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 JUNE 2015**

REPORTING ENTITY

Police Health Plan Limited (the "Company") is a company incorporated and domiciled in New Zealand, registered under the Companies Act 1993.

The Company provides health insurance to members of the New Zealand Police and their families.

The financial statements are those of the Company for the year ended 30 June 2015. The financial statements were authorised for issue by the directors on 8 September 2015.

The registered office is level 11 Willbank House, 67 Willis Street, Wellington.

The Company is a public benefit entity as its primary objective is to provide health insurance to members of the New Zealand Police. The company is a subsidiary of Police Welfare Fund Limited and is part of New Zealand Police Association Group. Its equity has been provided in order to serve this primary objective rather than for a financial return to equity holders. The Company is an FMC Reporting Entity for the purposes of the Financial Markets Conduct Act 2013. The financial report is a general purpose financial report which has been prepared in accordance with the Financial Reporting Act 2013. The Company is required to be fully licensed under section 19 of the Insurance (Prudential Supervision) Act 2010, on the 7th of May 2013 the Company was licensed by the Reserve Bank of New Zealand

BASIS OF PREPARATION

The financial statements have been prepared in accordance with Generally Accepted Accounting Practice in New Zealand (NZ GAAP). They comply with the New Zealand Equivalents to International Financial Reporting Standards (NZ IFRS) and other applicable financial reporting standards, as appropriate for public benefit entities.

BASIS OF MEASUREMENT

The financial statements are presented in New Zealand Dollars. The financial statements are prepared on both historical cost and fair value basis, as disclosed in the accounting policies below.

FUNCTIONAL AND PRESENTATION CURRENCY

These financial statements are presented in New Zealand dollars (\$), which is the Company's functional and presentation currency. All financial information presented in New Zealand dollars has been rounded to the nearest dollar, unless otherwise stated.

USE OF ESTIMATES AND JUDGEMENTS

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised.

Information about significant areas of estimation, uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are described in the following notes:

- Note 6: Insurance contract liabilities
- Note 7: Actuarial information

The accounting policies set out below have been applied consistently by the Company to all periods presented in these financial statements.

NOTE 1. STATEMENT OF ACCOUNTING POLICIES

(i) REVENUE RECOGNITION

Premiums

Health Plan premiums are recognised from the attachment date being the date on which the insurer accept the risk of the insured. Premiums are paid in advance and accordingly at reporting date, the advance portion is recorded in the Balance Sheet as an Unearned Premiums' liability.

Investment Income

Refer to the Financial Instruments accounting policy

(ii) PROPERTY, PLANT & EQUIPMENT

Property, Plant & Equipment are recognised at cost less accumulated depreciation and accumulated impairment losses. Cost includes expenditure that are directly attributable to the acquisition of the asset. Subsequent costs are added to the carrying amount of an item of Property, Plant & Equipment when that cost is incurred if it is probable that the future economic benefits will flow to the Company and the cost can be reliably measured.

Depreciation is calculated using the straight line method to allocate the assets cost or revalued amounts, net of any residual amounts, over their useful lives. The assets' useful lives, residual values and depreciation methods are reviewed and adjusted if appropriate at each reporting date. An asset's carrying amount is written down immediately to its

**POLICE HEALTH PLAN
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 JUNE 2015**

(ii) PROPERTY, PLANT & EQUIPMENT (CONT)

recoverable amount if it is considered that the carrying amount is greater than its recoverable amount. Depreciation rates are consistent with the previous period

Category	Useful Economic Life	Valuation Method
Furniture and Fittings	5-10 Years	Cost
Computer Hardware	2-3 Years	Cost

(iii) EXTERNALLY ACQUIRED INTANGIBLES

Externally acquired intangible assets are initially recognised at cost and subsequently amortised on a straight-line basis over their useful economic lives. The significant intangibles recognised by the Group, their useful economic lives and the methods used to determine the cost of intangibles acquired in a business combination are as follows:

Intangible Asset	Useful Economic Life	Valuation Method
Blueline 360 CRM System	10 Years	Cost
Other Computer Software	2-4 Years	Cost

(iv) INCOME TAX

The Company is a Sickness, Accident & Death Benefit Fund and is exempt from income tax under section CZ18 of the Income Tax Act 2007.

