STATUTORY AND OTHER DISCLOSURES

For the year ended 31 December 2012

This report is presented on the New Zealand Branch of SCOR Global Life SE for the year from 1 January 2012 to 31 December 2012. All comparative figures for 2011 cover the period from 30 November 2010 to 31 December 2011.

Branch offices are useful in that it allows the administrative aspect of the business to be conducted in locations around the globe, this type of entity is broadly used by the SCOR SE (the Group). The Life Insurance division of the Group, SCOR Global Life SE (the Company or SGL SE) main office is located in France. The New Zealand branch office is managed by its Chief Executive Officer who reports directly to, and take orders from, the Company's executive management. Branch offices enable the Group to conduct business in different locations in a cost effective manner, as well as cater to, and be more informed in, the needs of specific locations.

The New Zealand branch of SCOR Global Life SE includes and is limited to all the transactions of SCOR Global Life SE related to the New Zealand territory.

Principal activities

SCOR Global Life SE a body corporate incorporated in France, is registered on the New Zealand overseas company register to carry on business in this country, under Part XVIII of the Companies Act 1993. SGL SE was certified as an overseas Non-ASIC Company by the Registrar of Companies New Zealand on 30th November 2010, under Section 337[1] of the Companies Act 1993.

From March 2012, the Reserve Bank of New Zealand (RBNZ) took on the role of insurance regulator and industry supervisor. The Company was issued with a licence by the RBNZ to carry on insurance business in New Zealand under the new regime with effect from 8 March 2012.

The principal activity of SGL SE New Zealand branch (the Branch) during the year was the provision of life reinsurance services.

The Branch's current proposition includes reinsurance of group risk and bancassurance / retail risk business across the New Zealand market.

Operating and financial review

The Branch's net profit for the year after income tax is NZ\$ 0.448m.

The insurance sector operating environment now has an increasing level of regulatory requirements. At the beginning of the year, the Branch was granted its insurance license by the Reserve Bank of New Zealand to operate as a life reinsurer under the new prudential supervision regime. All insurers in the New Zealand market are required to hold a full license by 7 September 2013.

Expanding regulations adds cost to businesses but an enhanced regulatory environment improves the long term sustainability of the industry. The full licensing requirements are wide ranging, covering aspects such as corporate governance, risk management and financial condition. The licensing process required significant input from senior management.

2012 was a challenging year with substantial lift in compliance requirements. However, the branch's operations during the reporting year performed as expected and is in a strong position to deliver future growth and profitability.

STATUTORY AND OTHER DISCLOSURES

For the year ended 31 December 2012

Risk management

The Branch takes a proactive approach to risk management and provides regular reporting of any key issues or risks relating to the New Zealand business to the SCOR Group's Risk Management team.

Significant events after the balance date

In the interval between the end of the year and the date of this report no item, transaction or event of a material nature, likely to affect significantly the operations of the Branch or the state of affairs of the entity in future years has arisen.

Environmental regulation and performance

The Branch's operations in New Zealand are not regulated by any significant environmental regulation under a law of the Commonwealth or of a state or territory.

Indemnification and insurance of directors and officers

The Officers of the Company are covered by policies of directors' and officers' liability insurance which ensure that they will incur no monetary loss as a result of actions undertaken by them as officers of the Company provided they operate within the law.

No person has applied for leave of Court to bring proceedings on behalf of the Branch, or intervene in any proceedings against the Branch during the period.

Non-audit services provided by the Auditor (Ernst & Young - EY)

The Branch may decide to employ its auditor on assignments additional to their statutory audit duties, where the auditor's expertise and experience with the Branch is important.

The Board is satisfied that the provision of the non-audit services by the Branch auditor is compatible with the general standard of independence for auditors. The nature and scope of the non-audit service provided means that auditor independence was not compromised.

Rounding

The amounts contained in the financial report have been rounded to the nearest \$1,000 (where rounding is applicable) and where noted (\$'000).

