# ANNUAL RETURN FRIENDLY SOCIETY

Friendly Societies and Credit Unions Act 1982

\*10057738161\*

This Return is to be completed and sent within three months of the end of the financial year to the Registrar of Friendly Societies and Credit Unions, Private Bag 92061, Auckland Mail Centre, Auckland 1142.

The purpose of the Return is to obtain up-to-date information, and to present certain details in a consistent manner for all friendly societies for ease of analysis. It is also used to compile overall friendly society statistics. Please complete all sections. This Return may be typed or neatly handwritten.

Organisation Number:	FILE NO. 1802979
Name of Friendly Society:	THE HIBERNIAN CATHOLIC BENEFIT SOCIETY
Name of Branch (Where applicable):	
Registered Office:	94 DIXON STREET, WELLINGTON
Postal Address:	P O BOX 11-632, WELLINGTON 6/42
Financial Year Ended (DD/MM/YYYY):	31/03/2009

## NAMES AND ADDRESSES OF OFFICERS (as at the date of the Return; continue of separate sheet if necessary).

	Name	Residential Address
Committee of	I B BAILEY	101 VOGEL STREET, WOODVILLE
Management	M J MCBRIDE	151 WAIMEA ROAD, BISHOPDALE, NELSON
	M J MCKEE	46 CLEGHORN STREET, BLENHEIM
	LTNEAL	29B FINDLAY STREET, ELLERSLIE, AUCKLAND

## Notes to the Financial Statements for the year ended 31 March 2009

## 1 Statement of Accounting Policies

## 1.1 General Accounting Policies

## a) Reporting Entity:

The financial statements presented here are for the reporting entity The Hibernian Catholic Benefit Society ("the Society"). The financial statements are presented in accordance with the Securities Act 1978 and the Financial Reporting Act 1993, and the rules of the Society. Currency of presentation is the New Zealand dollar.

The primary objective of the Society is to provide mutual assistance to its members through the provision of benefit funds, with financial returns disbursed to the members by way of increased benefits. The Society makes loans to members or invests funds on the members' behalf. Interest and other income is received by the Society and allocated to the members' benefits funds. Accordingly, as a non-profit organisation, the Society has designated itself as a public benefit entity for the purposes of New Zealand Equivalents to International Financial Reporting Standards (NZ IFRS).

The Society operates predominantly in one industry, being the investment of members' funds. All operations are based in New Zealand.

The basis of preparation of these financial statements is New Zealand generally accepted accounting practice (NZ GAAP). They comply with NZ IFRS, and other applicable Financial Reporting Standards, as appropriate for public benefit entities.

Branch funds are not included in these financial statements as each branch is a separate legal entity with its own officers and trustees, and is responsible for its own governance. Branches all prepare and file their own annual financial statements with the Registrar of Friendly Societies and Credit Unions.

## b) Measurement Basis:

The measurement basis is historic cost except for the valuation of certain financial instruments that are revalued to market values. The Society is not registered for G.S.T. The figures in the financial statements are G.S.T. inclusive.

## c) Standards and Interpretations to Published Standards that are not yet effective:

At the date of authorization of these financial statements certain new standards, interpretations and amendments to existing standards have been issued that were not yet effective at balance sheet date and have not been early adopted.

The Society has assessed the relevance of all such new standards, interpretations and amendments and has determined that the following may be relevant to its operations: NZ IAS 1 'Presentation of Financial Statements' (effective for balance date 31 March 2010). This revised standard introduces as a new primary financial statement, the 'Statement of Comprehensive Income'. This may result in additional disclosures arising but does not change the recognition, measurement or disclosure of transactions required by NZ IFRS.

Standards, interpretations and amendments to published standards that are not yet effective and not relevant are NZ IAS 23 'Borrowing Costs', NZ IAS 27 'Consolidated and Separate Financial Statements', NZ IAS 32 'Financial Instruments', NZIFRS 2 'Share Based Payments', NZ IFRS 3 'Business Combinations', NZ IFRS 4 'Insurance Contractors' NZ IFRS 8 'Operating Segments', NZ IFRC 15 'Agreements for the Construction of Real Estate', NZ IFRIC 12 'Service Concession Agreements', NZ IFRIC 13 'Customer Loyalty Programmes' NZ IFRIC 14 'Limit on Defined Benefit Asset' and NZ IFRIC 16 'Hedges of Net Investment in a Foreign Operation'.