(v) FINANCIAL INSTRUMENTS

Financial Assets

The Group classifies its financial assets in the following categories: loans and receivables, held to maturity, and available for sale. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition.

(a) Loans & Receivables

These are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They The Group's loans and receivables comprise trade and other receivables and cash and cash equivalents in the consolidated Cash and cash equivalents includes cash in hand, deposits held at call with banks, other short term highly liquid investments

(b) Held to Maturity

The Group have government bonds which are to be held until maturity. Held to maturity investments are recognised at amortised cost using the effective interest rate method. Premiums and discounts that are an integral part of the effective yield of the investment are recognised as an adjustment to the effective interest rate of the instrument

(c) Available for Sale

Financial assets classified as available for sale comprise of financial assets that are either not classified in any other category or designated on initial recognition as available for sale. A financial asset is classified in this category if acquired principally for the purpose of investment.

Assets classified as available for sale measured at initial recognition at fair value plus directly attributable transaction costs. Subsequently they are measured at fair value through other comprehensive income.

(d) Premium and Other Receivables

Premium and other receivables are stated at amortised cost less any impairment losses. Impairment losses for uncollectable premiums are written off against premium revenue in the year in which they are incurred. Under the NZ IFRS definition of financial assets, premium and other receivables are classified as "loans and receivables".

(e) Impairment

Financial assets, are assessed for indicators of impairment at each reporting date. Financial assets are impaired when there is objective evidence that the estimated future cash flows of the asset have been impacted as a result of one or more events that occurred after the initial recognition of the financial asset.

For financial assets carried at amortised cost, the amount of the impairment is the difference between the assets' carrying amount and the present value of the estimated future cash flows, discounted at the original effective interest rate.

For all financial assets, other than trade receivables, the carrying amount is reduced by the impairment loss directly.

For trade receivables the carrying amount is reduced via an allowance account, against which an uncollectible trade receivable is written off. A trade receivable is deemed to be uncollectible upon notification of insolvency of the debtor or upon receipt of similar evidence that the Group will be unable to collect the amount. Changes in the carrying amount of the allowance account are recognised in the Profit and Loss. A previously recognised impairment loss is reversed when, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment loss was initially recognised. In respect of financial assets carried at amortised cost, with the exception of trade receivables, the impairment loss is reversed through the profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised. Subsequent recoveries of trade receivables previously written off are credited against the allowance account.

**POLICE HEALTH PLAN
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 JUNE 2015**

Financial Liabilities

Trade payables and other short-term monetary liabilities, which are initially recognised at fair value plus directly attributable transaction costs and subsequently carried at amortised cost using the effective interest method.

(vi) EMPLOYEE BENEFITS

Defined contribution pension plans

Obligations for contributions to defined contribution pension plans are recognised as an expense in profit and loss as incurred.

Short Term Employee Benefits Liability

Short-term employee benefit liabilities are recognised when the Company has a legal or constructive obligation to remunerate employees for services provided with 12 months of reporting date, and is measured on an undiscounted basis and expensed in the period in which employment services are provided.

Long service and Retirement leave

The Company's net obligation in respect of long service and retirement leave is the amount of future benefit that employees have earned in return for their service in the current and prior periods. The long service leave obligation is made up of actual untaken service leave at balance date plus 60% of future entitlements for staff who will become entitled to long service leave within the next 12 months.

Sick leave

Sick leave is expensed as incurred unless accumulated sick leave likely to be taken exceeds current entitlements. To the extent that sick leave likely to be taken exceeds current entitlements a liability is recognised.

(vii) GOODS & SERVICES TAX (GST)

The Statement of Comprehensive Income has been prepared so that all components are stated exclusive of GST. All items in the Balance Sheet are stated net of GST, with the exception of receivables and payables which include GST invoiced.