For the year ended 31 December 2012

NOTE 1. General Information

SGL SE is a profit-oriented entity incorporated as a French overseas company, under the New Zealand Companies Act 1993, and operating in New Zealand as a Branch. The direct and ultimate parent of SGL SE is SCOR SE, a company incorporated in France and listed on the Euronext Paris.

The life reinsurance operations of the Branch comprise the selling and administration of contracts that are classified as life reinsurance contracts. Life reinsurance contracts involve the acceptance of significant insurance risk. The life reinsurance operations of the Branch consist solely of non-investment-linked business.

Non-investment-linked business is business in which a licensed entity issues a contract where the reinsured benefit is not directly linked to the market value of investments held. These benefits are payable on death, or on the occurrence of an insured event such as injury, illness or disability. The risk of the occurrence of the event, which crystallises the payment of the insured benefit, is borne by the reinsurer.

NOTE 2. Summary of Significant Accounting Policies

The principal accounting policies adopted in the preparation of the financial report are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

a) Basis of preparation

The financial statements have been prepared in accordance with generally accepted accounting practice in New Zealand (NZ GAAP) and the requirements of the Companies Act 1993 and the Financial Reporting Act 1993, on an ongoing concern basis. The financial statements comply fully with New Zealand Equivalents to International Financial Reporting Standards ('NZ IFRS'), and comply with International Financial Reporting Standards ('IFRS'), as appropriate for profit oriented entities.

The financial report is presented in New Zealand dollars and all values are rounded to the nearest thousand (\$000) unless otherwise stated.

b) Data

The Branch is dependent on the accuracy and timeliness of premium, in-force and claims data received from its ceding companies. The valuation of liabilities is mainly dependent on the data as provided by ceding companies.

c) Foreign currency translation

i. Functional and presentation currency

Items included in the financial statements of the entity are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The statements are presented in New Zealand dollars, which is the Branch's functional and presentation currency.

ii. Transactions and balances

Transactions in foreign currencies are initially recorded in the functional currency by applying the exchange rates ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the rate of exchange ruling at the reporting date. Foreign exchange gains and losses resulting from

For the year ended 31 December 2012

the settlement of such transactions (realised) and from the translation at year end exchange rates (unrealised) of monetary assets and liabilities denominated in foreign currencies are recognised in the profit and loss component of the statement of comprehensive income.

d) Early adoption of standards

The Branch has not elected to early adopt, in this financial report, any new standards, amendments or interpretations that are issued but not yet effective, including improvements to NZ IFRSs, for the year ended 31 December 2012.

These new standards and interpretations, when applied in future periods, are not expected to have a material impact on the financial position or performance of the Branch.

e) Specific Accounting Policies

i. Premium Revenue

Premiums are recognised as revenue on an accruals basis. A provision for unearned premiums is included in the actuarial valuation of liabilities. Outstanding premiums are included as an asset in the Statement of Financial Position.

ii. Investment Income

All investment income is recognised as revenue on an accruals basis. Consistent with the principles of fair value accounting for investment assets, movements in the valuation of investment assets are recognised in the Income Statement.

Interest income is brought to account on an accruals basis when the entity obtains the right to receive the interest income.

iii. Claims Recognition

Claims are recognised when the liability to the cedant under the reinsurance contract has been established or upon notification of the reinsured event.

Claims are treated directly as an expense when a liability to the cedant is established.

Reserves for claims incurred but not reported, claims reported but not admitted and claims considered likely to arise are included in the actuarial valuation of reinsurance contract liabilities.

iv. Expenses

All costs are charged to operating expenses as incurred.

All operating expenses in respect of life reinsurance contracts are apportioned between policy acquisition and policy maintenance expenses with regard to the objective when incurring the expense and the outcome achieved. Policy acquisition costs comprise the costs of acquiring new business and are expensed in the Income Statement. Maintenance costs are the fixed and variable costs of administering policies subsequent to sale. Investment management costs are the fixed and variable costs of managing investment funds. Maintenance and investment management costs are recognised in the Income Statement on an accrual basis.