## 1.2 Particular Accounting Policies

## a) Income and Expenses Recognition:

#### (i) Income:

Income is measured at the fair value of consideration received. Income from the rendering of services is recognised by reference to the stage of completion of the transaction at balance sheet date, based on the actual service provided as a percentage of the total services to be provided.

Interest income is recognised using the effective interest method.

Dividends are recognised when the right to receive payment has been established.

#### Dues:

Members' dues, assurance, funeral and other contributions to the funds are only recorded as income when the contribution is physically received. Payment of overdue contributions cannot be enforced.

## Loan Fees and Commissions Income:

Loan management fees and commissions received are brought to account once a right to receive consideration has been attained.

## (ii) Expenses:

#### Depreciation:

Depreciation is provided for office furniture and equipment, computer and photocopier. It is calculated as follows:

office furniture, equipment computer, photocopier

- straight line over 10 years

- straight line over 5 years.

## b) Valuation of Funds and their Treatment:

New Zealand Equivalent to International Financial Reporting Standard No. 4 - Insurance Contracts sets out the methodology for measuring policyholder liabilities. Actuarial valuations of the Society's Assurance Fund and Funeral Fund are carried out every year and the liabilities and unallocated surpluses disclosed recorded in the financial statements.

Actuarial valuations are carried out by independent consulting actuaries, Melville Jessup Weaver Limited.

Policy liabilities have been determined in accordance with New Zealand Society of Actuaries Professional Standard No. 3 - Determination of Life Insurance Policy Liabilities. All of the business in the Society's assurance and funeral funds is life insurance contracts with discretionary participating features. The structure of the Society is such that no planned margins are applicable.

#### (i) Life insurance contract liabilities:

The financial reporting methodology used to determine the fair value of the life insurance contract liabilities is referred to as Margin on Service. Under Margin of Service the excess of premium received is recognised over the life of the contract in a manner that reflects the pattern of services provided to policyholders. In this case, "policyholders" are members of the Society's Assurance Fund and Funeral Fund.

## (ii) Best estimate liabilities:

The liability for the current benefit entitlements of each member of each fund is determined using a projection method, whereby estimates of future cash flows (benefits and expenses, net of premiums and contributions) are projected using best estimate assumptions. The best estimate liabilities are calculated as the net present value of the projected cash flows. Under the Rules of the Society, the future benefits are linked to the performance of the assets in the fund, so the discount rate used is the expected future earnings rate on those assets.

In accordance with the rules of the Society, the assets in each fund over and above those required to support members' current benefit entitlements may be used in future to increase members' benefits. Thus, the assets over and above the liabilities for current benefit entitlements are taken to be future supportable benefit increases and the total assets in each fund represent the Policy Liabilities.

The assumptions used in the calculation of the best estimate liabilities are reviewed at each reporting date. A summary of the significant actuarial methods and assumptions used is set out in Notes 18 and 19.

## c) Cash and Cash Equivalents:

Cash and cash equivalents includes cash in hand, deposits held at call with banks, and other short-term highly liquid investments with original maturities of three months or less.

#### d) Financial Assets:

The Society classifies its financial assets into the following categories - financial assets at fair value through profit or loss; loans and receivables; and financial assets at fair value through equity. The classification depends on the purpose for which the investments were acquired. Management determines the classification of its investments at initial recognition and re-evaluates this designation at every reporting date.

Financial assets and liabilities are initially measured at fair value plus transaction costs unless they are carried at fair value through profit or loss in which case the transaction costs are recognised in the income statement.

Purchases and sales of investments are recognised on trade-date, the date on which the Society commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Society has transferred substantially all the risks and rewards of ownership.

The categories of financial assets are:

## (i) Financial assets at fair value through profit or loss:

A financial asset is classified in this category if acquired principally for the purpose of selling in the short term or if so designated by management. Assets in this category are classified as current assets if they are either held for trading or expected to be released within 12 months of balance sheet date. After initial recognition they are measured at their fair values. Gains or losses on remeasurement are recognised in the income statement.

## (ii) Loans and receivables:

These are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial recognition they are measured at amortised cost using the effective interest method. Gains and losses when the asset is impaired or derecognised are recognised in the income statement.

All Society loans to members are 'on demand' with repayment instalments spread over periods of up to 20 years, apart from home equity loans introduced in October 2000 where there is no set term. Loan repayments due within 12 months of balance sheet date are classified as current assets, with the remainder as non-current assets.

## (iii) Financial assets at fair value through equity:

Financial assets at fair value through equity are those that are designated at fair value through equity or are not classified in any of the other categories above, and includes investments that are intended to be held long-term but which may be realised before maturity.