(viii) IMPAIRMENT OF NON-FINANCIAL ASSETS

Impairment tests on non-financial assets with indefinite useful economic lives are undertaken annually at the financial year end. Other non-financial assets are subject to impairment tests whenever events or changes in circumstances indicate that their carrying amount may not be recoverable. Where the carrying value of an asset exceeds its recoverable amount (i.e. the higher of value in use and fair value less costs to sell), the asset is written down accordingly. Where it is not possible to estimate the recoverable amount of an individual asset, the impairment test is carried out on the smallest group of assets to which it belongs for which there are separately identifiable cash flows; its cash generating units ("CGUs"). Impairment charges are included in profit or loss, except to the extent they reverse gains previously recognised in other comprehensive income.

(ix) INSURANCE CONTRACTS

Insurance contracts are defined as those containing significant insurance risk at the inception of the contract. Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its lifetime, even if the insurance risk reduces significantly during the period.

The Company has determined that all health insurance policies provided to members are insurance contracts.

(x) NET CLAIMS EXPENSE

The net claims expense represents payments made net of acc recoveries on claims and the movements in the outstanding claims and unexpired risk provisions (as described below).

(xi) PROVISION FOR CLAIMS

The liability for outstanding claims comprises claims incurred but not settled at the reporting date, whether reported or not. A central estimate is made of claims reported but not paid, claims incurred but not reported and claims incurred but not adequately reported. The claims provision includes expected claim payments plus associated claims handling costs. In addition a risk margin is added to reflect the inherent uncertainty in the estimates of claims.

(xii) ACQUISITION COSTS

Acquisition costs are those incurred in acquiring and recording insurance contracts that will give rise to future benefits from premiums. The Company's acquisition costs do not directly relate to future premium revenue and so are immediately expensed.

(xiii) UNEXPIRED RISK PROVISION & LIABILITY ADEQUACY TEST

A liability adequacy test is performed to assess whether there is any deficiency in the unearned premium liability arising from expected claims and administration costs during the period covered by the unearned premium. The test is performed on all the policies as a whole as risks are broadly similar and are managed together as a single portfolio. The central estimate of claims and administration expenses is calculated. In addition, a risk margin is added to reflect the inherent uncertainty in estimating the claims. The total is compared with the unearned premium liability. Any deficiency is recognised as an expense in determining the profit or loss after first writing down any deferred acquisition costs. The deficiency in excess of deferred acquisition costs is recognised in the Balance Sheet as an unexpired risk provision.

(xiv) ADOPTION OF NEW ACCOUNTING STANDARDS

There have been no new accounting standards adopted that have materially affected the financial statements.

(xv) CHANGES IN ACCOUNTING POLICY

There have been no changes in accounting policy that materially effect the financial statements. All accounting policies have been applied on a consistent basis with the prior year.

(xvi) FINANCIAL REPORTING STANDARDS APPROVED BUT NOT YET EFFECTIVE

The External Reporting Board (XRB) is responsible for setting accounting and auditing standards for entities required by law to prepare general purpose financial reports (GPFRs). The XRB will require that New Zealand move from a single set of sector neutral accounting standards to a multi sector and standards approach.

Under the new framework Public Benefit Entities (PBEs) will be required to apply different accounting standards than those applied by for-profit entities when preparing GPFRs.

It is not expected that the above framework will have significant impact on the accounting policies or the recognition and measurement of assets, liabilities, equity, income and expenses of the Company.

The following new or amended standards and interpretations, which are applicable to the Company, are not yet effective for the year ended 30 June 2015, and have not been applied in preparing these financial statements:

NZ IFRS 9 - Financial Instruments (effective 1 January 2018).

The XRB aims to replace NZ IAS 39 Financial Instruments; Recognition and Measurement in its entirety.

New Standard NZ IFRS 9 has been issued and will be effective 1st January 2018. To date, the chapters dealing with recognition, classification, measurement and de-recognition of financial assets and liabilities have been issued.

NZ IFRS 9 will not have an impact on the Company because it will be adopting the new PBE Standards standards for the financial periods beginning 1 July 2015, and the financial instruments standard under the new PBE standards is currently based on IAS 39.