For the year ended 31 December 2012

Policy Acquisition Costs

The actuary, in determining the life reinsurance contract liabilities, takes account of the deferral and future recovery of acquisition costs, which are capitalised by way of movement in life reinsurance contract liabilities, then amortised over the period in which they will be recoverable.

Where overall product profitability of new business written during the year is expected to support the recovery of acquisition costs incurred in that year, these costs are effectively deferred as an element of life reinsurance contract liabilities and amortised over the life of the policies written. Unamortised acquisition costs are a component of life reinsurance contract liabilities. Amortisation of acquisition costs is recognised in the Statement of Comprehensive Income as a component of net change in life reinsurance contract liabilities at the same time as policy margins are released.

Policy Maintenance Costs

Maintenance costs include all operating costs other than acquisition and investment management costs. These include general growth and development costs.

v. Cash and Cash Equivalents

For the purposes of the Statement of Financial Position and Statement of Cash Flows, cash and cash equivalents comprise cash on hand that is available on demand and deposits that are held at call with financial institutions. Cash and cash equivalents are measured at fair value, being the principal amount.

Statement of cash flows

The following are the definitions of the terms used in the statement of cash flows:

- (i) Operating activities include all transactions and other events that are not investing or financing activities.
- (ii) Investing activities are those activities relating to the acquisition, holding and disposal of property, plant and equipment and of investments.
- (iii) Financing activities are those activities relating to changes in the equity and debt structure of the Branch.

vi. Investments and other financial assets

Investments and financial assets in the scope of NZ IAS 39 Financial Instruments: Recognition and Measurement are categorised as either financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, or available-for-sale financial assets. The classification depends on the purpose for which the investments were acquired or originated. Designation is re-evaluated at each reporting date, but there are restrictions on reclassifying to other categories.

The Branch has determined that all assets held within the Branch are assets backing policy liabilities of the life reinsurance business. As these assets are managed on a fair value basis and are reported on this basis, they have been valued at fair value through profit or loss wherever the applicable standard allows.

Investments in financial assets are initially recognised at fair value determined as the purchase cost of the asset, exclusive of any transaction costs.

For the year ended 31 December 2012

Subsequent to initial recognition, the fair value of investments that are actively traded in organised financial markets are determined by reference to quoted market bid prices at the close of business on the reporting date. For investments with no active market, fair values are determined using valuation techniques. Such techniques include: using recent arm's length market transactions; reference to the current market value of another instrument that is substantially the same; discounted cash flow analysis; and option pricing models, making as much use of available and supportable market data as possible and keeping judgemental inputs to a minimum.

vii. Receivables

Receivables are recognised initially at fair value. Due to the short term nature of these assets the recoverable value, i.e. allowing for doubtful debts, will generally be the fair value. Receivables related to technical operations are recognised and carried at billed amount. No amounts have been provided for any uncollectible amounts. Interest income is brought to account on an accruals basis when the entity obtains the right to receive the interest income.

viii. Payables

These amounts represent liabilities for goods and services provided to the Branch prior to the end of the year which are unsettled. Payables are generally recognised at fair value.

ix. Life Reinsurance Contract Liabilities

Life reinsurance liabilities in the statement of financial position and the increase or decrease in policy liabilities in the Statement of Comprehensive Income have been calculated in accordance with the New Zealand Society of Actuaries Professional Standard No 3 – Determination of Life Insurance Policy Liabilities ('PS3'). Life reinsurance contracts are accounted for in accordance with the requirements of NZ IFRS 4 Insurance Contracts.

Life reinsurance contract liabilities are measured using the accumulation method. This methodology is used where the benefit is in the nature of an accumulation starting from the currently accumulated value and where expected future benefit growth and expected future investment income occur in the same time pattern.

