DIRECTORS' REPORT

FOR THE YEAR ENDED 31 MARCH 2009

The directors present the annual report of Dorchester Life Limited for the year ended 31 March 2009.

There are certain matters that the shareholders can determine need not be disclosed in the annual report. The shareholders have unanimously agreed, under section 211(3) of the Companies Act 1993, to take advantage of that concession. The shareholders have agreed to limit the annual report to the following:

- Completed and signed financial statements
- Audit Report

Signed for and on behalf of the Board of Directors.

Director

Date: 29 May 2009

Level 9, Tower Centre 45 Queen Street 1010 PO Box 3899 Auckland 1140 New Zealand DX CP19042

AUDIT REPORT TO THE SHAREHOLDERS OF

DORCHESTER LIFE LTD

We have audited the financial report on pages 4 to 38. The financial report provides information about the past financial performance and financial position of the Company as at 31 March 2009. This information is stated in accordance with the accounting policies set out on pages 9 to 19.

Board of Directors' Responsibilities

The Board of Directors is responsible for the preparation of a financial report which gives a true and fair view of the financial position of the Company as at 31 March 2009 and of the results of operations and cash flows for the year ended on that date.

Auditor's Responsibilities

It is our responsibility to express an independent opinion on the financial report presented by the Board of Directors and report our opinion to you.

Basis of Opinion

An audit includes examining, on a test basis, evidence relevant to the amounts and disclosures in the financial report. It also includes assessing:

- the significant estimates and judgements made by the Board of Directors in the preparation of the financial report, and
- whether the accounting policies are appropriate to the Company's circumstances, consistently applied and adequately disclosed.

We conducted our audit in accordance with New Zealand Auditing Standards. We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial report is free from material misstatements, whether caused by fraud or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial report.

Our firm carries out no other assignments for the Company. The firm has no other interests in the Company.

Fundamental Uncertainty

In forming our unqualified opinion, we have considered the adequacy of the disclosures made in the financial report regarding continued financial support of the parent company, Dorchester Pacific Limited and the successful renewal of the Kiwibank facility. The financial report has been prepared on a going concern basis. Should continued support from Dorchester Pacific Limited not be maintained or the Kiwibank loan is not renewed, the going concern basis may be invalid and adjustments would need to be made by the Company to reflect that assets may need to be realised other than at the amounts they are currently recorded in the balance sheet. The Company may also need to provide for further liabilities that may arise and to reclassify non-current assets and long-term liabilities as current assets and liabilities. Details of the circumstances relating to this fundamental uncertainty are described in Note 1, Note 10 and Note 16.

Unqualified Opinion

We have obtained all the information and explanations we have required.

In our opinion:

- proper accounting records have been kept by the Company as far as appears from our examination of those records; and
- the financial report on pages 4 to 38:
 - complies with generally accepted accounting practice in New Zealand;
 - gives a true and fair view of the financial position of the Company as at 31 March 2009 and the results of its operations and cash flows for the year ended on that date.

Our audit was completed on 29 May 2009 and our unqualified opinion is expressed as at that date.

FOR THE YEAR ENDED 31 MARCH 2009

1. STATEMENT OF ACCOUNTING POLICIES

GENERAL ACCOUNTING POLICIES

Dorchester Life Limited (the "Company") is a profit orientated company incorporated and domiciled in New Zealand and registered under the Companies Act 1993. The Company is an issuer for the purpose of the Financial Reporting Act 1993 and an issuer in terms of the Securities Act 1978.

The Company is 100% owned by Dorchester Pacific Limited, who is the ultimate parent company. The registered address of the Company is Level 8, 34 Shortland Street, Auckland.

The financial statements were approved for issue by the Directors on 29 May 2009.

The Company's financial statements have been prepared in accordance with New Zealand Generally Accepted Accounting Practice ("NZ GAAP"). They comply with New Zealand equivalents to International Financial Reporting Standards ("NZ IFRS") and other applicable Financial Reporting Standards, as appropriate for profit-oriented entities. These financial statements also comply with International Financial Reporting Standards.

The following new Financial Reporting Standards and amendments to standards relevant to the Company are not yet effective for the year ended 31 March 2009, and have not been applied in preparing these financial statements. They will be applied from the period beginning 1 April 2009:

- NZ IFRS 8 Operating Segments will affect the financial and descriptive information disclosed about
 the Company's reportable segments, but will not have any impact on its reported profits or financial
 position.
- Amendments to NZ IFRS 4 *Insurance contracts*, will affect the financial and descriptive information disclosed about the Company's life insurance contracts, but will not have any impact on its reported profits or financial position.
- Amendments to NZ IAS 1 Presentation of financial statements, will not have any impact on its reported profits or financial position.

Change in Accounting Policies

There have been no significant changes in the accounting policies during the year.

Basis of Preparation

The measurement base adopted is that of historical cost as modified by the fair value measurement of Financial Instruments at Fair Value through Profit or Loss.

Reliance is placed on the fact that Dorchester Life Limited is a going concern, the validity of this concept is dependent on the continued financial support from Dorchester Pacific Limited and the successful renewal of the Kiwibank loan.

Presentation Currency and Rounding

The amounts contained in this report and the financial statements are presented in New Zealand dollars, unless otherwise stated.

R

FOR THE YEAR ENDED 31 MARCH 2009

1. STATEMENT OF ACCOUNTING POLICIES (continued)

PARTICULAR ACCOUNTING POLICIES

(a) Foreign Currency Translation

Foreign currency transactions are translated to New Zealand currency at the exchange rate ruling at the date of the transaction.

All foreign currency monetary assets and liabilities are translated at the exchange rates ruling as at balance date. Foreign currency forward positions are valued at fair value as at balance date. Unrealised gains and losses arising from these revaluations are recognised immediately in the Income Statement.

Non-monetary assets denominated in foreign currency, measured at fair value, are translated at the exchange rate ruling at the date the values were determined. Foreign currency exchange differences relating to investments at Fair Value through Profit or Loss are included in gains and losses on investments.

(b) Revenue and Expense Recognition

Revenue is recognised to the extent that it is probable that economic benefits will flow to the Company and that the revenue can be reliably measured. The principal sources of revenue are Premium Income and Investment Income.

Premium Income

Life insurance contracts – premiums received for providing services and bearing risks are recognised as revenue on an accrual basis.