Note 6b Reconciliation of movement in provision for claims

	2015	2014
Opening balance	6,388,000	4,795,000
Amounts utilised during the year	(5,666,125)	(4,726,828)
Movement in ACC Recoveries	(130,000)	(89,000)
Movement In Risk margin	(139,000)	145,000
Movement in Claims Handling Costs	(36,000)	45,000
Amounts provided during the year	4,458,125	6,218,828
Closing balance	<u>4,875,000</u>	<u>6,388,000</u>

Note 6c Reconciliation of movement in unearned premiums liability

	2015	2014
Opening balance	159,000	247,000
Premiums written during year	(30,518,088)	(29,796,291)
Premiums earned during year	31,474,088	29,708,291
Closing balance	<u>1,115,000</u>	<u>159,000</u>

Note 6d Provision for unexpired risk

A liability adequacy test is performed to assess whether there is any deficiency in the unearned premium liability arising from expected claims and administration costs during the period covered by the unearned premium. The test is performed on all the policies as a whole as risks are broadly similar and are managed together as a single portfolio. The central estimate of claims and administration expenses is calculated. In addition, a risk margin is added to reflect the inherent uncertainty in estimating the claims. The total is compared with the unearned premium liability. Any deficiency is recognised as an expense in determining the surplus or deficit before tax in the statements of comprehensive income. The deficiency is recognised in the statements of financial position as an unexpired risk provision.

	2015	2014
Expected future cashflows for claims and expenses	1,049,000	150,000
Risk Margin	183,000	26,000
Less Unearned Premiums	-1,115,000	-159,000
Closing Balance	<u>117,000</u>	<u>17,000</u>

Reconciliation of movement in provision for unexpired risk

	2015	2014
Opening Balance	17,000	24,000
Reversal of Opening Balance	-17,000	-24,000
Net liability for unexpired risk recognised during the year	-66,000	-9,000
Risk Margin	183,000	26,000
Closing Balance	<u>117,000</u>	<u>17,000</u>

NOTE 7. ACTUARIAL INFORMATION

The estimate of outstanding claims and unexpired risk as at 30 June 2015 has been determined by Charles Cahn FIAA, a Fellow of the New Zealand Society of Actuaries and was presented to the directors of the Company in a report dated 7 August 2015. There were no qualifications to the report. The calculation of the provision for outstanding claims complies with both NZ IFRS 4: Insurance Contracts, and the Professional Standard 30 – Valuation of General Insurance Claims, of the New Zealand Society of Actuaries. The actuary is satisfied as to the nature, sufficiency and accuracy of the data used to determine the provision.

Outstanding claims liability

Outstanding claims liabilities are measured as the central estimate of the present value of expected future payments for claims incurred but not settled at 30 June 2015, whether reported or not, together with related claims handling costs and an additional risk margin to allow for the inherent uncertainty in the central claims estimate. The central estimate of the outstanding claims has been calculated using historical experience to determine the pattern of claims development.

The central estimate used the Adjusted Chain Ladder method with a the Past Actual Outstanding Claims Liabilities method used for a reasonableness check.

Estimation of outstanding claims liabilities includes an allowance for claims incurred but not reported, claims incurred but

**POLICE HEALTH PLAN
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 JUNE 2015**

not adequately reported, unpaid reported claims and future claims handling costs associated with paying claims. An explicit allowance has been made for expected ACC recoveries.

A risk margin has been added to reflect the inherent uncertainty in the central estimate. A risk margin of 10% of the central estimate was established at 30 June 2015 (30 June 2014: 10%). The risk margin was deemed appropriate by the actuary based on Australian Experience adjusted for New Zealand's slower run off patterns.

Key assumptions:

1. Future patterns of claims development will be similar to historical patterns.
2. ACC recoveries have been assumed to be 54% on claims outstanding. This includes an adjustment for success (96%), recovery (75%) and a management fee of 25%
3. A risk margin of 10% as described above
4. Claims handling costs include internal and external costs incurred in connection with the negotiation and settlement of claims. costs include all direct expenses of the claims department and any part of the general administrative costs directly attributable to the claims function. Claims handling costs were determined to be approximately 3% (30 June 2014: 3%) of the underlying claims amounts based on an analysis of administration expenses.