Under an accumulation approach, the Policy Liability is equal to the current benefit accumulation less an amount representing the recoverable unrecouped portion of any Acquisition Costs (net of tax relief), subject to a minimum of the Best Estimate Liability. In determining the recoverable unrecouped portion of Acquisition Costs it will be necessary to use projection techniques, so as to reflect the incidence and amount of ongoing fees, surrender penalties and any other elements of a benefit associated with the recovery of Acquisition Costs. The surrender value is not an appropriate basis for the Policy Liability unless the surrender penalty equals the recoverable unrecouped portion of Acquisition Costs. An accumulation approach will cause Profit Margins to emerge as the excess of fee income over expenses and Acquisition Cost recovery amount in each period.

The measurement of life reinsurance contract liabilities is subject to actuarial assumptions. Assumptions made in the calculation of the life reinsurance contract liability at each reporting date are based on best estimates at that date. Best Estimate Assumptions must be made about the future cost of the risks accepted and services provided, including probabilities of occurrence, having regard to available statistical and other evidence subject to any requirements in PS3. The assumptions used in the calculation of the life reinsurance contract liabilities are reviewed at each reporting date. The assumptions should be reviewed against the entity's own experience and

For the year ended 31 December 2012

management practices, published information on industry experience and emerging trends (both in New Zealand, and where relevant, overseas) and professional standards. A summary of the significant actuarial methods and assumptions used is contained in NOTE 4.

x. Taxes

Current tax

Current income tax assets and liabilities for the current period are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the Statement of Financial Position balance date.

Deferred tax

Deferred tax is accounted for using the comprehensive balance sheet liability method in respect of temporary differences arising from differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax base of those items.

Deferred tax assets and liabilities are recognised for temporary differences at the tax rates which are expected to apply when the assets are recovered or liabilities are settled. The relevant tax rates are applied to the cumulative amounts of deductible and taxable temporary differences to measure the deferred tax asset or liability.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current income tax liabilities.

Deferred tax, including amounts in respect of life reinsurance contracts, is not discounted to present value.

Income tax expense

The income tax expense is the tax payable on taxable income for the current period, based on the income tax rate for each jurisdiction and adjusted for changes in deferred tax assets and liabilities attributable to temporary differences and unused tax losses.

For the year ended 31 December 2012

xi. Other Taxes

All revenues, expenses and certain assets are recognised net of goods and services taxes (GST) except where the GST is not recoverable. In these circumstances the GST is included in the related asset or expense. Receivables and payables are reported inclusive of GST. The net GST payable to or recoverable from the tax authorities as at balance date is included as a receivable or payable in the balance sheet.

xii. Allocation of Operating Results

All of the operating result is allocated to the Branch. There are no participating policy owners.

NOTE 3. Critical accounting estimates and judgements

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements and estimates on historical experience and on other various factors it believes to be reasonable under the circumstances, the result of which form the basis of the carrying values of assets and liabilities that are not readily apparent from other sources.

Actual results may differ from these estimates under different assumptions and conditions and may materially affect financial results or the financial position reported in future periods.

Policy liabilities arising from life reinsurance contracts are calculated at each reporting date using mathematical and statistical models. The valuations are prepared by appropriately qualified and experienced actuaries on the basis of internationally recognised actuarial methods set out in Professional Standards issued by the New Zealand Society of Actuaries, a full member of the International Actuarial Association. The methodology takes into account the risks and uncertainties of the particular classes of business written.

The key factors that affect the estimation of these liabilities are:

- · The cost of providing benefits and administering these contracts:
- · Mortality and morbidity experience on life reinsurance products;
- Persistency experience, which affects the entity's ability to recover the cost of acquiring new business over the lives of the contracts;
- Other factors such as regulation, competition, interest rates, the performance of the capital markets and general economic conditions affect the level of these liabilities.