Life investment contracts – premiums received have the fee portion of the premium recognised as revenue on an accrual basis and the deposit portion recognised as an increase in Life Investment Contract Liabilities. Initial entry fee income on investment contracts is recognised as revenue at the outset of the contract only if a specific initial service (for which the fee relates) is provided by the Company at that time. Otherwise initial entry fee income is deferred as a component of the Life Investment Contract Liability and amortised as related management services are provided under the contract.

Investment Income

Financial instruments are classified in the manner described in (g). Some are measured by reference to amortised cost, others by reference to fair value.

For financial instruments measured at amortised cost, the effective interest method is used to measure the Interest Income or Expense recognised in the Income Statement. For financial instruments measured at fair value, Interest Income or Expense is recognised on an accrual basis.

The effective interest method calculates the amortised cost of a financial asset or financial liability and allocates the Interest Income or Interest Expense over the relevant period. The calculation includes all fees paid or received and directly related transaction costs that are an integral part of the effective interest rate. The Interest Income or Expense is allocated over the life of the instrument and is measured for inclusion in the Income Statement by applying the effective interest rate to the instruments amortised cost.

Dividend income and unit trust distributions are recorded in the Income Statement when the Company's right to receive the dividend and distribution is established. Realised and unrealised gains and losses from remeasurement of Financial Instruments at Fair Value through Profit or Loss are included in Investment Income.

Other Revenue

Commission and fee revenue is recognised in the Income Statement on an accrual basis.

FOR THE YEAR ENDED 31 MARCH 2009

1. STATEMENT OF ACCOUNTING POLICIES (continued)

PARTICULAR ACCOUNTING POLICIES (continued)

(c) Expense Recognition

Claims Expenses

Maturity claims are recognised on the policy maturity date. Surrenders are recognised when paid. Death and all other Life insurance contract claims are recognised as an expense when a liability has been established. Claims under life investment contracts represent withdrawals of investment deposits and are recognised as a reduction in Life Investment Contract Liabilities.

Expenses involved in running the company's business are categorised into acquisition, investment management and maintenance costs on the basis of a detailed functional analysis of activities carried out by the company.

Acquisition Costs

Acquisition costs are the fixed and variable costs of acquiring new business including commissions and similar distribution costs, costs of accepting, issuing and initially recording policies. Acquisition costs relate to the costs incurred in acquiring specific life insurance policies during the period. They do not include the general growth and development costs incurred by the company.

Acquisition Costs – Life Insurance Contracts - Acquisition costs represent all costs incurred at the time of writing a life insurance policy. The most significant component of such costs is usually commissions. Under MoS methodology, where product profitability can support the recovery of acquisition costs, these costs are effectively deferred and amortised over the life of the policy. They are reported as negative components of the MoS life insurance contract liabilities in the Balance Sheet.

Acquisition Costs – Life Investment Contracts – Commission that varies with and is directly related to securing new contracts is capitalised as a deferred acquisition cost asset. All other acquisition costs are recognised as expenses in the Income Statement when incurred. The deferred acquisition cost asset is subsequently amortised over the life of the contracts and recognised in the Income Statement.

Maintenance Expenses

Maintenance costs are the fixed and variable costs of administering policies subsequent to sale and maintaining the company's operations such that they are sufficient to service in force policies. These include general growth and development costs. Maintenance costs include all operating and management costs other than acquisition and investment management costs. Maintenance costs are recognised in the Income Statement on an accrual basis.

Investment Management Expenses

Investment management costs are the fixed and variable costs of managing investment funds. Investment management expenses are recognised in the Income Statement as incurred.

Other Expense Recognition

All other expenses are recognised in the Income Statement on an accrual basis.

(d) Financial Instruments

BASIS OF RECOGNITION AND MEASUREMENT

The Company classifies financial instruments into one of the following categories at initial recognition: Financial Assets or Liabilities at Fair Value through Profit or Loss, Available for Sale, Loans and Receivables, Held to Maturity, and Financial Liabilities measured at amortised cost.

FOR THE YEAR ENDED 31 MARCH 2009

1. STATEMENT OF ACCOUNTING POLICIES (continued)

PARTICULAR ACCOUNTING POLICIES (continued)

Some of these categories require measurement at fair value. Where available, quoted market prices are used as a measure of fair value. Where quoted market prices do not exist, fair values are estimated using present value or other market accepted valuation techniques, using methods and assumptions that are based on market conditions and risks existing as at balance date.

A financial instrument is recognised if the Company becomes a party to the contractual provisions of the instrument. Financial assets are derecognised if the Company's contractual rights to the cash flows expire or if the Company transfers them without retaining control or substantially all risks and rewards of the asset. Financial liabilities are derecognised if the Company's obligations specified in the contract are extinguished.

(i) FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS - Insurance Investments

Assets in this category are measured at fair value. Gains and losses from fair value re-measurement (excluding interest and dividends) are included in Investment Income in the Income Statement.

The financial assets in this category have been designated at inception as Fair Value through Profit or Loss because they back life insurance contract liabilities or life investment contract liabilities. Purchases and sales of these securities are recorded on a trade basis. Insurance investments include:

- Shares in Listed Companies and managed funds shares and managed funds are recognised at fair value based on the bid market price quoted by the stock exchange or fund manager.
- Fixed Interest Securities fixed interest securities are recognised at fair value based on quoted bid market price.

(ii) AVAILABLE FOR SALE FINANCIAL ASSETS

Available for sale financial assets are measured at fair value, with changes in fair value recognised directly in shareholders equity. The Company has not classified any financial assets in this category.

(iii) LOANS AND RECEIVABLES

Assets in this category are measured at amortised cost using the effective interest method and include:

Reverse Mortgages

Reverse Mortgages comprise of advances that are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. The advances are initially recognised at fair value including fees and transaction costs that are directly attributable to the origination of the advance. They are subsequently measured at amortised cost using the effective interest method, less impairment loss.

Cash and Cash Equivalents

Cash and Cash Equivalents include cash on hand, bank current accounts, cash on deposit, shot term money market deposits that is readily convertible to known amounts of cash which are subject to an insignificant risk of changes in value. They are brought to account at the face value and interest is taken to the profit and loss when earned.

Other Receivables

Other Receivables include the other receivables and prepayments.

FOR THE YEAR ENDED 31 MARCH 2009

1. STATEMENT OF ACCOUNTING POLICIES (continued)

PARTICULAR ACCOUNTING POLICIES (continued)

(iv) HELD TO MATURITY INVESTMENTS

Assets in this category are measured at amortised cost. The Company has not classified any financial assets as held to maturity.