As at 30 June 2015, the expected settlement date for claims included in the liability for outstanding claims is no more than 2 to 3 months for most claims (30 June 2014: no more than 2 to 3 months). Accordingly, expected future payments are not discounted due to the short term nature of the liabilities.

Unexpired risk provision and liability adequacy test

A liability adequacy test was performed to determine whether the unearned premium liability is adequate to cover the present value of the expected future cash flows arising from rights and obligations under current insurance contracts, plus an additional risk margin to reflect the inherent uncertainty in the central estimate. The future cash flows are future claims, associated claims handling costs and other administration costs relating to the business.

If the present value of the expected future cash flows plus the additional risk margin to reflect the inherent uncertainty in the central estimate exceeds the unearned premium liability less related intangible assets and related deferred acquisition costs then the unearned premium liability is deemed to be deficient.

The unexpired risk liability has been calculated as the projected premium deficiency for current in-force business until the next policy billing date on or after 14 July 2015.

The calculation of the risk margin has been based on an analysis of the volatility of historical claims experience within the time period covered by the unearned premiums. A risk margin of 17.5% of the present value of expected future cash flows has been applied at 30 June 2015 (30 June 2014: 17.5%). The risk margin was determined with the objective of achieving at least 75% probability of sufficiency of the unexpired risk liability.

Key assumptions:

1. Future patterns of claims development will be similar to historical patterns depending on the type of policy, type of claim and development month.
2. Monthly seasonality factors used for claims incurred. These were calculated from the 5 years' claims experience.
4. Claims handling costs include internal and external costs incurred in connection with the negotiation and settlement of claims. costs include all direct expenses of the claims department and any part of the general administrative costs directly attributable to the claims function. Claims handling costs were determined to be approximately 3% (30 June 2014: 3%) of the underlying claims amounts based on an analysis of administration expenses.

No explicit allowance has been made for cancellations or transfers. These are allowed for implicitly in the inflation assumption. Expected future payments are not discounted due to the short term nature of the liabilities.

NOTE 8. TOTAL EQUITY

	2015	2014
Share Capital		
Ordinary Shares @\$1 Fully Paid	1,000	1,000

NOTE 10. RISK MANAGEMENT

The Company is exposed to a number of risks in the normal course of business. Primarily there are the risks associated with underwriting an insurance business (insurance risk). Other risks include financial risks (credit risk and liquidity risk), market risks (interest rate risk), and non-financial risks (operational risk and compliance risk). The Directors and management recognise the importance of having an effective risk management policy in place. The risks and any objectives, policies and procedures to manage these insurance and financial risks are described below:

a. Insurance risks

The Company assumes insurance risks through its health insurance activities. The key risk arises in respect of claims costs and, in particular, those costs varying from what was assumed in the setting of premium rates.

(i) Risk Management Objectives, Policies and Processes for Mitigating Risk

The primary objective in managing risk is, as far as possible, to reduce the magnitude and volatility of claims costs. A secondary objective is to ensure funds are available to pay claims and maintain the solvency of the Company if there is adverse deviation in experience. Key policies and methods for mitigating risk include:

- Underwriting policies and processes which evaluate new risks and offer terms that do not endanger the portfolio.
- Claims management procedures to ensure the payment of claims is in accordance with policy conditions.
- Pricing strategy adopted by the Board which supports pricing based on underlying risk.
- Regular monitoring of financial and operating results.
- Maintaining a target solvency margin in excess of the minimum required by the draft Reserve Bank of New Zealand Solvency Standard for Non-life Insurance Business. The solvency margin ensures the Company is able to withstand a period of adverse insurance or investment experience and still maintain a satisfactory financial position.

(ii) Sensitivity to Insurance Risk

The financial results of the Company are primarily affected by the level of claims incurred relative to that implicit in the premiums. The assumptions used in the valuation of the outstanding claims provision directly affect the level of estimated claims incurred. The key assumptions used are detailed in note 7.

The scope of insurance risk is managed to by the terms and conditions of the policy. The main insurance benefit involves the reimbursement of medical and surgical expenses depending upon the plan option.

The level of benefits specified in the contract is a key determinant of the amount of future claims although the exact level of claims is uncertain.