The uncertainties surrounding these assumptions mean that it is likely that the actual observed claims incidence will vary from the liability estimated at the reporting date.

Further details of the nature of these assumptions and conditions may be found in the relevant notes to the financial statements.

NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS For the year ended 31 December 2012

NOTE 4. Summary of Significant Actuarial Methods and Assumptions

The effective date of the policy liabilities and solvency reserves calculation is 31 December 2012. The Appointed Actuary is satisfied as to the accuracy of the data from which the policy liabilities have been determined.

This note summarises the assumptions made and the methods adopted for the calculation of policy liabilities and solvency requirements.

The methods of valuation for the major product groups are as follows:

Product Group	Method
Individual Lump Sum Risk	Accumulation
Individual Disability Income	Accumulation

Systematic release of planned margin is achieved through the calculation of Deferred Acquisition Costs. Profit carriers are implicit in the Accumulation method used.

Claims assumptions have been based on pricing assumptions given the relatively undeveloped nature of the historic experience. Allowance for incurred but not reported claims, reported but not paid, disability income claims in the course of payment reserves and unearned premium reserves has been made.

Impact of Changes in Assumptions a)

There is no impact to the financial statements arising from changes in Actuarial assumptions.

b) Sensitivity Analysis

Assumption	Impact on Net Profit \$'000	Impact in Net Assets \$'000
10% Increase in Mortality and Morbidity	-648	-648
10% Increase in Lapses	0	0
10% Increase in Maintenance Expenses	0	0

For the year ended 31 December 2012

NOTE 5.	Investment	Income
---------	------------	--------

	2012	2011
	\$'000	\$'000
Financial Assets held at Fair Value through Statement of Comprehensive Income:		
- Fixed interest securities		
Interest income	33	40
Net unrealised (losses) / gains	(20)	26
Total Investment Income	13	66
NOTE 6. Other Revenue		
NOTE 6. Other Revenue	2040	
	2012	2011
V	\$'000	\$'000
Unrealised foreign exchange gains	48	-
Total Other Revenue		
Total Other Revenue	48	
NOTE 7. Operating Expenses		
NOTE IT Operating Expenses	2012	2011
	\$'000	\$'000
Policy Acquisition - Life Reinsurance Contracts		
- Commission expense	(65,388)	(32,265)
Policy Maintenance - Life Reinsurance Contracts		
- Management fee expense	(1,038)	(749)
Total Operating Expenses	(66,426)	(33,014)

For the year ended 31 December 2012

NOTE 8. Life Reinsurance Contract Liabilities

	2012	2011
	\$'000	\$'000
Opening balance At 1 January 2012	30,262	~
Outstanding Claims Reserves	(7,367)	(498)
Uneamed Premium Reserve	278	(680)
Deferred Acquisition Costs	57,281	31,440
Movement in Life Reinsurance Contract Liabilities	50,192	30,262
Closing Balance At 31 December 2012	80,454	30,262

For the year ended 31 December 2012

NOTE 9. Tax

The following income tax expense disclosures reflect the current and deferred tax positions on the results of the Branch for the year.

(a) Income tax expense	2012	2011
	\$'000	\$'000
Deferred tax assets	15,868	8,938
Deferred tax liabilities	(16,042)	(8,803)
Aggregate income tax (expense) / credit	(174)	135

(b) Numerical reconciliation of income tax to prima facie tax payable

A reconciliation of the differences between prima facie tax, calculated as 28% of the profit before income tax for the year and the actual income tax expense recognised in the Statement of Comprehensive Income for the year is as follows:

	2012	2011
	\$'000	\$'000
Profit / (Loss) before Income Tax	622	(482)
Tax at the New Zealand tax rate of 28%	(174)	135
Tax effect of non-taxable amounts	2	**
Tax effect of non-deductible amounts		-
Income tax (expense) / credit	(174)	135
Profit / (Loss) after Income Tax	448	(347)

For the year ended 31 December 2012

(c) Tax Losses

There are no unused tax losses for which a deferred tax asset has not been recognised.

