GOVERNANCE STATEMENT

The Directors of the Company ensure that robust corporate governance policies, practices and processes are in place. Responsibility for the day-to-day operation and administration of the Company is delegated by the Board to the Chief Executive Officer and senior management. The CEO is authorised to make decisions in accordance with the strategy, plans, budgets and the specific delegation framework approved by the Board. The Company maintains a healthy risk culture under the frameworks of formal risk management, compliance, capital, investment, and delegated authority policies. Management report on these and other operational matters in a monthly report to the Board.

The Board delegates certain powers, duties and responsibilities to the Risk, Audit, and Remuneration Committees. All Directors of the Company are considered to be independent per RBNZ guidelines. No executives of the Company hold a seat on the Board. All Directors and senior managers are required to meet Fit and Proper standards as prescribed by company policy.

Some key functions of the Board include:

- ensuring the Company's goals are clearly established and that strategies and business plans are in place for achieving them
- ensuring the Company's financial statements are true and fair and otherwise conform with legal requirements
- identifying steps necessary to protect the Company's financial position and brand
- appointing the CEO
- monitoring the performance of management
- ensuring the Board and management adhere to high ethical standards

The Company employs a full-time Risk & Compliance Manager, who reports to the Financial Controller. The CEO is also the Chief Risk Officer. The associated responsibilities with these roles is formally imbedded into the respective position descriptions. In addition, the Company engages PWC as their Internal Auditor (outsourced) and the Board and Audit Committee approve an annual plan for independent review of the key risk areas of the business.

The Company monitors on a monthly basis its compliance with prudential capital requirements in accordance with RBNZ and APRA regulatory requirements.

Profiles of the Company's Directors are noted below.

Graeme Hawkins

BSC, BCom, ACA, DistFInstD

Chairman

Graeme Hawkins has been a professional director for more than 20 years. He was appointed to the Southern Cross Benefits Board in November 2008. He is also Chairman of the Southern Cross Health Trust and Southern Cross Medical Care Society. He is a director of Cavalier Corporation Ltd and Acting Chairman of Ports of Auckland Ltd. From 2001 to 2007 he was an appointed director of Fonterra Cooperative Group and is a former chairman of Auckland Healthcare, now Auckland District Health Board. Earlier in his career he held a number of strategic and financial roles at Fletcher Challenge and is a former CEO of Dominion Breweries.

GOVERNANCE STATEMENT (continued)

Carole Durbin

BCom, LLB(Hons), FInstD

Carole Durbin was appointed to the Southern Cross Benefits Board in August 2006. She is also a Trustee of the Southern Cross Health Trust and a Director of the Southern Cross Medical Care Society. Ms Durbin is a director of New Zealand owned Fidelity Life. A part-time consultant to Simpson Grierson, one of New Zealand's leading legal firms, Ms Durbin has also held a number of previous Board appointments including DamWatch Services Ltd, Simpson Grierson, Transpower NZ, software developer Synergy International (now Fronde) and was an Earthquake Commissioner. Until October 2009 she was chair of Mighty River Power, having been on that board since 1998. She is a Fellow of the Institute of Directors.

Elizabeth Hickey

MCom(Hons), FCA, MInstD, MNZM

Ms Hickey is a chartered accountant and member of the Institute of Directors who joined the Southern Cross Benefits Board in February 2014. Ms Hickey is a trustee of the University of Auckland Foundation, and a director of Diabetes New Zealand Inc. Her past governance experience includes being a director of Radio New Zealand, Genesis Power and Environmental Science and Research. She has served on both the New Zealand and international boards of the World Association of Girl Guides and Girl Scouts, and is a Fellow and past-President of the NZ Institute of Chartered Accountants. Ms Hickey is also a Trustee of Southern Cross Health Trust and a Director of the Southern Cross Medical Care Society.

Ian McPherson

MB, Ch. B, Dip Obst

Dr McPherson started his career as a GP. In the 1980's he worked for the International Red Cross in war zones. He has held roles as chief executive of the Bay of Plenty Health Board, worked in the Prime Minister's Department, for the Ministry of Health, as executive chairman for Aetna Health and as regional general manager of health for Allianz Asia Pacific Ltd.

Since 2002, Dr McPherson has held the position of CEO of the Southern Cross Healthcare Group and Medical Care Society. He is currently president of the IFHP (International Federation of Health Plans) and holds director positions on the Boards of Work and Income, Mercy Angiography Ltd, Southern Cross Hospitals and Southern Cross Primary Care. Dr McPherson resigned from his Southern Cross Group CEO role on 30 June 2014 and the Southern Cross Directorships on 31 July 2014.

Keith Taylor

BSc, BCA, FIA, FInstD

Keith Taylor was elected to the Southern Cross Benefits Board in February 2014 and is also a Trustee of the Southern Cross Health Trust and a Director of Southern Cross Medical Care Society. Mr Taylor has over 30 years' experience in the insurance and financial services industries as a chief executive, chief financial officer and actuary. He is chair of the Government Superannuation Fund, Gough Holdings Limited and Speirs Group, and deputy chair of the Reserve Bank of New Zealand and the Earthquake Commission. He is a director of Port Marlborough and Butland Holdings, and a member of the Carey Baptist College Board. He has previously been a director of property, insurance, trustee and investment companies in both New Zealand and Australia.

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 30 June 2014

1 STATEMENT OF ACCOUNTING POLICIES

REPORTING ENTITY

Southern Cross Benefits Limited (the "Company") is a limited liability company domiciled and incorporated in New Zealand. It is a wholly owned subsidiary of the Southern Cross Health Trust.

The Company's registered office is Level 18 AMP Centre, 29 Customs Street West, Auckland.