(v) FINANCIAL LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS

Liabilities in this category are measured at fair value. Gains and losses arising from the fair value remeasurement are included in the Income Statement. Liabilities in this category include Investment Contracts at Fair Value through Profit or Loss, refer note 20 for details on Life Investment Contract Liabilities.

(vi) OTHER FINANCIAL LIABILITIES

This category includes all financial liabilities other than those designated as Fair Value through Profit or Loss. Liabilities in this category are measured at amortised cost and include:

Borrowings

The Company has long term Bank borrowings. These are initially recognised at fair value plus transaction costs and are subsequently measured at amortised cost. Interest expense is recognised in the Income Statement using the effective interest method.

Other Payables

Other Payables include related party borrowings, other payables, accruals and amounts due to creditors.

(e) Offsetting Financial Instruments

The Company offsets financial assets and financial liabilities and reports the net balance in the balance sheet where there is a legally enforceable right to set-off and there is an intention to settle on a net basis or to realise the asset and to settle the liability simultaneously.

(f) Taxation

Life insurers are subject to a special tax regime. Two tax bases are maintained; the life office base which is subject to tax on investment income less expenses plus underwriting income, and the policyholder base which seeks to tax benefits as they accrue to policyholders under the policies in the form of claim, surrender and maturity payments and increments in the value of policies. The life insurer pays tax on the higher of the two bases at the company tax rate of 30%.

As the life insurer is taxed as proxy for the policyholder, returns to policyholders are tax exempt.

Policyholder liabilities include the net present value of the best estimate of tax payable, including tax losses available to carry forward and other timing differences which arise from items brought to account in different periods for income tax and accounting purposes.

The present value of the future tax benefit or provision for deferred tax included in policy liabilities, is calculated at income tax rates prevailing at balance date.

Life office base tax losses may be transferred among group companies through inter-company accounts at the current tax rate. Policyholder base tax losses may be utilised only to meet future policyholder base profits.

FOR THE YEAR ENDED 31 MARCH 2009

1. STATEMENT OF ACCOUNTING POLICIES (continued)

PARTICULAR ACCOUNTING POLICIES (continued)

(g) Provision for Impairment

Impairment is assessed initially for assets that are known to be individually impaired.

Reverse Mortgages are reviewed at each balance date to determine whether there is any objective evidence of impairment as a result of one or more loss events that occurred after the initial recognition of the loan and prior to the reporting date. The loss event has to have had an impact on the reliable measurement of estimated future cash flows.

If any such indication exists, the asset's recoverable amount is estimated and provision is made for the difference between the carrying amount and the recoverable amount.

The impairment provision is deducted from Reverse Mortgages in the balance sheet and the movement in the impairment provisions is recognised in the Income Statement. Bad debts are written off against the provision in the year in which they are identified. If in a subsequent period the amount of an impairment loss decreases and the decrease is linked objectively to an event occurring after the impairment loss, the loss is reversed through the Income Statement.

(h) Life Insurance Business

The Company's life insurance business is split between life insurance contracts and life investment contracts. Life Insurance contracts are accounted for in accordance with the requirements of NZ IFRS 4. Life investment contracts are accounted for in accordance with NZ IAS 18 and NZ IAS 39.

Life insurance contracts are those contracts that transfer significant insurance risk. Life investment contracts are those with no significant insurance risk, but which give rise to a financial asset and/or liability under NZ IAS 39. Contracts that contain a discretionary participation feature are also classified as insurance contracts.

Determination of Life Insurance Contract Liabilities

Life insurance contract liabilities in the balance sheet and the increase/(decrease) in the Income Statement have been calculated using the Margin on Services (MoS) methodology in accordance with New Zealand Society of Actuaries Professional Standard 3 Determination of Life Insurance Policy Liabilities.

Overview of MoS Methodology

MoS is designed to recognise profits on life insurance contracts as services are provided to policyholders and income is received. Profits are deferred and amortised over the life of the policy, whereas losses are recognised immediately. Services used to determine profit recognition include the cost of expected claims, maintaining policies, and investment management. The policy service for each of the major product groupings that is used to defer and amortise the profit over the life of the policies are called profit carriers. Life insurance contract liabilities are generally determined as the present value of all future expected payments, expenses, taxes and profit margins reduced by the present value of all future expected premiums. Profit margins for participating businesses are set in relation to the value of supporting assets.

MoS profit comprises the following components:

(i) Planned margins of revenues over expenses

At the time of writing a policy and at each balance date, best estimate assumptions are used to determine all expected future payments and premiums. Where actual experience replicates best estimate assumptions, the expected profit margin will be released to profit over the life of the policy.

FOR THE YEAR ENDED 31 MARCH 2009

1. STATEMENT OF ACCOUNTING POLICIES (continued)

PARTICULAR ACCOUNTING POLICIES (continued)

(ii) The difference between actual and assumed experience

Experience profits/(losses) are realised where actual experience differs from best estimate assumptions. Instances giving rise to experience profits/(losses) include variations in claims, expenses, mortality, discontinuance and investment returns. For example, an experience profit will emerge when the expenses of maintaining all in-force business in a year are lower than the best estimate assumption in respect of those expenses.

(iii) Changes to underlying assumptions

Assumptions used for measuring life insurance contract liabilities are reviewed each year. Where the review leads to a change in assumptions, the change is deemed to have occurred from the end of the year, except for changes in discount rates which are recognised in the year that the rates are changed.

The financial effect of all other changes to the assumptions underlying the measurement of life insurance contract liabilities made during the reporting period is recognised in the Income Statement over the future reporting periods during which services are provided to policyholders.

(iv) Loss recognition on groups of related products

If based on best estimate assumptions, written business for a group of related products is expected to be unprofitable, the total expected loss for that related product group is recognised in the Income Statement immediately. When loss making business becomes profitable previously recognised losses are reversed.

(v) Investment earnings on assets in excess of policy liabilities

Profits are generated from investment assets which are in excess of those required to meet policyholder liabilities. Investment earnings are directly influenced by market conditions and as such this component of MoS profit will vary from year to year.

Participating Policies

Policyholder liabilities attributable to participating policies include the value of future planned shareholder profit margins and an allowance for future supportable bonuses. The value of supportable bonuses and planned shareholder profit margins account for all profit on a policy based on best estimate assumptions. Under MoS methodology, the value of supportable bonuses and the shareholder profit margin relating to a reporting year will emerge as expected profit in that year.

Life Investment Contract Liabilities

Investment contract liabilities are measured in accordance with NZ IAS 39.