## e) Impairment of Financial Assets:

At each balance sheet date the Society assesses whether there is any objective evidence that a financial asset or group of financial assets is impaired. Any impairment losses are recognised in the income statement. A provision for impairment is established when there is objective evidence the Society will not be able to collect all amounts due according to the original terms of receivables. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted using the effective interest method.

The Society's management determines impairment taking into account the length of time the repayments are in arrears and the security held. Bad debts are written off to the income statement when identified unless an impairment provision has previously been made against a loan in which case the write-off is charged against the provision.

The various components of impaired assets are as follows:

"Non-accrual loans" are loans and advances for which there is reasonable doubt that the Society will be able to collect all amounts of principal and interest in accordance with the terms of the agreement and provisions for impairment are recognized.

"Restructured loans" are loans where the original contractual terms have been modified to provide for concessions of interest, principal or repayment for reasons related to financial

difficulties of the borrower.

"Assets acquired through the enforcement of security" are assets acquired in full or partial settlement of a loan or similar facility through the enforcement of security arrangements.

The Society had one impaired asset at balance sheet date (refer Note 4b). There were no doubtful debts.

## f) Past Due Loans:

Past-due loans are loans or similar facilities in arrears where the borrower has failed to make repayments when contractually due. There were no past due loans at balance date.

## g) Property, Plant and Equipment:

Plant and equipment is shown at cost, less accumulated depreciation and any impairment losses. Property consists of timeshares that were not purchased as revenue-earning assets but as property facilities for the use of members during the year. They are recorded at cost less any accumulated depreciation and any impairment losses. Expenditure incurred on these properties is recovered from users of the facilities by way of a rental charge. As the expected residual value of timeshare property is expected to be greater than the current carrying amount, the assets depreciation rate is zero. Should the residual value subsequently fall below the carrying value depreciation will commence.

## h) Employee Entitlements:

Employee entitlements that the Society expects to be settled within 12 months of balance sheet date are measured at nominal values based upon accrued entitlements at current rates of pay. These include salaries accrued up to balance sheet date and annual leave earned to, but not yet taken at balance sheet date, and sick leave.

The Society recognises a liability for some sick leave. The amount is calculated based on the unused sick leave entitlement that can be carried forward at balance sheet date, to the extent that the Society anticipates it will be used by staff to cover those future absences.

## i) Statement of Cash Flows:

The statement of cash flows is prepared using the direct approach.

Definitions of terms used in the statement of cash flows:

"Cash" includes coins and notes, demand deposits and other highly liquid investments readily convertible into cash and includes at call borrowings such as bank overdrafts, used by the Society as part of its day-to-day cash management.

"Operating Activities" include all transactions and other events that are not investing or financing activities.

"Investing Activities" are those activities relating to the acquisition and disposal of current and non current investments and any other non current assets.

"Financing Activities" are those activities relating to changes in the size and composition of the capital structure of the Society.

## j) Taxation:

No taxation is provided for in the financial statements as the Society is exempt from income tax under Section CW 44 of the Income Tax Act 2007.

## k) Foreign Currency:

Transactions in foreign currencies are converted at the New Zealand rate of exchange at the date of the transaction. At balance sheet date foreign monetary assets and liabilities are translated at the closing rate and variations arising from these transactions are included in the Balance Sheet.

## 1.3 Changes in Accounting Policies

There have been no significant changes in accounting policies from those applied in the previous accounting period.

## 2 Members Equity

Members' equity is represented by the Society's various benefits funds – assurance, funeral, retraining, tertiary bursary, benevolent, medical assistance and holiday accommodation (Notes 18 - 24) – with all monies in those funds belonging to the members. Apart from the Holiday Accommodation Fund, each fund receives a pro-rata share of investment income and pays a fair share of management and administration costs as determined by the Society's management each year.

## 3 Cash and Cash Equivalents

	31/3/09	31/3/08	31/3/07
	\$	\$	\$
Cash and bank	399,427	117,717	103,866
Call Deposit with Bank of New Zealand	514,642	1,774,854	1,086,925
Term Deposit with National Bank of New Zealand	593,635	593,635	593,635
Term Deposit with Bank of New Zealand	250,000	-	-
	1,757,704	2,486,206	1,784,426

Interest rates earned on cash and cash equivalents ranged from 0.25% to 8.70%pa for the period to 31 March 2009 (31 March 2008: 0.25% - 8.62%; 31 March 2007: 0.25% - 7.48%). Deposits are treated as cash and cash equivalents due to their ability to convert to cash within 1-3 days. Movements in market rates will not affect the recorded value of investments.