The statutory base is the Insurance (Prudential Supervision) Act 2010, Companies Act 1993 and the Financial Reporting Act 1993.

The Company is registered as a charity under the Charities Act 2005, as part of the Southern Cross Health Trust group registration.

The Company's primary activity is the provision of travel and pet insurance.

The Company also operates in Australia selling outbound travel insurance. This activity is conducted through a branch structure which is a Category C Direct Offshore Foreign Insurer("DOFI") regulated by the Australian Prudential Regulation Authority ("APRA") and the Australian Securities and Investment Commission("ASIC"). The Company also operates in the New Zealand pet insurance market.

In February 2013, the Company was granted a full licence by the Reserve Bank of New Zealand ("RBNZ") to operate as an insurer subject to the Insurance (Prudential Supervision) Act 2010.

Financial statements are presented for the Company, including the Australian branch and pet insurance business.

The Company has a non-trading joint venture Fusion Insurance Services Limited in which it has a 50% share.

The Company, with its shareholder's approval, has applied the exemption available under section 211 (3) of the Companies Act 1993 in not disclosing the information required under section 211 (1) paragraphs (e), (g) and (h) of the Companies Act 1993.

BASIS OF PREPARATION

The financial statements have been prepared in accordance with New Zealand generally accepted accounting practice ("NZ GAAP"). They comply with New Zealand equivalents to International Financial Reporting Standards ("NZ IFRS") and other applicable financial reporting standards, as appropriate for profit oriented entities.

From 1 April 2014, the new Financial Reporting Act 2013 ("FRA 2013") has come into force replacing the Financial Reporting Act 1993. This is effective for all for-profit entities with reporting periods beginning on or after 1 April 2014. This will be effective for the Company's 30 June 2015 year end. It is expected that the change in legislation will have no material impact on the Company's obligation to prepare general purpose financial statements.

In addition to the change in legislation, the External Reporting Board of New Zealand ("XRB") has released a new accounting standards framework which establishes the financial standards to be applied to entities with statutory financial reporting obligations. The Company is currently reporting under NZ IFRS. Under the new XRB framework, the Company is expected to continue to apply NZ IFRS as applicable for Tier 1 for-profit entities. The Company expects that this will have no material impact on the preparation and disclosures included in the financial statements.

for the year ended 30 June 2014

1 STATEMENT OF ACCOUNTING POLICIES (continued)

BASIS OF PREPARATION (continued)

The statement of financial position has been presented in the order of decreasing liquidity.

The financial statements were approved by the Board of Directors on 24 September 2014.

BASIS OF MEASUREMENT

The financial statements are prepared on the historical cost basis except that the following are stated at their fair value: Financial assets at fair value through profit or loss and insurance contract liabilities.

FUNCTIONAL AND PRESENTATION CURRENCY

These financial statements are presented in New Zealand dollars, which is the functional and presentation currency. The functional currency for the Australian branch is Australian dollars. Transactions in the branch are translated to New Zealand dollars as discussed in the foreign currency transactions accounting policy. All financial information presented in New Zealand dollars has been rounded to the nearest thousand, unless otherwise stated.

USE OF ESTIMATES AND JUDGEMENTS

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised.

Information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements relate to insurance contract liabilities (notes 16 and 17) and risk management (note 18).

The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

ADOPTION OF NEW ACCOUNTING STANDARDS

NZ IFRS 10 - Consolidated Financial Statements introduces a new control model that focuses on whether an entity has power over an investee, exposure or rights to variable returns from its involvement with the investee and ability to use its power to affect those returns. This standard became effective from 1 July 2013 and did not have a material impact on the Company's financial statements.

NZ IFRS 11 - Joint Arrangements provides guidance on determining whether a joint arrangement is a joint operation or joint venture. This standard became effective from 1 July 2013 and did not have a material impact on the Company's financial statements.

NZ IFRS 13 – Fair Value Measurement sets out improvements to the definition of fair value and also sets out a single framework for measuring fair value and requires new disclosures. This standard became effective from 1 July 2013 and did not have a material impact on the Company's financial statements.

for the year ended 30 June 2014

1 STATEMENT OF ACCOUNTING POLICIES (continued)

BUSINESS COMBINATIONS

Business combinations are accounted for using the acquisition method as at the acquisition date, which is the date on which control is transferred to the Company. Control is when the Company is exposed, or has rights, to variable returns from its involvement with an investee and has the ability to affect those returns through its power over the entity.

The Company measures goodwill at the acquisition date as:

- the fair value of the consideration transferred; plus
- the recognised amount of any non-controlling interests in the acquiree; plus
- if the business combination is achieved in stages, the fair value of the pre-existing equity interest in the acquiree; less
- the net recognised amount (generally fair value) of the identifiable assets acquired and liabilities assumed.

When the excess is negative, a bargain purchase gain is recognised immediately in profit or loss.

The consideration transferred does not include amounts related to the settlement of pre-existing relationships. Such amounts generally are recognised in profit or loss.

Transaction costs, other than those associated with the issue of debt or equity securities, that the Company incurs in connection with a business combination are expensed as incurred.

Any contingent consideration payable is measured at fair value at the acquisition date. Subsequent changes in the fair value of the contingent consideration are recognised in profit or loss.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents comprise cash on hand and current account balances in bank accounts. Under the NZ IFRS definition of financial assets, cash and cash equivalents are classified as "financial assets at fair value through profit or loss".

PREMIUM AND OTHER RECEIVABLES

Premium and other receivables are stated at their cost less impairment losses. Impairment losses for uncollectable premiums are recorded as bad debt expense in the profit or loss. Under the NZ IFRS definition of financial assets, premium and other receivables are classified as "loans and receivables".