Other variables affecting the level of claims include the underlying morbidity of the lives insured, the nature of the treatment given and the costs of treatment.

**POLICE HEALTH PLAN
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 JUNE 2015**

(iii) Concentration of Insurance Risk

Management defines concentration of risk by type of insurance business and geographic region. The Company transacts health insurance business in New Zealand and, therefore, the concentration of risk by type of insurance and geographic region cannot be avoided. Insurance risks are well diversified within the health insurance portfolio with claims costs spread across many different types of surgery and medical events. There is no significant exposure to individual large claims.

b. Credit risk

Credit risk is the risk of loss that arises from a counterparty failing to meet their contractual commitment in full and on time, or from losses arising from the change in value of a trading financial instrument as a result in changes in credit risk of that instrument. The Company's exposure to credit risk is limited to deposits and investments held with banks and other financial institutions as well as credit exposure to trade customers or other counterparties. The Company maintains a credit policy which is used to manage the exposure to credit risk. Limits on counter-party exposures have been set and are monitored on an ongoing basis. In addition, the RBNZ has issued concentration risk limits, as part of its solvency standards. The Company has no significant exposure to credit risk. The credit exposure in respect of the Company's cash balance is between A and AA-

i. Credit Concentration Risk

Concentration of credit risk exists when the Company enters into contracts or financial instruments with counterparties that are engaged in similar business activities or exposed to similar economic factors that might affect their ability to meet contractual obligations. The significant concentrations of credit risk are outlined by industry type below.

	2015	2014
New Zealand Government	-	512,140
Banks	31,421,161	24,559,032
Financial Institutions	3,994,731	4,669,692
Other non-investment related receivable	145,388	116,758
Total Financial Assets with Credit Exposure	<u>35,561,280</u>	<u>29,857,622</u>

ii. Maximum Exposure to Credit Risk

The maximum exposure to credit risk at the end of the reporting period is the amount of financial assets stated in the Balance Sheet. These exposures are net of any recognised allowance for impairment losses. The Company does not require any collateral or security to support financial assets due to the quality of the counter-party organisations.

iii. Credit Quality of Financial Assets

The credit quality of investment counter parties is as follows:

	2015	2014
AAA	98,365	-
AA	28,468,883	26,877,077
A	5,818,083	1,642,839
BBB	1,040,561	315,002
BB	-	-
Non-rated	145,388	1,022,704
	<u>35,561,280</u>	<u>29,857,622</u>

c. Liquidity risk

Financing and liquidity risk is the risk that the Group will not be able to meet its cash outflows, as they fall due, because of lack of liquid assets or access to funding on acceptable terms. The Directors set limits on the minimum proportion of maturing funds available to meet such calls to cover claims and expenses at unexpected levels of demand.

i. Undiscounted Contractual maturities of Financial Assets & Liabilities

	Carrying Value	On Demand	Less than one year	One to Two Years	Two to four years

Accrual Shares	905,946	-	905,946	-	-

**POLICE HEALTH PLAN
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 JUNE 2015**

Financial Liabilities

Trade and Other Payables	37,135	37,135
Provision for Claims	6,388,000	6,388,000

d. Market risks

i. Foreign currency risks

At 30 June 2015, the Company had no assets or liabilities denominated in foreign currencies. (30 June 2014:nil). The Company does not enter into foreign currency transactions and so is not exposed to foreign currency risk.

ii. Interest rate risk

The Company invests in both fixed and variable rate financial instruments such as bonds, and bank deposits. There is a risk that any movement in interest rates can have an effect on the profitability and cash flows of the Company. The Company maintains a spread of investment types and maturity profiles to mitigate this risk.

(i) Cash flow interest rate risk

The cash flows from the Company's cash and cash equivalents and short term deposits are susceptible to changes in interest rates. The following analysis shows the impact of a 1.75% movement in interest rates. This sensitivity is consistent with that used in the companies disclosures to the Reserve Bank

	2015	2014
Impact of increase in interest rates by 175 basis points on cash flows	493,500	366,200
Impact of decrease in interest rates by 175 basis points on cash flows	(493,500)	(366,200)

(ii) Fair value risk

The fair value of fixed rate investment bonds can fluctuate depending on changes in interest rates. Unrealised fair value changes are recognised in determining other comprehensive income in the Statements of Comprehensive Income for each period. The following analysis shows the impact of any changes in interest rates on the fair value of fixed rate investments.