All contracts issued by the Company which are classified as investment contracts are unit-linked. The fair value of a unit linked contract is determined using the current unit values that reflect the fair value of the financial assets backing the contract, multiplied by the number of units attributable to the contract holder.

Reinsurance

Reinsurance premiums and recoveries are recognised separately as revenue and expenses in the Income Statement when they become due and payable in accordance with the reinsurance agreements.

(i) Fair Values Estimates

Financial instruments classified as Fair Value through profit or loss are presented in the Company's Balance Sheet at their fair value. For other financial assets and financial liabilities, fair value is estimated as follows:

FOR THE YEAR ENDED 31 MARCH 2009

1. STATEMENT OF ACCOUNTING POLICIES (continued)

PARTICULAR ACCOUNTING POLICIES (continued)

Cash and cash equivalents

These assets are short term in nature and the carrying value is equivalent to their fair value.

Other receivables

.

These assets are short term in nature and the carrying value is equivalent to their fair value.

Reverse Mortgages

Reverse Mortgages have fixed interest rates. Fair value is estimated using a discounted cash flow model based on a current market interest rate for similar products after making allowances for impairment.

Other payables

These liabilities are short term in nature and the carrying value is equivalent to their fair value.

Borrowings

Borrowing liabilities have fixed interest rates. Fair value is estimated using a discounted cash flow model based on a current market interest rate for similar products.

(j) Managed Funds and other Fiduciary Activities

Dorchester Life Limited acts as an investment manager for a number of superannuation funds. The assets and liabilities of these funds are not included in the financial statements.

Arrangements exist to ensure the activities of the superannuation funds are managed independently from the other activities of the company.

(k) Segment Reporting

The Company's primary reporting format is business segments. Segments reported are in line with the organisational structure of the Company. They take into account the nature of the products and services provided that are subject to risks and rewards that are different from other segments.

The Company operates predominantly within New Zealand. On this basis geographical segment reporting is not applicable.

(1) Cash Flow Statement

The Cash Flow Statement has been prepared using the direct approach modified by netting certain cash flows in order to provide more meaningful disclosure as many of the cash flows are on behalf of the Company's customers rather than those of the Company. These include Reverse Mortgages and Financial Assets at Fair Value through Profit or Loss.

(m) Comparatives

To ensure consistency with the current year, certain comparative figures have been reclassified to conform with the current year's presentation.

FOR THE YEAR ENDED 31 MARCH 2009

1. **STATEMENT OF ACCOUNTING POLICIES** (continued)

PARTICULAR ACCOUNTING POLICIES (continued)

(n) Contingent Liabilities

The Company is involved in transactions that give rise to contingent and/or future liabilities. The Company discloses a Contingent Liability when it has a possible obligation arising from past events that will be confirmed by the occurrence or non-occurrence of one or more uncertain future events. A Contingent Liability is disclosed when a present obligation is not recognised because it is not probable that an outflow of resources will be required to settle an obligation, or the amount of the obligation cannot be measured with sufficient reliability.

(o) Significant Judgements

The Company makes estimates and assumptions that affect the amounts reported in the financial statements. Estimates and judgments are continually evaluated; they are based on historical experience and current observable data. The estimates and judgments made by the Company in the process of applying the accounting policies that have the most significant effect relate to Life Insurance Contract Liabilities. These have been measured in accordance with Actuarial Methodologies as noted below.

ACTUARIAL POLICIES AND METHODS

The actuarial report on life insurance contract liabilities and prudential reserves for the current reporting period was prepared as at 31 March 2009 by Peter Davies, a Fellow of the New Zealand Society of Actuaries. The value of life insurance contract liabilities has been determined in accordance with Professional Standard No. 3 of the New Zealand Society of Actuaries. After making appropriate checks, the actuary was satisfied as to the accuracy of the data from which the amount of policy liabilities has been determined.

The key assumptions used in determining policy liabilities are as follows:

a) Discount Rates

Discount rates used to determine the life insurance contract liabilities are based on an appropriate risk-free rate of return, taking account of the term of the insurance contracts.

Tax was deducted at the rate of 30% on investment earnings net of investment expenses (2008: 30%). The net discount rates assumed were as follows:

	<u>2009</u>	<u>2008</u>
Whole of Life and Endowment Policies	3.74%	4.20%
Term Insurance Policies	Not applicable	Not applicable
Funeral Benefit Policies	Not applicable	Not applicable
Annuity Policies	3.74%	4.20%
Consumer Credit and Key Person Loan Protection	Not applicable	Not applicable

b) Inflation Rates

In determining the future expected rate of return, general inflation was assumed to continue into the future at 2.0% per annum (2008: 2.0%).

FOR THE YEAR ENDED 31 MARCH 2009

1. STATEMENT OF ACCOUNTING POLICIES (continued)

ACTUARIAL POLICIES AND METHODS (continued)

c) Mortality Rates

Rates of mortality were assumed as follows:

For whole of life, endowment and term insurance policies: NZ97 (2008; NZ97).

For annuities and Reverse Mortgages the Directors assumed mortality according to the PA(90) table, reduced by four years (but assuming no age reduction for the Cook Islands Annuity Pension Plan) (2008: PA(90) table, reduced by four years, no age reduction for Cook Islands).

d) Profit Carriers

The policies were divided into major product groups with profit carriers as follows:

Major Product Groups

Participating Whole of Life and Endowment Policies
Non Participating Whole of Life and Endowment Policies
Funeral Benefit Policies
Term Insurance Policies
Annuities
Consumer Credit and Key Person Loan Protection

Carrier
Policyholder Bonuses
Premiums
Not Applicable
Premiums
Annuity Payments
Premiums

e) Investment and Maintenance Expenses

The maintenance expense and general growth and development expense allowance assumed was \$125 gross before tax (2008: \$125) per annum per policy assuming a rate of inflation of 2.0% per annum (2008: 2.0%). Administration costs for annuities in payment were assumed to be \$60 per annum (2008: \$60), with a rate of inflation of 2.0% per annum (2008: 2.0%).