INVESTMENTS

The Company designates its investments as "financial assets at fair value through the profit or loss" at inception.

Investments designated as fair value through the profit or loss at inception are those that are held to match insurance contract liabilities. The designation of these assets to be at fair value through the profit or loss eliminates or significantly reduces a measurement or recognition inconsistency between assets and liabilities.

All investments are carried at fair value using the market bid price or valuation based on market observable data with changes in fair value recognised in the profit or loss. Transaction costs are recognised in the profit or loss on transaction date.

for the year ended 30 June 2014

1 STATEMENT OF ACCOUNTING POLICIES (continued)

INVESTMENTS (continued)

All purchases of investments are recognised on the date of the trade.

EQUIPMENT AND LEASEHOLD IMPROVEMENT

Equipment and leasehold improvements are measured at cost, less accumulated depreciation and impairment losses.

Where material parts of an item of equipment and leasehold improvement have different useful lives, they are accounted for as separate items of equipment and leasehold improvement.

Subsequent costs are added to the carrying amount of an item of equipment and leasehold improvement when that cost is incurred if it is probable that the future economic benefits embodied with the item will flow to the Company and the cost of the item can be measured reliably. All other costs are recognised in the profit or loss as an expense as incurred.

Depreciation is recognised in the profit or loss on a straight-line basis over the estimated useful lives of each part of an item of equipment and leasehold improvement. The depreciation rates for the current and comparative periods are as follows:

Computer equipment 25% - 33% per annum
 Furniture and fittings 15% - 20% per annum
 Office equipment 15% - 20% per annum
 Leasehold improvements 8.33% per annum

The carrying value of each class of asset is assessed annually. If the estimated recoverable amount of each class of asset is less than its carrying amount, the class of asset is written down to its recoverable amount and an impairment loss is recognised in the statement of profit or loss and comprehensive income.

INTANGIBLE ASSETS

Computer Software

Computer software is recognised as an intangible asset when it is not an integral part of the computer hardware. Software development expenditure that meets the criteria for recognition as an intangible asset is capitalised and amortised over its expected useful life, subject to impairment testing. All capitalised costs are deemed to have an expected useful life of five years, unless it can be clearly demonstrated that the net benefits are to be generated over either a longer or shorter period. The capitalised costs are amortised on a straight line basis over the period following completion of a project or implementation of part of a project.

Capital expenditure on major projects is initially recorded as work in progress. On completion of the project the asset is transferred to computer software. Work in progress is not depreciated.

Goodwill

Goodwill that arises upon the acquisition of businesses is presented with intangible assets. Measurement of goodwill at initial recognition is described under Business Combinations within note 1. Goodwill is subsequently measured at cost less accumulated impairment losses.

for the year ended 30 June 2014

1 STATEMENT OF ACCOUNTING POLICIES (continued)

INTANGIBLE ASSETS (continued)

Customer Base

Customer base represents the value of a customer base acquired, through its ability to generate future cash flows from retained business. It is recognised as an intangible asset when a business is acquired and when the criteria for recognition are met. A customer base is initially recognised at cost which is the fair value at the acquisition date and subsequently carried at cost less accumulated amortisation and any accumulated impairment losses. The capitalised costs are amortised on a straight line basis over the period when future economic benefits are expected to flow to the Company. This period is determined to be ten years.

Insurance contracts acquired

The value of insurance contracts acquired represents the expected future cash flows arising from the insurance contracts acquired. Insurance contracts acquired are recognised as an intangible asset when a business is acquired and when the criteria for recognition are met. Insurance contracts acquired are initially recognised at cost which is the fair value at the acquisition date and are subsequently carried at cost less accumulated amortisation and any accumulated impairment losses. The capitalised costs are amortised over the remaining life of the insurance contracts.

FOREIGN CURRENCY TRANSACTIONS

Transactions in foreign currencies that are settled in the reporting period are translated at the settlement rate. Transactions in foreign currency that are not settled in the reporting period, resulting in monetary assets and liabilities denominated in foreign currencies at the reporting date, are translated to New Zealand dollars at the foreign exchange rate at that date. Foreign exchange differences arising on their translation are recognised in the profit or loss.

Foreign operations

Activities of the Australian branch are recorded in Australian dollars, its functional currency. Profit or loss items are translated to New Zealand dollars at an average exchange rate for each month. The assets and liabilities of the branch are initially translated to New Zealand dollars at the foreign exchange rate on the date they arise. At balance date, all the assets and liabilities are re-translated at the exchange rate on that date.

Foreign exchange differences arising from this translation are recognised in other comprehensive income and the foreign currency translation reserve.

IMPAIRMENT

The carrying amounts of the Company's assets are reviewed at each balance date to determine whether there is any objective evidence of impairment. If any such indication exists, the asset's recoverable amount is estimated.

An impairment loss is recognised whenever the carrying amount of an asset exceeds its recoverable amount. Impairment losses directly reduce the carrying amount of the asset and are recognised in the profit or loss. The estimated recoverable amount of assets is the greater of fair value less costs to sell, or value in use.

For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash generating units).

for the year ended 30 June 2014

1 STATEMENT OF ACCOUNTING POLICIES (continued)

IMPAIRMENT (continued)

Goodwill is tested for impairment annually, whether or not there is evidence of impairment (refer note 12).

INSURANCE CONTRACTS

Insurance contracts are defined as those containing significant insurance risk at the inception of the contract.

Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its lifetime, even if the insurance risk reduces significantly during the period.

The Company has determined that all travel and pet insurance policies provided to customers are insurance contracts.

REINSURANCE

Reinsurance premium expense ("Premiums ceded to reinsurers")

Premiums ceded to reinsurers are recognised as reinsurer's share of the premium and deducted from gross premiums. The recognition of the expense in the profit or loss is in accordance with the pattern of reinsurance service received.