(d) Taxation Basis

The principal elements for the calculation of the taxable income are as follows:

- Investment earnings made up of interest received
- (ii) Premiums Earned
- (iii) Other Income

The allowable deductions for each taxable class of business in New Zealand include:

- (i) Claim Payments
- (ii) Commissions
- (iii) General Management Expenses
- (iv) Other Expenses referable to the business

NOTE 16. Related Party Disclosures

The Directors of SCOR Global Life SE - New Zealand branch during the year were: a)

- · Denis KESSLER (Chairman of the Board of Directors)
- Julien CARMONA (resigned 1 October 2012)
- Paolo DE MARTIN
- Philippe TRAINAR
- Gilles MEYER (General Director)

For the year ended 31 December 2012

b) Ultimate Controlling Entity:

SGL SE is a profit-oriented entity incorporated as a French overseas company, under the New Zealand Companies Act 1993, and operating in New Zealand as a Branch. The direct and ultimate parent of SGL SE is SCOR SE, a company both domiciled and incorporated in France and listed on the Euronext Paris.

c) The following related party transactions occurred during the financial period:

For the year ended 31 December 2012

Economic Dependency

The Branch is reliant on SGL SE to provide all financial support to meet its business as usual commitments. It is also noted that the Branch fully relies on SGL SE to comply with the solvency requirements under the RBNZ "Solvency Standard for Life Insurance Business".

NOTE 17. **Events Subsequent to Balance Date**

In the interval between the end of the year and the date of this report no item, transaction or event of a material nature, likely to affect significantly the operations of the Branch or the state of affairs of the entity in future financial periods has arisen.

NOTE 18. Commitments and Contingent Liabilities

SCOR Global Life SE and its subsidiaries regularly take part in judiciary and arbitration procedures, within the normal framework of their activities. However, to the best of the knowledge of the Branch, there does not exist, on the date of approval of this financial statements, any litigation likely to have or have had in the recent past significant impact on the financial situation, the activity and operating results of the Branch.

NOTE 19. Risk Management

Risk Management Framework

Day to day management of the Branch is the responsibility of the Branch Chief Executive Officer (CEO) . The CEO recommends changes in the business, performance, goals, strategies and plans of the Branch. The CEO monitors aggregate risk data and make overall risk management decisions. The two risks with potentially the most serious outcomes are counter-party failure or inadequate capital funding. Both are deemed to be unlikely.

The Board has in place an integrated framework of controls designed to safeguard the Group's assets and interests and to ensure the integrity of its reporting.

Capital Risk Management

The Branch's main objective is to safeguard its ability to continue as a going concern, so that it can continue to provide returns and benefits for its stakeholders while maintaining the solvency requirements prescribed by the Prudential Standards.

Solvency requirements established by the RBNZ are in place to reinforce safeguards for policyholders' interests and primarily relate to the Branch's ability to meet future claims payments.

Solvency Information

The Branch adheres to the Solvency Standard for Life Insurance Business issued by the RBNZ in August 2011and guidance from the New Zealand Society of Actuaries ('NZSA')

Separate to policy liabilities recognised in the balance sheet, a life reinsurer shall disclose its regulatory solvency position.

For the year ended 31 December 2012

The Solvency Margin is designed to give a reasonable expectation that an entity has sufficient assets to:

- meet its obligations to existing policyholders, including appropriate allowances for future bonuses and to creditors under a range of adverse conditions; and
- meet its obligations to policyholders and creditors should all policies discontinue and current surrender values be paid.

These additional reserves provide a cushion against adverse experience in managing long-term risks.