	2015	2014
Impact of increase in interest rates by 175 basis points on investments	(55,362)	(21,552)
Impact of decrease in interest rates by 175 basis points on investments	49,542	18,352

(iii) Fair values of financial assets and financial liabilities

Excluding government bonds which are measured amortised cost all financial assets and financial liabilities included in the Balance Sheet are carried at amounts that approximate fair value. The table below analyses financial assets measured at fair value at the end of the reporting period, by the level in the fair value hierarchy into which the fair value measurement is categorised.

Definition of fair value hierarchy

Level 1: Valuation based on quoted market prices (unadjusted) in an active market.

Level 2: Valuation techniques based on observable data, either directly (as prices) or indirectly (derived from prices).

Level 3: Valuation techniques not based on observable market data.

2015	Level 1	Level 2	Level 3	Total
Investment Bonds	3,994,731	-	-	3,994,731
	<u>3,994,731</u>	<u>-</u>	<u>-</u>	<u>3,994,731</u>
2014	Level 1	Level 2	Level 3	Total
Acurity Health Shares	905,946	-	-	905,946
Investment Bonds	3,765,738	-	-	3,765,738
	<u>4,671,684</u>	<u>-</u>	<u>-</u>	<u>4,671,684</u>

The fair value of financial instruments traded in active markets is based on quoted market prices at the balance sheet date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the company is the current bid price. These instruments are included in Level 1.

NOTE 11. AUDIT FEES	2015	2014
Audit Fees	25,000	20,000
Other Fees Paid to Auditors	5,404	2,500

Other fees paid to auditors relate to fees paid for the audit of the Company's solvency return as well as emergency accounting assistance provided in 2015 in respect to completion of 2014 cashflow statements.

NOTE 12. STAFF COSTS	2015	2014
Salaries and Wages	556,671	497,655
Contributions to defined contribution Schemes	21,235	13,401
Other Staff Costs	13,711	15,066
	<u>591,617</u>	<u>526,122</u>

NOTE 13. RELATED PARTIES

Members under the Police Services Group "umbrella" include New Zealand Police Association Inc. and Subsidiaries (PA Frontline Limited and Blueline Premises Limited), Police Welfare Fund Limited and subsidiaries (including Police Welfare Fund Insurances Limited, Police Welfare Fund Mortgages Limited, Police Welfare Fund General Insurances Limited, Police Welfare Fund Nominees Limited, New Zealand Police Centennial Trust) and Police and Families Credit Union. Police Health Plan is a wholly owned subsidiary of Police Welfare Fund Limited

Police Health Plan Limited paid \$48,000 (2014: \$48,000) to Blueline Premises Limited during the year for the rental of part of 57 Willis Street.

During the year the New Zealand Police Association on-charged \$172,800 (2014: \$12,000) associated with Police Health Plan's representation in the Police News Magazine, the member website and social media.

No amounts owed by related parties have been written off or forgiven during the period.

The Company has a related party relationship with its directors and executive officers.

Transactions with Key Management personnel

Remuneration

The Group provides salaries and employee benefits in the form of long service leave and retirement leave as well as contributing to a defined contribution superannuation fund.

Compensation paid to key management personnel comprises:	2015	2014
Short-term employee benefits	126,881	149,798
Post-employment benefits	5,600	8,907
Termination benefits	12,436	17,084

Transactions with Directors

Ralph Stewart (director of Police Health Plan) is also a director/shareholder of Stewart Capital Limited to which \$21,994 was paid during the year for a membership analysis (2014: nil).

NOTE 14. Contingent Liabilities and Capital Commitments

There were no contingent liabilities as at reporting date (2014: nil). There were no capital commitments as at reporting date (2014 - nil).

NOTE 15. Credit Rating

On 5 May 2015 A.M. Best Co. assigned the Company a financial strength rating of 'B++ (Stable)' and an issuer credit rating of 'bbb+'.