Reinsurance claim recoveries

The component of claims expense relating to policies ceded to reinsurers is recognised as reinsurance claim recoveries in the profit or loss and as reinsurance recoveries in the statement of financial position. The recoverability of these assets is assessed at the reporting date and impairment is recognised where there is objective evidence that the Company may not receive the amounts due to it and these amounts can be reliably measured.

INCOME RECOGNITION

Premiums

Gross earned premiums from insurance contracts are recognised evenly over the period covered by the contract. For the travel operations, revenue is recognised on the date from which the travel period commences. Premiums billed but unearned are recorded as unearned premiums. Premiums are stated net of fire service levies and stamp duty. Where premiums are billed and paid by instalments, the premium to be billed up to the next renewal date is recognised as a receivable and unearned premium liability.

Fee and other income

Fees and other income are recognised as income over the period in which the related services are performed.

Investment income

Interest income is recognised in the profit or loss as it accrues and is calculated by using the effective interest rate method. Investment income on financial assets held at fair value through the profit or loss are recorded in accordance with the policies described for in Investments (note 1). Distributions from investments in funds are recognised on a present entitlement basis.

for the year ended 30 June 2014

1 STATEMENT OF ACCOUNTING POLICIES (continued)

LEASES

Payments made under operating leases are recognised in the profit or loss on a straight-line basis over the term of the lease.

ACQUISITION COSTS

The costs incurred in acquiring and recording insurance contracts are deferred in recognition that they represent future benefits. Acquisition costs are initially recorded in the profit or loss.

Any amounts that give rise to premiums in subsequent reporting periods are deferred as an asset and amortised over the period covered by the insurance contract.

NET CLAIMS EXPENSE

The net claims expense represents payments made on claims and the movements in the outstanding claims and unexpired risk provisions (as described below).

OUTSTANDING CLAIMS PROVISION

The liability for outstanding claims comprises claims incurred but not settled at the reporting date, whether reported or not. A central estimate is made of claims incurred but not paid. The central estimate includes expected claim payments plus associated claims handling costs. In addition a risk margin is added to reflect the inherent uncertainty in the estimate of claims and claims handling costs.

PAYABLES

Payables are stated at cost. Under NZ IFRS definition of financial liabilities, payables are classified as "other liabilities at amortised cost".

PROVISIONS

A provision is recognised when there is a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation. If the effect is material, provisions are determined by discounting the expected future cash flows at a rate that reflects current market rates and, where appropriate, the risks specific to the obligation.

UNEXPIRED RISK PROVISION AND LIABILITY ADEQUACY TEST

The liability for unearned premiums arises from premiums received for risks that have not yet expired. The provision is released evenly over the duration of the travel period for travel insurance contracts and the duration of the insurance contract for pet insurance contracts and is recognised as premium income. A liability adequacy test is performed on each of the travel and pet insurance businesses to assess whether there is any deficiency in the unearned premium liability arising from expected claims and administration costs during the period covered by the unearned premium. For the New Zealand travel insurance business, the test has been performed on the aggregate portfolio as risks are broadly similar and are managed together as a single portfolio. The Pet and Australian operations are mono-lined businesses so the test has been performed on each of them as a whole.

The central estimate of claims and administration expenses is calculated. In addition, a risk margin is added to reflect the inherent uncertainty in the estimate of future claims. The total is compared with the unearned premium liability. Any deficiency is recognised in profit or loss after first writing down any deferred acquisition costs. The deficiency (if any) in excess of deferred acquisition costs is recognised in the statement of financial position as an unexpired risk liability.

for the year ended 30 June 2014

1 STATEMENT OF ACCOUNTING POLICIES (continued)

EMPLOYEE BENEFITS

Employee benefits represent the current obligation to employees in respect of outstanding salaries, leave entitlements and other short term benefits.

TAXATION

The Company is exempt from New Zealand income tax due to its charitable status. Australian income taxes are not payable by the Australian branch due to a ruling by the Australian Tax Office ("ATO") in the 2012 financial year. The income tax expense recognised in the statement of profit or loss comprises non-resident withholding tax paid on interest income on bank balances in Australia.

GOODS AND SERVICES TAX (GST)

The statement of profit or loss and other comprehensive income has been prepared so that all components are stated exclusive of GST. All items in the statement of financial position are stated net of GST, with the exception of receivables and payables, which include GST invoiced.

CHANGE IN ACCOUNTING ESTIMATES

If a change in an accounting estimate gives rise to a change in an asset or liability, or relates to equity, it is recognised by adjusting the carrying amount of the asset, liability or equity item in the period of the change. Otherwise, it is recognised prospectively by including it in the statement of profit or loss and other comprehensive income in the period of the change and future periods, as applicable.

COMPARATIVES

Certain comparative information has been reclassified to ensure consistency with the current years presentation.

2 NEW FINANCIAL REPORTING STANDARDS APPROVED BUT NOT YET EFFECTIVE

The following new or amended standards and interpretations, which are applicable to the Company, are not yet effective for the year ended 30 June 2014, and have not been applied in preparing these financial statements:

NZ IFRS 9 - Financial Instruments: Classification and Measurement (2009) is the first standard issued as part of a wider project to replace NZ IAS 39. It represents a significant change from the existing requirements in NZ IAS 39 - Financial Instruments: Recognition and Measurement, in respect of financial assets. The standard contains two primary measurement categories for financial assets (amortised cost and fair value), and eliminates the existing three NZ IAS 39 categories (held to maturity, available for sale, and loans and receivables). A financial asset would be measured at amortised cost if it is held to collect contractual cash flows of principal and interest on specified dates. All other financial assets would be measured at fair value.