At the request of the RBNZ the solvency returns for 2011 were re-submitted on the basis of the New Zealand Branch operating as a standalone entity. The solvency return at the half-year 2012 and the year end 2012 have been calculated on this same basis. The Branch's unaudited solvency return calculation results at 31 December 2012 were:

Solvency calculation results	2012	2011
	\$'000	\$'000
Actual Solvency Capital	853	500
Minimum Solvency Capital	821	302
Solvency Margin	31	198
	2012	2011
Solvency ratio	1.04	1.65

Financial Instruments Categories

As at the end of the reporting period, the Branch held the following financial instruments:

	2012	2011
	\$'000	\$'000
ASSETS		
Cash and Cash Equivalents	347	23
Financial Assets at fair value (through profit or loss)	506	526
Receivables	8,044	2,238
TOTAL ASSETS	8,897	2,787

For the year ended 31 December 2012

	2012	2011
	\$'000	\$'000
LIABILITIES		
Payables	88,430	33,005
Provisions		36
TOTAL LIABILITIES	88,430	33,041

Fair Value

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. Fair value of financial instruments traded in active markets is based on quoted market prices at balance date. The fair value of financial instruments that are not traded in an active market is determined using valuation techniques. Refer below for details of valuation methods used for each category of financial assets and liabilities.

Fair value hierarchy

The Branch uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1 – the fair value is calculated using quoted prices in active markets

Level 2 – the fair value is estimated using inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices)

Level 3 – the fair value is estimated using inputs for the asset or liability that are not based on observable market data

The fair value of the financial instruments as well as the methods used to estimate the fair value are summarised in the table below.

The Branch's exposure to market interest rates relates primarily to its investment in New Zealand Sovereign debt. At balance date, the Branch had the following financial assets exposed to New Zealand variable interest rate risk:

	2012	2011
Fixed Interest Investments - Quaoted market price (Level 1)	\$'000	\$'000
New Zealand Government Stock 6.50% 15APR2013	506	526

Concentration of Life Reinsurance Risk

The life reinsurance business of the Branch involves a number of non-financial risks concerned with the pricing, acceptance and management of the mortality, morbidity and longevity risks accepted from policyholders.

For the year ended 31 December 2012

Key objectives in managing insurance risk are:

- (i) To ensure sound business practices are in place for underwriting risks and claims management;
- (ii) To ensure solvency and capital requirements are met.

Insurance risks are controlled through the use of underwriting procedures and adequate premium rates and policy charges. Tight controls are also maintained over claims management practices to ensure the correct and timely payment of reinsurance claims.

The Branch aims to maintain a portfolio of policyholders with a broad spread of reinsurance risk types, ages, sexes, occupation classes and geographical locations for the individual and group risk business.

Credit Risk

Credit risk is the risk of loss in the value of financial assets due to counterparties failing to meet all or part of their obligations.

Credit risk arises from the financial assets of the Branch, which comprise cash and cash equivalents, receivables, and financial assets at fair value through profit and loss. The Branch trades only with recognised, creditworthy third parties, and as such collateral is not requested nor is it the Branch's policy to securitise its receivables.

Credit quality of financial assets

The Branch holds its Cash within two major banks and holds investment assets in New Zealand Sovereign debt, it has no other significant concentrations of credit risk.

Cash and cash equivalents are represented by current accounts with major Australian banks. The interest rate is variable and cash is available at call.

There were no financial assets that are past due or impaired at balance date (2011: Nil). The credit quality of financial assets that are neither past due nor impaired can be assessed by reference to external credit ratings (if available) or to historical information about counterparty default rates.

Equivalent Standard & Poor's Rating	2012	2011
- AA and above	\$'000	\$'000
Cash and Cash Equivalents	347	23
Financial Assets at fair value (through the Statement of Comprehensive Income)	506	526

The Branch has processes in place to ensure that services are performed for customers with an appropriate credit history and cash is held with financial institutions of high credit-worthiness.