Investment management expenses were assumed to be 1.0% (2008: 1.0%) of policy liabilities.

f) Inflation and Automatic Indexation of Benefits

Maintenance expenses are assumed to increase 2.0% per annum (2008: 2.0%). Investment management expenses are assumed to remain a constant percentage of funds under management.

g) Taxation

The assumed future tax rates reflects the corporate tax rate applying in New Zealand with effect from 1 April 2008. The calculations have been carried out on the basis of current life insurance income tax legislation.

h) Rates of Discontinuance

Rates of discontinuance are assumed to be 5.0% for whole of life, endowment and term insurance business (2008: 5.0%), and nil for annuity pension plan business (2008: \$nil).

i) Surrender Values

The Company's current basis of calculating surrender values is assumed to continue in the future.

j) Rates of Future Supportable Participating Benefits

Rates of bonus supported by the participating fund are simple annual bonuses of \$10 (2008: \$10) per \$1,000 of sum assured on whole of life policies and \$20.00 (2008: \$20.00) per \$1,000 of sum assured on endowment policies. These equal the rates of bonus declared in the previous year.

k) Impact of changes in assumptions

The impact of the change in the discount rate is an increase in policy liabilities of \$84,488 (2008: \$27,345).

FOR THE YEAR ENDED 31 MARCH 2009

1. STATEMENT OF ACCOUNTING POLICIES (continued)

ACTUARIAL POLICIES AND METHODS (continued)

1) Crediting Policy Adopted for Future Supportable Participating Benefits

NET DECEIT AETED MOVEMENT IN LIEF INCHDANCE

For participating business the Company's policy is to distribute profits arising such that over long periods the returns to policy holders are commensurate with the investment returns achieved on relevant assets, together with other sources of profit arising from this business. In applying the policyholders' share of distributions to provide bonuses, consideration is given to achieving equity between generations of policyholders and equity between the various classes and sizes of policies in force. Assumed future bonus rates included in policyholder liabilities were set such that the present value of policyholder liabilities, allowing for the shareholders' right to participate in distributions, equals the value of assets supporting the business.

2.	NET PROFIT AFTER MOVEMENT IN LIFE INSURANCE CONTRACT LIABILITIES, LIFE INVESTMENT CONTRACT LIABILITIES AND TAXATION	2009	2008
a)	Included in Net Profit after movement in Life Insurance Contract Liabilities, Life Investment Contract Liabilities and Taxation are the following:	ı	
	Revenue		
	Operating Lease Revenue	1,935	30,338
	Interest Received	17,183	441,605
	Expenses		
	Audit Fees	50.440	70.401
	- Fees for audit of the Financial Statements	59,449	70,481
	Provision for impairment	756,452	88,772
	Rental and lease costs	-	79,029
b)	Net profit after taxation from insurance activities arose from:		
	Life Insurance Contracts		
	Planned margin of revenues over expenses	5,202	2,357
	Change in valuation assumptions – tax rate change	•	27,345
	Change in discount rate: 6% to 5.34% p.a.	(84,488)	
	Difference between actual and assumed experience	(434,376)	289,186
	Life Investment Contracts		
	Difference between actual and assumed experience	254,976	452,802
	Investment earnings on assets in excess of Insurance Contract		
	and Investment Contract Liabilities	1,057,555	1,107,951
	Net profit after taxation attributable to insurance activities	\$ <u>798,869</u>	<u>\$ 1,879,641</u>

The disclosure of the components of operating profit after tax expense are required to be separated between policyholders' and shareholders' interests. We have included only one column, as any policy holder profits are an expense of the Company and not attributable to the Shareholder.

FOR THE YEAR ENDED 31 MARCH 2009

2. <u>NET PROFIT AFTER MOVEMENT IN LIFE INSURANCE CONTRACT LIABILITIES, LIFE INVESTMENT CONTRACT LIABILITIES AND TAXATION</u> (continued)

It is not currently possible to identify all experience variances separately for Life Investment Contracts. The difference between actual and assumed experience for Life insurance contracts therefore includes some variances relating to life investment contracts.

c)	Premium revenue	<u>2009</u>	<u>2008</u>
	Life insurance contract premiums	<u>\$ 947,355</u>	<u>\$ 1,727,454</u>
d)	Investment Income		
	Equity securities - Australasian	(2,192,704)	(1,169,903)
	Equity securities – International	184,025	(266,624)
	Fixed interest securities – New Zealand	561,735	512,672
	Property securities - New Zealand and International	(3,406,429)	(1,612,470)
		\$ (4,853,373)	\$ (2,536,325)

Included within Equity Securities is dividend income of \$15,379 (2008: \$207,180) and included within Fixed Interest Securities is interest income of \$18,054 (2008: \$676,911). Included within Total Investment Income is net realised and unrealised loss on Securities at Fair Value through Profit or Loss of (\$4,886,806) (2008: (\$3,420,416)).

e) Claims

f)

Life insurance contract claims	<u>\$ 133,250</u>	\$ 242,886
Administration fees		
Life Insurance Contracts		
Policy acquisition expenses – commission costs	40,518	229,662
Deferred Acquisition Costs Amortisation	80,860	(62,321)

		<u>\$</u>	\$
	Dorchester Pacific Limited formed a consolidated imputation year ended 31 March 2007.	tion group with its	s subsidiaries for the
	Policyholder The balance of the policyholder credit account is \$131,365 (2008: \$131,365).	
c)	Taxation Losses	2009	2008
	Company Taxation Losses Brought Forward Add/(Less) Taxation Losses Incurred Add/(Less) Taxation Losses Utilised Add/(Less) excess imputation credits converted to losses	949,488 924,512 (726,369) 348,115	5,858,207 (5,267,553) 358,834
	Taxation Losses Carried Forward	\$1,495,746	<u>\$ 949,488</u>

FOR THE YEAR ENDED 31 MARCH 2009

3. TAXATION (continued)

The Company has unrecognised tax losses of \$1,495,746 (2008: \$949,488) available to be carried forward and to be offset against taxable income in the future. The tax effect of these losses at 30% (2008: 30%) is \$448,724 (2008: \$284,846). The ability to carry forward these losses is contingent upon continuing to meet the requirement of the Income Tax Act 2007.

Policyholders	<u>2009</u>	<u>2008</u>
Taxation Losses Brought Forward	60,226,916	44,258,735
Add Taxation Losses Incurred	16,803,511	15,968,181
Taxation Losses Carried Forward	\$ 77,030,427	\$ _60,226,916

We note the Policyholder taxation losses are only available to be offset against future Policyholder income.

The Life insurance regime is currently being reviewed by the Inland Revenue but as the rules have not been finalised, we have not quantified the impact on the Policyholders taxation losses.

4. SHARE CAPITAL

<u>2009</u>

<u>2008</u>

Ordinary shares: 2,500,000 shares fully paid with no par value

2,500,000

2,500,000

All ordinary shares have equal voting rights and share equally in dividends and surplus on winding up.

The dividends declared and paid in 2009 and 2008 were \$2,000,000 (\$0.8 per share) and \$2,500,000 (\$1 per share) respectively. No dividend has been declared subsequent to 31 March 2009.