NZ IFRS 9 - Financial Instruments: Classification and Measurement (2010) adds the requirements relating to classification and measurement of financial liabilities, and derecognition of financial assets and liabilities.

The above revisions to NZ IFRS 9 are effective for annual reporting periods beginning on or after 1 January 2017. The impact of the requirements of this standard on the Company is still to be determined.

The majority of the computer software and work in progress is internally generated. Intangible assets and goodwill are non-current assets.

Goodwill

Goodwill arose in February 2012 upon acquisition of Ellenco Pet Insurance Limited's customer contracts, systems, intellectual property and operating assets.

for the year ended 30 June 2014

12 INTANGIBLE ASSETS (continued)

This goodwill is attributable mainly to the opportunities for growth enabled by marketing the product to the members of the Southern Cross Medical Care Society ("Society") and relates entirely to the pet insurance business, being the cash-generating unit (CGU) as defined in NZ IAS 36. The carrying amount that relates to this CGU at 30 June 2014 is \$168,000 (2013: \$168,000).

Goodwill is assessed at each reporting date for indicators of impairment as it is not amortised. No impairment losses on goodwill were recognised during 2014 (2013: nil).

The recoverable amount of the CGU is determined based on value-in-use calculations, determined by discounting the future cash flows to be generated from the CGU. These calculations use discounted cash flow projections based on past experience, actual operating results and profit forecasts approved by management as part of the rolling operating plan process. The rolling operating plan covers a detailed three year time frame, approved by management. Profit forecasts greater than three years are estimated by management based on their assessment of sustainable growth. The discounted cash flow model has used a five year profit projection, a discount rate (pre-tax) of 12.0% (2013: 12.0%) and annual growth rates for pets covered (as detailed in the following table). The discount rates were based on the average risk-free rate obtained from the yield on 10-year bonds issued by the New Zealand Government adjusted for a risk premium to reflect the risk of the specific CGU. The projected growth in pets covered and cash flows were based on realising the opportunities for growth enabled by marketing the product to the members of the Society in conjunction with technology improvements enabling higher capacity.

Growth rate projections:

	Year 1	Year 2	Year 3	Year 4	Year 5
Pets Covered 2014	29.9%	28.3%	24.1%	10.0%	10.9%
Pets Covered 2013	20.0%	28.8%	29.4%	10.0%	10.0%

Key assumptions underlying the valuation relate to management's assessment of new business growth, claims cost escalation, premium increases, commission rates and operating expenses. Management utilise local market data as well as Group expertise and experience to validate key assumptions.

The key assumptions described above may change as economic and market conditions change. The Company estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the CGU to decline below the carrying amount.

17 ACTUARIAL INFORMATION

Estimates of the provision for outstanding claims for Southern Cross Benefits Limited as at 30 June 2014 have been determined by Peter Davies, B.Bus.Sc. FIA, a Fellow of the New Zealand Society of Actuaries. The calculation of the provision for outstanding claims complies with Appendix D of NZ IFRS 4 – Financial Reporting of Insurance Contracts, and Professional Standard No. 4 – General Insurance Business, of the New Zealand Society of Actuaries.

The actuary is satisfied as to the nature, sufficiency and accuracy of the data used to determine these provisions.

a. Outstanding claims provision

Claims outstanding for two months or more are determined using a standard chain ladder method. Claims outstanding in respect of the most recent two months (Pet insurance, one month) are determined by applying an estimated loss ratio to the earned premiums for the month. In the travel insurance business, additional allowance is made in the New Zealand and Australian outstanding claims provisions for a small number of relatively large notified claims. Future claim payments are not discounted, as the expected duration to settlement is relatively short, and virtually all claims are settled within a year.

An additional margin of 9% (2013: 9%) has been added to the central estimate of the outstanding claim costs, to take account of the uncertainties inherent in the setting of claim provisions. The additional margin for the pet insurance business is 7% (2013: 7%).

A further provision of 7% (2013: 7%) of the central estimate of the outstanding claims has been made for direct and indirect claim management costs for the New Zealand business, and 6% (2013: 6%) for the Australian business and 5% (2013: 7%) for the pet insurance business.

These additional margins provide a 75% probabilty of adequacy.

for the year ended 30 June 2014

17 ACTUARIAL INFORMATION (continued)

Unexpired risk provision and liability adequacy test

The actuary has reviewed the adequacy of the unearned premium provision at 30 June 2014. In performing this test, an additional margin has been added to the central estimate of the future claim costs, to take account of the uncertainties inherent in the central estimate. A further allowance has been made for direct and indirect claim management costs and also policy administration costs.

For the travel insurance businesses, if the loss ratio was to increase by 10%, the premium liability will also increase by 10%. As there is a significant margin between the premium liability and the unearned premium provision, the liability adequacy test in respect of unearned premiums can cover quite significant levels of variability in the loss ratio. For the pet insurance business, the premium liability including risk margins, is higher than the unearned premium net of deferred acquisition costs, therefore any increase in the loss ratio will have a direct impact to profitability.

In the actuary's view, the liability adequacy tests identified surpluses for the travel insurance business but a shortfall for the pet insurance business. Accordingly a deferred acquisition cost of \$229,000 was written down (2013: no write down required).