Concentration of credit risk

Concentration of credit risk exists if a number of counterparties are engaged in similar activities and have similar economic characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic conditions.

For the year ended 31 December 2012

The concentration of credit risk on financial assets is generally the carrying amount, net of any provisions for doubtful debts.

Interest rate risk

Interest rate risk is the risk of loss to the Branch's earnings or capital arising from movements in interest rates, including; changes in the absolute levels of interest rates, the shape of the yield curve, the margin between different yield curves and the volatility of interest rates.

Management of the risks associated with investments undertaken by the Branch, including interest rate risk is subject to the relevant regulatory requirements.

Sensitivity Analysis

The following sensitivity analysis is based on the interest rate risk exposures in existence at the reporting date, at 31 December 2012, if interest rates had moved, as illustrated in the table below, with all other variables held constant, post tax profit and other comprehensive income would have been affected as follows:

Judgements of reasonably possible movements:

	2012	2011
Profit / (Loss) after Income Tax higher / (lower)	\$'000	\$'000
Change in interest rates of: + 1% (100 basis points)	-	5
- 1% (100 basis points)	-	(5)

The Branch does not hold any interest bearing financial liabilities.

Liquidity Risk

Liquidity risk is the risk that the Branch will encounter difficulties in meeting its debt obligations, or other cash outflows, as they fall due because of a lack of liquid assets or access to adequate funding on acceptable terms.

Prudent liquidity risk management requires the maintenance of sufficient cash and access to funding to meet current and future obligations of the Branch. The Branch manages liquidity risk by continuously monitoring forecast and actual cash flows.

INDEPENDENT AUDITOR'S REPORT

For the year ended 31 December 2012

Ernst & Young Centre 680 George Street Sydney NSW 2000 Australia GPO Box 2646 Sydney NSW 2001

Independent Auditor's Report To the Shareholder of SCOR Global Life SE

Report on the Financial Statements

We have audited the financial statements of the New Zealand branch of SCOR Global Life SE on pages 4 to 27, which comprise the statement of financial position of the New Zealand branch of SCOR Global Life SE as at 31 December 2012, and the income statement, statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

This report is made solely to the company's shareholder, as a body, in accordance with Section 19(3) of the Financial Reporting Act 1993. Our audit has been undertaken so that we might state to the company's shareholder those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the New Zealand branch of the company and the company's shareholder as a body, for our audit work, for this report, or for the opinions we have formed.

Directors' Responsibility for the Financial Statements

The directors are responsible for the preparation of the financial statements, in accordance with generally accepted accounting practice in New Zealand, and that give a true and fair view of the matters to which they relate and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing (New Zealand). These auditing standards require that we comply with relevant ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected, depend on our judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we have considered the internal control relevant to the New Zealand branch of the company's preparation of the financial statements that give a true and fair view of the matters to which they relate in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the New Zealand branch of the company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates, as well as evaluating the overall presentation of the financial statements.

We believe we have obtained sufficient and appropriate audit evidence to provide a basis for our audit opinion.

Other than in our capacity as auditor we have no relationship with or interest in the New Zealand branch of the company and group.

Partners and employees of our firm may deal with the New Zealand branch of the company on normal terms within the ordinary course of trading activities of the business of the New Zealand branch of the company.

Opinion

In our opinion, the financial statements on pages 4 to 27:

- ▶ comply with generally accepted accounting practice in New Zealand;
- comply with International Financial Reporting Standards; and
- give a true and fair view of the financial position of the New Zealand branch of SCOR Global Life SE as at 31 December 2012 and its financial performance and cash flows for the year then ended.

Report on Other Legal and Regulatory Requirements

In accordance with the Financial Reporting Act 1993, we report that:

- ▶ We have obtained all the information and explanations that we have required.
- ► In our opinion proper accounting records have been kept by the New Zealand branch of SCOR Global Life SE as far as appears from our examination of those records.

Ernst & Young 28 June 2013