5. <u>EQUITY - DORCHESTER LIFE LIMITED EQUITY</u> <u>RETAINED FOR SOLVENCY PURPOSES</u>

Separate to the policy liabilities recognised in the balance sheet, the life insurance companies maintain sufficient capital to meet solvency. These are amounts required to provide protection against the impact of fluctuations and unexpected adverse circumstances on the life insurance companies.

Based on actuarial advice the directors have determined that \$6,727,230 (2008: \$6,369,526) of the equity of Dorchester Life Limited should be set aside for solvency purposes and is therefore not available to be distributed. The solvency requirement was determined in accordance with the New Zealand Society of Actuaries Guidance Note No. 5.

	<u>2009</u>	<u>2008</u>
Equity of Shareholders Equity Retained for Solvency Purposes	6,908,284 6,727,230	8,109,414 6,369,526
Equity available for distribution and wholly attributable to shareholders	<u>\$ 181,054</u>	<u>\$ 1,739,888</u>

FOR THE YEAR ENDED 31 MARCH 2009

6. CAPITAL MANAGEMENT

The Company's capital includes share capital and retained earnings.

The Company's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The impact of the level of capital on shareholders return is also recognised and the Company recognises the need to maintain a balance between the higher returns that might be possible with greater gearing and the advantages and security afforded by a sound capital position.

The allocation of capital between its specific business operations and activities is, to a large extent, driven by optimisation of the return on the capital allocated. The process of allocating capital to specific operations and activities is undertaken independently of those responsible for the operation.

The Company's policies in respect of capital management and allocation are reviewed regularly by the Board of Directors. There have been no material changes in the Company's management of capital during the year.

7.	CASH AND CASH EQUAIVALENT	<u>2009</u>		2008
	Bank	\$ 750,812	<u>\$</u>	246,736

13. COMMITMENTS AND CONTINGENT LIABILITIES

Operating Lease commitments

There are no amounts committed under an Operating Lease (2008: \$Nil).

Capital Expenditure

There are no amounts committed to Capital Expenditure (2008: \$Nil).

Loan Commitments

Loan commitments are provided in the liquidity note in note 14.

Contingent Liabilities

The Company has no material contingent liabilities at 31 March 2009 (2008: \$Nil).

Page 25

NOTES TO THE FINANCIAL STATEMENTS (continued)

FOR THE YEAR ENDED 31 MARCH 2009

14. FINANCIAL INSTRUMENTS

a.) Credit Risk

Credit risk is the risk that a counterparty will cause a financial loss for the Company by failing to meet its contractual obligation.

Financial instruments which potentially subject the Company to credit risk principally consist of cash and cash equivalents, Reverse Mortgages, other receivables and financial assets at fair value through profit or loss. There is also credit risk in off-balance sheet financial instruments, such as loan commitments which represent irrevocable unused portions of authorisations to extend loans. The Company's cash equivalents and short term deposits are placed with high credit quality institutions.

The Company performs credit evaluations on all customers requiring advances. The Company requires collateral or other security to support the financial instruments with credit risk. The Company operates a lending policy with various levels of authority depending on the size of the loan. A lending and credit committee operates and overdue loans are assessed on a regular basis by this body.

Risk gradings, categorise exposures according to the degree of risk of financial loss faced and focus management on the attendant risks. Risk grades are used to determine where impairment allowances may be required. The current risk grading framework consists of three grades reflecting varying degrees of risk of default and the availability of collateral or other credit risk mitigation. They are as follows:

- neither past due or impaired compliance with all terms, good security value, and no adverse events affecting the borrower.
- past due but not impaired material compliance with all terms, concerns over security value, concerns over future events that may effect the borrower.
- impaired non-compliance with terms or evidence of impairment of security held, adverse event affecting the borrower.

The Company implements guidelines on the acceptability of specific classes of collateral or credit risk mitigation. The principal collateral types for Reverse Mortgages are Mortgages over houses.

Maximum exposure to credit risk is represented by the carrying value of each financial asset in the Balance Sheet which is net of any provision for impairment.

With respect to credit risk on commitments, the likely amount of loss is less than the total unused commitments, as most commitments to extend credit are contingent upon customers maintaining specific credit standards.

The credit risk exposure below does not take into account the fair value of any collateral, in the event of counterparties failing to meet their contractual obligation.

For Life Investment Linked Contracts the investments credit risk is appropriate for each particular product and the risk is borne by the Policy Holder. There is no significant risk assumed by the Company.

FOR THE YEAR ENDED 31 MARCH 2009

14. FINANCIAL INSTRUMENTS (continued)

a.) i.) Concentrations of Credit Risk

Concentrations of credit risk exist if a number of counterparties are involved in similar activities and have similar economic characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions.

The Company manages, limits and controls concentrations of credit risk, in particular, to individual counterparties and geographic location. The Company lends only to owners of property.

Such risks are monitored on a ongoing basis and subject to an annual or more frequent review, when considered necessary.

Geographic concentrations of Reverse Mortgages

The following table breaks down the Company's main credit exposure at their carrying amounts, as categorised by the geographic regions of our counterparties.

	2009	<u>2008</u>
Northland	3,320,298	2,795,427
Auckland	12,183,312	11,990,349
Waikato/Bay of Plenty	2,116,928	1,304,689
Taupo	1,116,353	905,874
Wellington	1,877,450	1,970,425
Rest of North Island	1,618,197	1,755,632
Canterbury	1,968,526	1,725,776
Otago/Southland	592,695	550,267
Rest of South Island	1,707,883	965,807
	\$26,501,642	\$23,964,246
a.) ii.) Reverse Mortgages specifically impaired		
, ,	<u>2009</u>	<u>2008</u>
Reverse Mortgages specifically impaired	\$1,724,640	\$300,930

Reverse Mortgages (RAM's) are an equity release product from counterparties residences. Mortgage advances and interest accruals increase the mortgage carrying amount therefore there are no past due mortgages. When the mortgage advances and interest accruals exceed secured property valuations the Reverse Mortgage is specifically impaired.

An estimate of the fair value of collateral held against impaired Reverse Mortgages is \$890,000 (2008: \$237,651).

FOR THE YEAR ENDED 31 MARCH 2009

14. FINANCIAL INSTRUMENTS (continued)

b.) Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in raising funds at short notice to meet obligations from its financial liabilities.