		2014			2013	
	Pet	New Zealand	Australia	Pet	New Zealand	Australia
Percentage Risk margin on expected future cash flows relating to future claims	12.3%	15.8%	15.8%	12.3%	15.8%	15.8%

IBNP if settlement 10% shorter	580	3,877	1,535	430	3,472	1,533

18 RISK MANAGEMENT

The Company is exposed to a number of risks in the normal course of business. Primarily there is the risk of conducting an insurance business (insurance risk). Other risks include financial risks (credit risk and liquidity risk), market risks (foreign currency risk, interest rate risk and price risk), and non-financial risks (operational risk and compliance risk). The directors and management recognise the importance of having an effective risk management policy. The risks and any objectives, policies and processes to manage the risks are described below in summary; a detailed risk register and risk management framework underpin this summary.

for the year ended 30 June 2014

18 RISK MANAGEMENT (continued)

a. Insurance risk

The Company assumes insurance risk through its travel and pet insurance activities. The key risk arises in respect of claims costs and, in particular, those costs varying from what was assumed in the setting of premium rates.

I. Risk management objectives, policies and processes for mitigating risk

The primary objective in managing risk is, as far as possible, to reduce the magnitude and volatility of claims costs. A secondary objective is to ensure funds are available to pay claims and maintain the solvency of the business if there is adverse deviation in experience. Key policies and methods for mitigating risk include:

- Underwriting policies and processes which evaluate new risks and offer terms that do not endanger the portfolio.
- * Strict claims management procedures to ensure the payment of claims is in accordance with policy conditions and the Delegated Authority Policy.
- * Maintaining a reinsurance programme for the travel insurance business which protects the Company against single large claims in excess of the Company's retention, and against a catastrophic event involving multiple claims.
- A long-term pricing strategy which supports pricing based on underlying risk.
- * Monthly monitoring of financial and operating results and detailed investigations into the claims experience of the portfolio.
- * Adherence to a formal capital management plan monitored monthly to ensure minimum prudential capital requirements are complied with.
- * Implementation of a risk management strategy, which is in accordance with the prudential standards issued by RBNZ and APRA.

II. Sensitivity to insurance risk

The financial results of the Company are primarily affected by the level of claims incurred relative to that implicit in the premiums. The assumptions used in the valuation of the outstanding claims provision and the liability adequacy test directly affect the level of estimated claims incurred. The key assumptions used are detailed in note 17.

The scope of insurance risk is managed by the terms and conditions of the policy. The main insurance benefit for the travel insurance business involves the reimbursement of losses during travel for medical expenses in addition to the losses relating to personal property, cancellation, personal accident, personal liability, and rental vehicle excesses. The level of benefits specified in the contract is a key determinant of the amount of future claims although the exact level of claims is uncertain.

III. Concentration of insurance risk

The Company transacts travel insurance business in New Zealand for inbound and outbound customers, and in Australia for outbound customers. The nature of its business means that this concentration of risk cannot be avoided. Management defines concentration of risk by geographic region, specific destination, and unknown and unforeseen accumulations of insured on a single transport carrier. The Company is most at risk to the global commercial aviation industry and its ability to offer continuous operations given the impacts of oil prices, pandemics, natural disasters and terrorism, which lends itself to a single event resulting in a high volume of relatively low dollar value cancellation / delay claims.

The Company's travel related concentration risks are mitigated by its catastrophe, pandemic and terrorism reinsurance treaties for the travel insurance business, to protect it from high severity losses and catastrophic events. Reinsurance is placed to cover losses in excess of agreed retentions.

for the year ended 30 June 2014

18 RISK MANAGEMENT (continued)

b. Financial risks

I. Credit risk

In the normal course of its business the Company incurs credit risk from its travel and pet insurance operations and from investment in financial assets. There are no significant concentrations of credit risk other than the AMP Capital Cash and Short Duration Funds \$23,597,000 (2013 \$20,997,000) and Colonial First State Cash Fund \$11,838,000 (2013 \$9,895,000).

The Company has internal controls in place to manage premium accounts receivable credit risk and an investment policy is also maintained which is used to manage the exposure to credit risk.

The maximum exposure to credit risk at reporting date is the amount of financial assets reported in the statement of financial position.

These exposures are net of any recognised provisions for impairment losses. There were no impairments at 30 June 2014 (2013: none). The Company does not require any collateral or security to support financial assets due to the quality of the counter-party organisations. The credit quality of counter-parties is assessed based on published credit ratings, issued by Standard & Poor's or equivalent ratings agencies.

The credit quality of investment counter-parties is as follows:

2014	AAA \$000	AA \$000	A \$000	BBB \$000	Non-rated \$000	Total \$000
Cash and cash equivalents	¥	3,361		-	-	3,361

	446	28,781	6,414	1,367	2,695	39,703

A look-through approach has been taken to assess the credit ratings of the investments in funds for this credit quality analysis.

for the year ended 30 June 2014

18 RISK MANAGEMENT (continued)

b. Financial risks (continued)

II. Liquidity risk

The Company is exposed to daily calls on its available cash resources from claims and administration expenses. Liquidity risk is the risk that payment of obligations may not be met in a timely manner at a reasonable cost. The investment policy sets out criteria to ensure funds are available to meet calls to cover claims and expenses at unexpected levels of demand.

For the New Zealand operation invested funds are managed by AMP Capital. These funds are available on call along with the Australian Branch investment in the Colonial First State Cash Fund. The cash and cash equivalents are available on call. All premium accounts receivable, with the exception of unbilled premiums on pet policies, are due within one month of balance date and within two months for the pet insurance business. Unbilled premiums of \$1,722,000 are paid by instalments and are due within 12 months of balance date (30 June 2013: \$1,091,000). Substantially all liabilities are payable within one year of balance date.

Lease payments are made monthly in advance and closely align with the contractual cash flow obligations of the lease (refer note 23).

c. Market risks

I. Foreign currency risk

At 30 June 2014, the New Zealand operations had assets of NZD \$101,000 and no liabilities denominated in foreign currencies (30 June 2013: assets of \$217,000 and no liabilities). Foreign currency bank balances are maintained to meet future claim expenses in these currencies, thereby creating a natural hedge.