Maturity analysis is as follows:

• •	Total	0-6 months	6-12 months	12-18 months	18-24 months	24 + months
	\$	\$	\$	\$	\$	\$
Investments	5,983,193	795,322	213,670	-	379,836	4,594,365
Loans to Members	1,567,311	29,518	30,475	30,216	26,671	1,450,431
	7,550,504	824,840	244,145	30,216	406,507	6,044,796

Effective return on financial assets is as follows:

	31/3/09	31/3/08	31/3/07
Investments	(4.69)%	(2.78)%	8.52%
Loans to Members	9.30%	10.53%	9.05%

## a) Credit Quality:

The Society provides loans to members for various purposes, but principally for housing. Loans are all secured, either by way of first or second mortgage, or by the Society's own life policies. The maximum amount that can be borrowed against security of a mortgage over real estate is 75% of valuation of the security property. Security dissection of loans to members is shown in the above table under 'Loans and Receivables'. Loans are all to individuals who are members of the Society.

## b) Impairment of Financial Assets:

The Society had one impaired asset (refer Note 1.2 e) at balance sheet date. This is a debenture of \$100,000 in Dominion Finance Group Limited (In Receivership) for which an impairment expense has been made. As at 31 March 2009 there were no Past Due Assets (loans in arrears) (31 March 2008: Nil; 31 March 2007: Nil).

## 5 Income on Investments and Loans

Later than one year and not later than five years	28,662	-	
Later than five years	-	-	-
	66,878	_	20,663

## 10 Commitments for Capital Expenditure and Loans

As at 31 March 2009 there were no commitments for capital expenditure, and no undrawn first mortgage loans (31 March 2008: Nil; 31 March 2007: \$19,117). There were no undrawn loans on life policy (31 March 2008: \$700; 31 March 2007: Nil).

## 11 Contingent Liabilities

The Society had no contingent liabilities as at 31 March 2009 (31 March 2008: Nil; 31 March 2007: Nil).

## 12 Related Party Transactions

## a) Hibernian Credit Union Current Account:

The Society undertakes the administration expenditure for the Hibernian Credit Union. The Credit Union has the same Board of Management as the Society and was set up to provide a savings vehicle for Society members. Funds are transferred between the Society and the Credit Union. All transactions are performed on an 'arms length basis'.

The Credit Union is not a subsidiary and has not been consolidated into the financial statements.

## b) Board of Management Members as Borrowers:

There are no loans to members of the Society's Board of Management.

#### c) Key Management Staff:

Apart from salaried remuneration totalling \$135,600 pa, there was no compensation paid to and no customer relationship with any of the Society's three staff.

The Society deals with the Board of Management and staff on the same terms and conditions applied to all members.

## 13 Segmental Information

The Hibernian Catholic Benefit Society operates in one industry, being the investment of members' funds. All operations are based in New Zealand. There is a concentration of members and activity in Wellington and Auckland and their satellite towns.

#### 14 Risk

## a) Credit Risk:

Credit risk is the risk that the other party to a financial instrument will fail to discharge their obligation resulting in the Society incurring a financial loss. This usually occurs when members fail to settle their obligations owing to the Society. There is no industry concentration of credit risk with respect to loans as the Society has members disbursed in areas of employment. The credit policy is that loans and investments are only made to members that are credit worthy. The risk of loss from the loans is primarily reduced by the nature and quality of the security undertaken.

The financial instruments that potentially subject the Society to risk principally consist of cash and cash equivalents, financial assets, and loans to members. The Society's lending policies require all loans to be secured, either by way of first or second mortgage, or by the Society's own life policies. There is no concentration of credit exposure to a particular geographical area. The maximum exposure to credit risk as at balance date is considered to be the book value of financial assets held.

## b) Life Insurance Risk:

Life insurance operations comprise the selling and administration of contracts that are classified for accounting purposes as either life insurance contracts or life investment contracts, the latter category being further divided into investment linked and non-investment linked. All of the Society's Assurance Fund and Funeral Fund business is classified for accounting purposes as life insurance contracts. Such contracts involve the acceptance of significant insurance risk. Risk is defined as significant if and only if an insured event could, cause an insurer to pay significant additional benefits in any scenario excluding scenarios that lack commercial substance.