NOTE 16. Solvency and Capital Adequacy

The Company is a not-for-profit organisation. As a consequence of its legal structure the Company has no recourse to external capital and therefore internally generated capital is of paramount importance. The Company's capital of \$29.37 million (30 June 2014: \$20.5 million) is equal to the reserves as disclosed in the financial statements.

The Directors' policy for managing capital is to have strong capital base to establish security for members and enable the Company to conduct its business whilst maintaining financial soundness.

The Company calculates its capital adequacy requirements using the Capital Adequacy Standard issued by The Reserve Bank of New Zealand for non life business Insurance under the Insurance (Prudential Supervision) Act 2011.

The Reserve Bank Capital Adequacy Standard has been constructed for the purpose of determining a minimum amount of capital required to support business plans and maintain financial soundness. Police Health Plan Limited are required to maintain the prescribed minimum amount of capital in order to retain their licensed Insurer status.

A calculation at 30 June 2015 showed the Company had assets in excess of the level specified by the Reserve Bank of New Zealand Standard. Accordingly, the Directors consider the current level of capital is sufficient for the requirement of maintaining financial soundness.

INDEPENDENT AUDITOR'S REPORT
To the Shareholders of Police Health Plan Limited

Report on the Financial Statements

We have audited the financial statements of Police Health Plan Limited ("the Company") on pages 4 to 19 which comprise the statement of balance sheet as at 30 June 2015, the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

This report is made solely to the Company's shareholders, as a body, in accordance with section 207B(1) of the Companies Act 1993. Our audit has been undertaken so that we might state to the Company's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's shareholders as a body, for our audit work, for this report, or for the opinion we have formed.

Directors' Responsibility for the Financial Statements

The directors are responsible for the preparation and fair presentation of these financial statements in accordance with New Zealand Equivalents to International Financial Reporting Standards and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing (New Zealand). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of financial statements that give a true and fair view of the matters to which they relate in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Other than in our capacity as auditors, we have no other relationship with or interests in the Company.

Opinion

In our opinion, the financial statements present fairly, in all material respects the financial position of the Company as at 30 June 2015, and its financial performance and its cash flows for the year then ended in accordance with New Zealand Equivalents to International Financial Reporting Standards.

Review of Actuarial Information In, or Used In Preparation of, the Financial Statements at 30 June 2015

This report is to provide certain information and certification as required under Sections 77 and 78 of the Insurance (Prudential Supervision) Act 2010 (the Act). This information is actuarial information in, or used in the preparation of, the financial statements as at 30 June 2015 of the Police Health Plan (the Plan).

I have provided a "Valuation Report" dated 15 August 2015, which contains detailed advice on actuarial information for the financial statements,

The Solvency Standard for Non-life Insurance Business issued under the Act (the Standard) specifies which is actuarial information.

I have reviewed the following actuarial information:

- The Provision for Unexpired Risk (which, together with Unexpired Premiums Received, is referred to in the Standard as Premium Liabilities).
- The Provision for Claims (referred to in the Standard as the Net Outstanding Claims Liability).
- Note 7 to the financial statements containing a description of the method and assumptions used in the calculation of the Provision for Claims and Provision for Unexpired Risk.

The Plan has no reinsurance and no deferred acquisition costs or fee revenue assets.

I can advise as follows:

- There were no limitations or restrictions placed on me in carrying out this work, and I have obtained all the information and explanation that I required.
- My relationship with or interest in the Plan is limited to that of Appointed Actuary.
- It is the Plan's established policy to seek my advice on actuarial information and to adopt my advice in the financial statements.
- The actuarial information provided by me has been prepared in accordance with the New Zealand Equivalent of International Financial Reporting Standard 4, and Professional Standard 30 of the New Zealand Society of Actuaries
- The actuarial information contained in, and used in the preparation of, the financial statements has been appropriately included and used.
- In my opinion, and from an actuarial perspective, the Plan is maintaining, at the balance date, the solvency margin as required under the Act.

Charles Cahn
FIAA FNZSA
Appointed Actuary