The balances held in foreign currencies are:

	NEW ZEAL	AND
	DOLLAR EQUIVALE	
	2014	2013
	\$000	\$000
Australian dollar	14	3
Canadian dollar	46	124
United States dollar	41	90
	101	217

A movement of 100 basis points on these exchange rates would have an immaterial impact on the statement of profit or loss and other comprehensive income.

The Company's Australian branch exposes it to currency risk, as the branch's functional currency is Australian dollars. The New Zealand dollar equivalents of the Australian assets and liabilities at reporting date amounted to \$15,145,000 and \$7,568,000 respectively (30 June 2013: assets of \$13,389,000 and liabilities of \$5,235,000).

for the year ended 30 June 2014

18 RISK MANAGEMENT (continued)

c. Market risks (continued)

As the Australian operation is considered an ongoing investment, no hedging of the foreign currency exposure is undertaken. Any movement in the Australian dollar exchange rate is reflected in the foreign currency translation reserve. A movement of 100 basis points on the Australian dollar exchange rate at year end would have an impact of \$76,000 (2013: \$82,000) on the net assets of the Company and the foreign currency translation reserve.

II. Interest rate risk

During the year, the Company invested in AMP Capital and Colonial First State Cash Fund and has indirect exposure to interest rate risk. There was a risk that any movement in interest rates could have affected the profitability and cash flows of the Company. The Company maintained an investment policy to mitigate this risk.

(i) Cash flow interest rate risk

The cash flows from investments of the Company in the short term are susceptible to changes in interest rates. The variable interest rate instruments pose cash flow interest rate risk and the following analysis shows the impact of notional changes in interest rates on cash flows and profit or loss:

	2014	2013
	\$000	\$000
Impact of increase in interest rates by 100 basis points on cashflows and profit or loss	282	262
Impact of decrease in interest rates by 100 basis points on cashflows and profit or loss	(282)	(262)

(ii) Price risk

The Company is exposed to price risk through unit price changes of its investments in the AMP Capital and Colonial First State funds. The Company manages its price risk by ensuring all activities are transacted in accordance with the funds investment statements and the Company's investment policy which focuses on low risk investments. The following analysis shows the impact of changes in prices on profitability:

	2014	2013
	\$000	\$000
Impact of increase in interest rates by 100 basis points on profit or loss statement	222	143
Impact of decrease in interest rates by 100 basis points on profit or loss statement	(222)	(143)

d. Fair values of financial assets and financial liabilities

All financial assets and financial liabilities included in the statements of financial position are carried at amounts that approximate fair value.

The table below analyses financial assets measured at fair value at the end of the reporting period, by the level in the fair value hierarchy into which the fair value measurement is categorised.

for the year ended 30 June 2014

18 RISK MANAGEMENT (continued)

d. Fair values of financial assets and financial liabilities (continued)

Definition of the fair value hierarchy

Level 1: Valuation based on quoted market prices (unadjusted) in an active market.

Level 2: Valuation techniques based on observable market data, either directly (as prices) or indirectly (derived from prices).

Level 3: Valuation techniques not based on observable market data.

30 June 2014	Level 1 \$000	Level 2 \$000	Level 3 \$000	Total \$000
Bank deposits	1,258	-	-	1,258
Investment in funds	*	35,435		35,435
Total investments	1,258	35,435	-	36,693
	Level 1	Level 2	Level 3	Total
30 June 2013	\$000	\$000	\$000	\$000
Bank deposits	2,204			2,204
Investment in funds	(8)	30,892	1.7	30,892
Total investments	2,204	30,892	-	33,096

The level 2 investments held by the company represent investments in funds. The fair value of the funds is derived from the fair value of the underlying investments within the funds, which are calculated based on inputs that are based on observable market data. The fair value of the funds is calculated and supplied by AMP Capital Investors (New Zealand) Limited for the New Zealand travel operation and Colonial First State Asset Management for the Australian Branch.

The Company determines whether there have been any transfers of investments between Level 1 and Level 2 of the fair value hierarchy at the end of the financial year. There have been no transfers of investments between Level 1 and Level 2 during the financial year (2013: none).

19 RELATED PARTIES

a. Identity and relationship of related parties:

Southern Cross Health Trust ("Health Trust")
 Southern Cross Hospitals Limited ("Hospitals")

 Southern Cross Primary Care Limited ("Primary Care")

Fusion Insurance Services Limited

Southern Cross Medical Care Society ("Society")

Activa Health Limited ("Activa")

Parent of the Company

100% subsidiary of Health Trust

100% subsidiary of Health Trust

50% Joint Venture of the Company

Related party to Parent

Subsidiary of Society

All these related entities have 30 June balance dates.

The Company, the Hospitals and the Society are separate legal entities which work together in certain areas such as information technology, legal, payroll and HR, under fully costed service level agreements which dictate the expectations of each entity. In 2014, such costs to the Company totalled \$922,000 (2013: \$1,071,000).

for the year ended 30 June 2014

19 RELATED PARTIES (continued)

Any other costs incurred by one entity on behalf of another are reimbursed monthly.

In 2013 the Society charged the Company a fee of \$225,000 which was included under the fully costed service level agreements for enabling marketing opportunities to its membership. The Society no longer charges the Company this fee. The Company purchased health insurance for its employees from the Society, to the value of \$64,000 (2013: \$52,000).

During the year, the Health Trust reimbursed \$700,000 of cash advances to the Company from the prior year.

The pet insurance business is operated by the Society under a management contract with the Company. The total value of Society charges in respect of this contract for the year were \$1,374,000 (2013: \$1,196,000). These costs are charged on an incurred basis.