As the members are from throughout New Zealand the Society is not dependent on any one geographic or economic sector for its life insurance business, although there does exist a concentration in the Auckland geographical area. Risk is managed by conducting actuarial valuations on an annual basis and reviewing maturity profiles. All the Society's life insurance contracts are in New Zealand dollars.

## c) Fair Value:

The fair value of financial assets and liabilities is considered to be materially equivalent to book value as reflected in the balance sheet. Fair value has been determined on the basis of the present value of expected future cash flows under terms and conditions of each financial asset and liability.

## d) Interest Risk:

The Society is exposed to interest rate risk in that further rate movements will affect the market value of fixed interest assets and liabilities. Risk management activities are undertaken in respect of financial assets.

The policy of the Society to manage the risk is to maintain a balanced 'on book' strategy by ensuring that the net interest rate gap between financial assets and benefits payable to members is not excessive. The measure gap is reviewed regularly by management and set in line with market rates. The gap is measured to identify any large exposures to the interest rate movements and to rectify the excess through targeted fixed interest rate products available through investment assets and deposits to rectify the imbalance to within acceptable levels. The policy of the Society is not to undertake derivatives to match the interest rate risks.

Loans to members have minimal interest rate risk as all loans are on a floating rate. Interest rates ranged from 7.25% to 9.25% with maturities spread over periods of up to 20 years, apart from home equity loans introduced in October 2000 (total exposure 31 March 2009; \$633,251; 31 March 2008: \$806,025; 31 March 2007: \$678,751) where there is no set term. One months notice is required before the interest rate on loans can be altered.

## e) Liquidity Risk:

Liquidity risk is the risk that the Society may encounter difficulties raising funds to meet commitments associated with financial instruments and its life insurance business.

The Society's liquidity policy is based upon ensuring significant liquid assets are held so as to meet benefit entitlements and to satisfy the borrowing requirements of the membership. As the members are from throughout New Zealand the funding of the Society is not dependent on any one geographic or economic sector. Risks are managed by continuous monitoring of cash flows, reviewing maturity profiles of financial assets and liabilities, and maintaining adequate reserves and liquidity support facilities.

The liquidity profile is as follows:

	Total	0-6 months	6-12 months	12-18 months	18-24 months	24 + months
	\$	\$	\$	\$	\$	\$
Monetary Assets Receiva	able					
Cash/Cash Equivalents	1,779,447	1,779,447	-	-	-	-

Employee Entitlements	16,536	16,536	-	-	_	-
- ·	53,886	53,886			-	_

Loan terms vary but all loans are on demand.

	31/3/09	31/3/08	31/3/07
The monthly repayments on loans for the period represent an average loan term of	124 months	120 months	97 months
The proportion of monetary assets as are amounts receivable (loans) with repayments in arrears in excess of three months is	nil	nil	nil
The proportion of monetary assets as are amounts receivable (loans) owed in aggregate by the debtors who owe the six largest amounts is	36%	30%	39%

## f) Credit Exposure Concentrations:

Other than cash and cash equivalents and financial assets (refer Notes 3 and 4) there are no concentrations of credit exposure to individual counterparties that are greater than 10% of equity.

g) Currency Risk:

Some financial instruments of the Society are subject to foreign currency fluctuations. 16% of the Society's financial instruments are in Australian dollar denominated assets and 14% in other foreign currencies. All are equities. Liabilities are members benefit entitlements per the rules in New Zealand dollars.

The Society's management manages currency risk by monitoring the cross rate between New Zealand and Australia and other relevant countries. The Society does not enter into hedging

contracts. Management does not believe volatility of fluctuations in the cross rate of exchange between New Zealand and the other relevant countries is a significant risk given the amounts involved as a percentage of New Zealand denominated assets and can be managed by rebalancing the investment portfolio with greater New Zealand denominated investments.

## h) Funds Under Management:

The Society does not engage in funds management or other fiduciary activities.

## i) Other Price Risk:

The Society has \$5,983,193 invested in instruments quoted on public securities exchanges. These financial instruments are subject to price fluctuations.

## 15 Solvency Statement

The Society has determined that the surplus of \$1,276,900 in the Assurance Fund and the surplus of \$157,014 in the Funeral Fund, as at 31 March 2009, should be retained in the respective funds. Its Board of Management is awaiting the outcome of Reserve Bank of New Zealand proposals for the Prudential Regulation of Insurance before considering a policy for determining the amounts to be retained for solvency in future, taking into account actuarial advice including on the standards that relate to this type of business, the Society's rules and members' reasonable expectations for future bonuses and benefit increases.