The Company maintains sufficient funds to meet its commitments based on historical and forecasted cash flow requirements. Management actively manages the lending and borrowing portfolios to ensure the net exposure to liquidity risk is minimised. The exposure is reviewed on an ongoing basis from daily procedures to monthly reporting as part of the Company's Liquidity management process. The management process includes:

- day to day funding, managed by monitoring future cash flows to ensure that requirements can be met;
- managing the concentration and profile of debt maturities;

Monitoring and reporting take the form of cashflow measurement and projections, these include:

- day to day funding requirements;
- on a weekly basis, projecting the requirements for each of the next 4 weeks;
- on a monthly basis, projecting the requirements for each of the next 12 months;

The weekly projections are reported to the Board. The Company also monitors the level of undrawn lending commitments.

The starting point for those projections is an analysis of the contractual maturity of the financial liabilities (see tables below).

The tables below present cash flows payable by the Company for financial liabilities and unrecognised loan commitments based on the earliest possible contractual maturity. The Company expects cashflows on these instruments to vary from their contractual maturity. For instance unrecognised loan commitments are not all expected to be drawn down immediately.

As part of the liquidity management, the Company can revise the expected collection dates of finance receivables to react to gaps in liquidity for contractual and expected maturities of financial liabilities and loan commitments.

The liquidity risk for cashflows payable on the Life Investment contracts liabilities that are unit linked contracts is managed by holding a pool of readily tradeable investment assets (included in Financial Assets at Fair Value through profit or loss) and deposits on call. These have been excluded from the maturity analysis below because there is no contractual or expected maturity date for the Life Investment Contracts and the readily tradeable investment assets offset any liquidity risk.

Interest terms of Other Borrowings funding Reverse Mortgages (RAM's) are linked to the underlying RAM's. Interest accrues and increases the carrying amount of Other Borrowings. There is no contractual maturity for RAM products. On repayment of the RAM, Other Borrowings are repaid. The Other Borrowings funding RAM products is a commitment that is extended on an annual basis.

FOR THE YEAR ENDED 31 MARCH 2009

14. FINANCIAL INSTRUMENTS (continued)

c.) Market Risk

7

Market risk is the risk of an event in the financial markets that results in a fluctuation in earnings or a fluctuation in value. Market risk arises from the mismatch between assets and liabilities. The Company is exposed to diverse financial instruments including interest rates, equities, and foreign currencies.

c.i.) Life Insurance Business

For the Life Insurance Business, Financial Assets at fair value through Profit or Loss are held for investment linked policies where market risk is transferred to the policy holder. The Company earns fees on investment linked policies that are based on the amount of assets invested, it may receive lower fees should markets fall. Asset allocation for investment linked policies is decided by the Policy Holder. This risk is not considered significant.

Interest rate risk also arises on risk contracts where negative policy liabilities are valued at current risk free interest rates. There would not be any significant impact on the profit or loss for interest rate changes refer sensitivity analysis note 20.

c.ii.) Interest Rate Risk for Financing activities

For the financing activities of the Company, the main market risk is interest rate risk.

Interest rate risk is the risk of loss to the Company arising from adverse changes in interest rates. The Company is exposed to the interest rate risk in respect of borrowings from and lending to customers.

Interest rates are managed by assessing the demand for funds, for new lending, repayments and maintaining an adequate liquidity buffer. Rates are either fixed or variable for both lending and borrowing over the term of the contract. The Company does not enter into any futures, swaps or option contracts.

Changes to interest rates can impact on the Company's financial results by affecting the spread earned on the interest-earning assets and the cost of interest-bearing liabilities.

Interest rate risk is measured by Management and the Board of Directors when establishing fixed and variable rates of interest. When approving interest rates for individual loan advances interest rate risk is either measured by Management and/or Board of Directors in accordance with the approved lending policy. Exposure to interest rates is monitored by the Board of Directors on a monthly basis.

The expected maturity periods of Reverse Mortgages are set out at note 14.b). Interest rates on advances are fixed or variable throughout the life of the advances. Advances are secured over the assets to which they relate.

Reverse Mortgages and Other Borrowings are carried at amortised cost with the majority of the interest rates being fixed. For the variable rate Reverse Mortgages this is funded by an offsetting variable rate financial liability in borrowings. Therefore there would not be any impact on the profit or loss if there were interest rate changes.

d.) Fair values

The table below summarises the carrying amounts and fair values of those financial assets and financial liabilities not presented on the Company's balance sheet at their fair value:

The benefits offered under the Company's unit-linked investment contracts are based on the returns of selected equities and debt securities. This investment mix is unique, and it cannot be associated to an individual benchmark index with a sufficiently high correlation.

NOTES TO THE FINANCIAL STATEMENTS (continued)

FOR THE YEAR ENDED 31 MARCH 2009

20. <u>LIFE INSURANCE RELATED DISCLOSURES (continued)</u>

a.) Policyholder Liabilities (continued)

All financial liabilities at fair value through profit and loss are designated by the Company to be in this measurement category.

The liabilities originated from unit-linked contracts are measured in reference to their respective underlying assets of these contracts. Changes in the credit risk of the underlying assets do not impact the measurement of the unit-linked liabilities.

The maturity value of these financial liabilities is determined by the fair value of the linked assets, at maturity date.

b.) Policyholder Liabilities

	2009	2008
Annuities	2,308,843	2,342,428
Endowment	554,662	533,533
Whole of Life	371,689	419,059
Provision for Bonuses and Future Margins	54,950	55,483
Consumer Credit Protection & key person loan protection	323,501	871,831
Superlife policies	7,117,212	10,171,246
Life Bond policies - premium reserve	11,128	11,128
Life Bond policies - life bond reserve	43,053	60,148
Superannuation Funds:		
NZPP Payroll Superannuation Fund (Pension)	7,537	9,973
NZPP Payroll Superannuation Fund (Lump Sum)	59,105	73,705
NZPP Personal Superannuation Fund (Pension)	134,463	235,064
NZPP Personal Superannuation Fund (Lump Sum)	22,384	78,603
NZPP Portable Superannuation Fund (Pension)	651,233	1,109,773
NZPP Portable Superannuation Fund (Lump Sum)	140,860	217,666
NZPP Employees Superannuation Scheme	1,579,124	2,191,441
Super Bond Retirement Plan	6,044,151	11,166,904
Invincible Superannuation Plan	151,665	152,346
Dorchester Life Group Superannuation Plan	118,915	200,490
	\$19,694,475	\$29,900,821

The policy liabilities in respect of Annuities, Endowment, Whole of Life, Term Life, Super Life and Life Bond have been established in accordance with the policy conditions and maintained at a level equivalent to obligations due to policy holders as maturity or partial benefits.