The amount of transactions with related parties are:

21 CREDIT RATING

In July 2014 Standard & Poor's reaffirmed the Company's Insurer Financial Strength Rating of A+. This signifies the insurer "has strong financial security characteristics".

22 FINANCIAL SOUNDNESS

The Reserve Bank of New Zealand (RBNZ) awarded a full licence to the Company in February 2013 in line with the Insurance (Prudential Supervision) Act 2010.

for the year ended 30 June 2014

22 FINANCIAL SOUNDNESS (continued)

The minimum solvency capital the Company is required to retain under the Solvency Standard for Non-life Insurance Business issued by the RBNZ, is per the table below. The Company has adopted a formal capital management plan to maintain a strong capital base and satisfy capital adequacy standards as prescribed by APRA for the Australian branch and the RBNZ. Additional capital buffers of \$2 million (2013: \$2 million) for the Company and AUD \$1.35 million (2013: AUD \$1.35 million) for the Branch have been determined by the Directors as sufficient for maintaining financial soundness.

During the year the Company has complied with all externally imposed capital requirements.

Actual solvency capital at 30 June 2014 for the Australia branch was AUD \$7,540,239 (2013: AUD \$7,303,672) calculated in accordance with APRA requirements. Minimum solvency capital required to be retained by the Branch to satisfy APRA requirements is AUD \$5 million.

Solvency capital requirements for the Company is detailed below.

	2014	2013
	\$000	\$000
Minimum solvency capital	8,228	7,374
Actual Solvency capital	10,253	9,987
Solvency Margin	2,025	2,613

23 LEASE COMMITMENTS

The company entered into an agreement in August 2010 to lease new premises for 12 years commencing October 2010. The commitments under operating leases in respect of payments due to be made in the following years are:

	2014 \$000	2013 \$000
Within 1 year	381	370
Between 1 and 2 years	393	381
Between 2 and 5 years	1,271	1,223
Greater than 5 years	1,584	2,024
	3,629	3,998

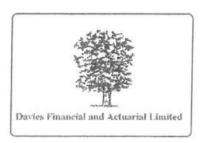

24 CAPITAL COMMITMENTS

The Company had no capital commitments at 30 June 2014 (2013: Nil).

25 CONTINGENT LIABILITIES

The Company has a standby letter of credit arrangement as a requirement of its merchant acquiring facility in Australia. The maximum value of this facility is \$200,000 Australian dollars. The letter of credit expires in January 2015 but has the ability to be extended annually (2013: \$200,000 Australian dollars).

The Company has a bank bond in place as a requirement of the lease agreement for the new premises. The maximum value of this bond is currently \$350,000 (2013: \$400,000) and it reduces in value on 1 October 2014 to \$300,000.

Appointed Actuary

Re:

Southern Cross Benefits Limited: Report as at 30th June 2014 under Sections 77 and 78 of the Insurance (Prudential Supervision) Act 2010

You have asked me to prepare this report in terms of the above sections of the Act, and I would like to comment further as follows:

- 1. I have reviewed the actuarial information included in the audited accounts for Southern Cross Benefits Limited as at 30th June 2014. "Actuarial information" includes the following:
 - claim provisions and unexpired risk / unearned premium provisions;
 - solvency calculations in terms of the RBNZ Solvency Standard;
 - balance sheet and other information allowed for in the calculation of the company's solvency position; and
 - disclosures regarding the methodology and assumptions used for calculating claim provisions, unexpired risk provisions, and other disclosures.

Telephone (09) 489-3551

2. No limitations have been placed on my work.

- I am independent with respect to Southern Cross Benefits Limited as defined 3. under professional standard ISA (NZ) 620 of the External Reporting Board.
- I have been provided with all information that I have requested in order to 4. carry out this review.
- 5. In my view the actuarial information contained in the financial statements has been appropriately included, and the actuarial information used in the preparation of the financial statements has been appropriately used.
- 6. The company (including its Australian branch) exceeded the minimum capital requirement of the RBNZ solvency standard for non-life insurers as at 30th June 2014, and is projected to exceed the minimum requirement at all times over the next three years.

I would be very happy to answer any queries concerning this report.

Yours sincerely

Independent auditor's report

To the shareholder of Southern Cross Benefits Limited

Report on the financial statements

We have audited the accompanying financial statements of Southern Cross Benefits Limited ("the company") on pages 4 to 32. The financial statements comprise the statement of financial position as at 30 June 2014, the statements of profit or loss and other comprehensive income, changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Directors' responsibility for the financial statements

The directors are responsible for the preparation of financial statements in accordance with generally accepted accounting practice in New Zealand that give a true and fair view of the matters to which they relate, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing (New Zealand). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the company's preparation of the financial statements that give a true and fair view of the matters to which they relate in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates, as well as evaluating the presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Our firm has also provided other services to the company in relation to general accounting and other services. Subject to certain restrictions, partners and employees of our firm may also deal with the company on normal terms within the ordinary course of trading activities of the business of the company. These matters have not impaired our independence as auditor of the company. The firm has no other relationship with, or interest in, the company.

Opinion

In our opinion the financial statements on pages 4 to 32:

- · comply with generally accepted accounting practice in New Zealand;
- give a true and fair view of the financial position of the company as at 30 June 2014 and
 of its financial performance and cash flows for the year then ended.

Report on other legal and regulatory requirements

In accordance with the requirements of sections 16(1)(d) and 16(1)(e) of the Financial Reporting Act 1993, we report that:

- · we have obtained all the information and explanations that we have required; and
- in our opinion, proper accounting records have been kept by Southern Cross Benefits Limited as far as appears from our examination of those records.