Of the transfer from Investment Revenue for the year ended 31 March 2009, \$(639,605) is unrealised income (31 March 2008: \$(140,646); 31 March 2007: \$136,127).

## a) Actuarial Policies and Methods:

The effective date of the actuarial valuation on the policy liabilities and solvency reserves is 31 March 2009. The actuarial valuation was prepared by Linda Caradus, a Fellow of the New Zealand Society of Actuaries, of Melville Jessup Weaver, consulting actuaries to the Society. The actuary stated that she was satisfied as to the accuracy of data upon which the calculation of policy liabilities has been made. The amounts of policy liabilities and the solvency reserves have been determined in accordance with the methods and assumptions disclosed in these financial statements and with the standards established by the New Zealand Society of Actuaries.

## b) Assumptions:

Policy liabilities have been determined in accordance with Professional Standard No. 3 'Determination of Life Insurance Policy Liabilities' issued by the New Zealand Society of Actuaries for reporting under NZ IFRS with effect from 1 January 2007. All of the business in the Society's assurance and funeral funds is life insurance contracts with discretionary participating features. The structure of the Society is such that no planned margins are applicable.

The discount rate assumed was 6.5% after investment expenses, based on the mix of the Society's assets and expected future returns on each asset class. The Society is not subject to taxation.

Some of the expenses are expressed per policy and some as a percentage of best estimate liabilities. Taking into account both expected inflation and future volumes of business, the per policy elements of expenses were assumed to increase at 5.0%pa in future years. The resulting expenses in the year ended 31 March 2009 were \$116 per policy for the Assurance Fund and \$39 per policy in the Funeral Fund.

Future mortality was assumed to be in accordance with 90% of the NZ97 aggregate male and female tables for insured lives (31 March 2008: 100%).

Assumptions in respect of future rates of discontinuance (that is, ceasing to be in force for reasons other than death and maturity) vary according to type of contract and duration in force. The current surrender value basis was assumed to continue throughout the life of the contracts. The discontinuance rates are based on the Society's recent and expected future experience: Assurance Fund 2% to 10% and Funeral Fund 1.5% to 5.0%.

The Society's rules allow for benefit increases to be made for members of the assurance and funeral funds as surpluses emerge. No allowance is made within the best estimate liabilities for

future bonuses and benefit increases.

## 24 Holiday Accommodation Fund

This fund was established in 1989 for the purchase of holiday accommodation at timeshare resorts. The timeshares were not purchased as revenue-earning investments but as facilities for the use of members during the year. Expenditure incurred on these properties is recovered from users of the facilities by way of a rental charge.

## To The Members of The Hibernian Catholic Benefit Society

We have audited the financial statements on pages 1 to 19. The financial statements provide information about the past financial performance of The Hibernian Catholic Benefit Society and its financial position and cash flows as at 31 March 2009. This information is stated in accordance with the accounting policies set out on pages 5 to 8.

## **Board of Management Responsibilities**

The Board of Management is responsible for the preparation of financial statements that give a true and fair view of the financial position of The Hibernian Catholic Benefit Society as at 31 March 2009 and its financial performance and cash flows for the year ended on that date.

#### Auditors' Responsibilities

It is our responsibility to express to you an independent opinion on the financial statements presented by the Board of Management.

#### **Basis of Opinion**

An audit includes examining, on a test basis, evidence relevant to the amounts and disclosures in the financial statements. It also includes assessing:

- The significant estimates and judgements made by the Board of Management in the preparation of the financial statements, and
- Whether the accounting policies are appropriate to The Hibernian Catholic Benefit Society's circumstances, consistently applied and adequately disclosed.

We conducted our audit in accordance with New Zealand Auditing Standards. We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to obtain reasonable assurance that the financial statements are free from material misstatements, whether caused by fraud or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

## Independence

Other than our capacity as auditor we have no relationship with or interests in The Hibernian Catholic Benefit Society.

## **Unqualified Opinion**

We have obtained all the information and explanations we have required.

## In our opinion:

- Proper accounting records have been kept by The Hibernian Catholic Benefit Society as far as appears from our examination of those records; and
- the financial statements on pages 1 to 19
  - complies with generally accepted accounting practice in New Zealand
  - gives a true and fair view of the financial position of The Hibernian Catholic Benefit Society as at 31 March 2009 and the results of its operations and cash flows for the year ended on that date.

Our audit was completed on 9 June 2009 and our unqualified opinion is expressed as at that date.