Dorchester Life Trustees Limited, as trustee of all the superannuation funds, invests in a life policy issued to the trustees by Dorchester Life Limited. During the year the Company received premiums, paid claims and invested the funds for the superannuation schemes outlined above. All investments and bank accounts of these funds are recorded in the name of Dorchester Life Limited.

The super life policy liabilities are equal to the super life retirement fund. The super life fund has been established by Dorchester Life Limited in accordance with the policy conditions and is maintained at a level equal to the obligations due to super life policyholders as maturity or partial benefits.

FOR THE YEAR ENDED 31 MARCH 2009

20. LIFE INSURANCE RELATED DISCLOSURES (continued)

b.) Policyholder Liabilities (continued)

The life bond policy liabilities are separated into two reserves, the premium reserve fund and the life bond reserve. The premium reserve fund has been established by Dorchester Life Limited accordance with the policy conditions and is maintained at a level equal to the obligations due to life bond policyholders as maturity or partial benefits as at 31 March 2009.

A life reserve has been created from investment earnings and is attributable to the superannuation funds and Superlife policies.

c.) Disaggregated information

The business undertaken and policies accepted by Dorchester Life Limited are a combination of investment linked and non-investment linked. Investment linked business is business for which the life insurer issues a contract where the benefit amount is directly linked to the market value of the investments held in the particular investment linked fund. Non-investment linked business is life insurance business other than investment linked business.

The above information is disclosed prior to the elimination of any related party transactions or balances.

d.) Managed Funds and other Fiduciary Activities

Dorchester Life Limited acts as an investment manager for a number of superannuation funds. The assets and liabilities of these funds are included in the financial statements. Arrangements exist to ensure the activities of the superannuation funds are managed independently from the other activities of the company.

e.) Life Insurance Risk

The Life Insurance Business of the Company involves a number of non-financial risks concerned with the pricing, acceptance and management of the mortality, and longevity risks accepted from policyholders. Financial risks involving the Company are in note 20 above. Insurance risks are controlled through the use of underwriting procedures and adequate premium rates and policy charges, all of which are approved by the Actuary. Tight controls are also maintained over claims management practices to ensure the correct and timely payment of insurance claims.

Terms and conditions of life insurance contracts

The nature of the terms of the insurance contracts written by the Company is such that certain external variables can be identified on which related cashflows for claim payments depend. The tables below provide an overview of the key variables upon which the amount of related cashflows are dependent.

FOR THE YEAR ENDED 31 MARCH 2009

20. LIFE INSURANCE RELATED DISCLOSURES (continued)

e.) Life Insurance Risk (continued)

Type of contract	Details of the contract workings	Nature of compensation for claims	Key variables affecting cash flows
Non-participating life insurance contracts with fixed and guaranteed terms	Benefits paid on death or maturity are fixed and guaranteed and not at the discretion of the issuer	Benefits, defined by the insurance contract, are determined by the contract and are not directly affected by the performance of underlying assets or the performance of the contracts as whole.	Mortality, lapses, expenses and market earnings on assets backing the liabilities.
Life insurance contracts with discretionary participating benefits (endowment and whole of life)	These policies include a clearly defined initial guaranteed sum assured which is payable on death. The guaranteed amount is a multiple of the amount that is increased throughout the duration of the policy by the addition of regular bonuses annually which, once added, are not removed. Regular bonuses are also added retrospectively.	Benefits arising from the discretionary participation feature are based on the performance of a specified pool of contracts or a specified type of contract.	Mortality, lapses, expenses and market earnings on assets backing the liabilities.
Life Annuity Contracts	These policies provide guaranteed regular payments to the life assured.	The amount of the payment is set at inception of the policy.	Longevity, expenses and market earnings on assets backing the liabilities.

Variations in claim levels will affect reported profit and equity. The impact may be magnified if the variation leads to a change in actuarial assumptions which cannot be absorbed within the present value of planned margins for a group of related products.

Insurance risk may arise through the reassessment of the incidence of claims, the trend of future claims and the effect of unforeseen diseases or epidemics. Insurance risk is controlled by ensuring underwriting standards adequately identify potential risk, retaining the right to amend premiums on risk policies where appropriate. The experience of the Company's life insurance business is reviewed regularly.

Concentration of insurance risk

The Company aims to maintain a portfolio of policyholders with a broad spread of insurance risk types, ages, sexes, occupation classes and geographic locations. The Company uses reinsurance to limit the insurance risk exposure for any one individual.

Sensitivity Analysis

The liabilities included in the reported results are calculated using certain assumptions about key variables as disclosed above. Sensitivity analysis is conducted to assess the impact of actual experience being different to that assumed in the calculation of liabilities. Movements in any variable will impact the profit and net assets of the Company. The tables below describe how a change in actual experience relative to that expected will effect next financial year's expected shareholder profit.

FOR THE YEAR ENDED 31 MARCH 2009

20. <u>LIFE INSURANCE RELATED DISCLOSURES (continued)</u>

e.) Life Insurance Risk (continued)

<u>Variable</u>	Impact of movement in underlying variable
Expense risk	An increase in the level or inflationary growth of expenses over assumed levels will decrease profit and shareholders equity
Interest rate risk	Depending on the profile of the investment portfolio, the investment income of the Company will decrease as interest rates decrease. This may be offset to an extent by changes in the market value of fixed interest investments. The impact on profit and shareholder equity depends on the relative profiles of assets and liabilities, to the extent that these are not matched.
Mortality rates	For insurance contracts providing death benefits, greater mortality rates would lead to higher levels of claims, increasing associated claims cost and therefore reducing profit and shareholder equity
Discontinuance	The impact of discontinuance rate assumption depends on a range of factors including the type of contract, the surrender value basis (where applicable) and the duration in force. For example, an increase in discontinuance rates at earlier durations of life insurance contracts usually has a negative effect on profit and shareholder equity. However, due to the interplay between the factors, there is not always an adverse outcome from an increase in discontinuance rates.
Market Risk	For benefits which are not contractually linked to the underlying assets, the Company is exposed to Market Risk

The table below illustrates how changes in key assumptions would impact the reported profit and liabilities of the Company

As at 31 March 2009 - Result of change in assumptions

	Effect on Policy Liability	Effect on Future Profit
Manket Dieke		<u>Margins</u>
Market Risks		
Increase in interest rates of 1%	(160,986)	(1,701)
Decrease in interest rates of 1%	179,730	1,926
