Annual Report

For the year ended 31 March 2013

This Annual Report includes the financial statements of Sentinel Assurance Company Limited (the Company) for the year from 1 April 2012 to 31 March 2013.

ANNUAL REPORT DISCLOSURES

The Company's sole shareholder, Sentinel Limited, has passed a resolution under section 211(3) of the Companies Act 1993 ("the Act") in order that the Company need not comply with section 211(1)(a) and (e) to (j) of the Act.

DIRECTORS

Directors of the Company who held office during the period were:

Christopher Laurence COON (resigned 20 December 2012)

Ian Robert HENDRY

Vaughan Keith UNDERWOOD (appointed 20 December 2012)

Brett Stephen WILSON (appointed 20 December 2012)

PRUDENTIAL SUPERVISION

Insurance companies in New Zealand are subject to a new supervisory regime. Companies are required to apply to the Reserve Bank of New Zealand (RBNZ) for a licence to operate, and will work through a transitional phase towards full compliance by 7 September 2013. The Company has been issued a provisional licence.

CAPTIVE OPERATIONS

The Company settled all Funeral Plan liabilities during the year and now only conducts negative equity insurance with other members of Seniors Money International Group.

STATUTORY INSURANCE FUND

The Company established a statutory fund on 31 March 2013 to record the life insurance business conducted pursuant to the Group Life Policies issued by the Company to fellow members of Seniors Money International group.

SOLVENCY

The Company is required to comply with the Solvency Standard for Captive Insurers Transacting Life Insurance Business issued by RBNZ in March 2013.

TERMINATION OF REINSURANCE

The Company has terminated its reinsurance treaties and now fully provides for the negative equity risk it has underwritten. This has arisen from the agreement between Hannover Re and the Group effective September 2012.

DIRECTORS' APPROVAL

For and on behalf of the board on 19 June 2013

Notes to the Financial Statements For the year ended 31 March 2013

1. STATEMENT OF ACCOUNTING POLICIES

REPORTING ENTITY AND BASIS OF PREPARATION

The reporting entity is Sentinel Assurance Company Limited (the Company), a wholly owned subsidiary of Sentinel Limited (Sentinel), a wholly owned subsidiary of Sentinel Money International Limited (the Parent or Group). Sentinel Assurance Company Limited is registered under the Companies Act 1993. The financial statements have been prepared in accordance with generally accepted accounting practice in New Zealand applying International Financial Reporting Standards (IFRS) including New Zealand equivalents (NZ IFRS) as appropriate for profit-oriented entities. The measurement base adopted is historical cost modified by application of NZ IFRS 4 explained further under specific accounting policies. The financial statements are presented in millions of New Zealand Dollars (NZD) rounded to three decimal places.

Seniors Money International Limited commenced business in February 2004. Principal activities of the Group are the provision of equity release loans and related financial services, initially in New Zealand, and subsequently on an international basis. The Company now only provides negative equity insurance to fellow members of the Group (captive insurer).

The financial statements have been prepared on the basis that the Company is a going concern.

SPECIFIC ACCOUNTING POLICIES

Financial assets and liabilities

Classification

The Company classifies financial instruments into the following categories: cash and cash equivalents, loans and receivables, NZ Government stock, trade and other payables. The classification depends on the purpose for which the assets and liabilities were acquired. Management determines the classification of its assets and liabilities at initial recognition.

Recognition

Financial assets and liabilities are recognised on the date the Company becomes party to the contractual provisions of the instrument.

Measurement

Fixed interest securities are held at fair value through profit and loss as they are financial assets backing life insurance and life investment liabilities and are measured on a basis that is consistent with the measurement of the liabilities as it reduces measurement inconsistency. Fair value is determined with reference to quoted prices. Gains and losses arising from the revaluation of investments are included as part of net investment income in the statement of comprehensive income. Loans and advances and other receivables are initially recognised at fair value and subsequently recorded at amortised cost including interest accrued. Provision is made against impaired loans. Trade and other payables are recognised in the statement of financial position at historical cost plus any interest or additional costs accrued to balance date.

Provisions

A provision is recognised when the Company has a present obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation. If material, provisions are determined by discounting the expected future cash flows at a rate that reflects current market rates and the risks specific to the liability.

Notes to the Financial Statements For the year ended 31 March 2013

1. STATEMENT OF ACCOUNTING POLICIES (continued)

Impairment

Financial assets

At each reporting date the Company assesses whether there is objective evidence that financial assets not carried at fair value through profit or loss are impaired. Financial assets are impaired when objective evidence demonstrates that a loss event has occurred after the initial recognition of the asset, and that the loss event has an impact on the future cash flows of the asset that can be reliably estimated. Evidence of impairment is reviewed on a specific asset basis.

INSURANCE CONTRACTS

Insurance and reinsurance products entered into by the Company are classified as either insurance contracts or investment contracts. Insurance contracts involve the acceptance of significant insurance risk. Insurance risk is significant when the benefits payable upon the occurrence of the insured event are significantly higher than the benefits payable upon surrender or maturity.

Investment contracts are contracts issued by the Company other than insurance contracts. For the purposes of these financial statements, holders of life insurance contracts and life investment contracts are referred to as policyholders.

Insurance contract liabilities

Insurance contract liabilities are calculated using the Margin on Services (MoS) methodology in accordance with New Zealand Society of Actuaries Professional Standard 3: Determination of Life Insurance Policy Liabilities and the requirements of NZ IFRS 4.

Profits are recognised over the life of the policies based on services provided, whereas losses are recognised immediately when they arise. Services used to determine profit recognition include the cost of expected claims, maintenance of policies, and investment management. Policy liabilities are generally determined as the present value of all future expected payments, expenses, taxes and profit margins reduced by expected future premiums and reinsurance recoveries.

Investment contract liabilities

Investment contract liabilities are accounted for as a financial liability and recognised at fair value. Movements in fair value are recognised through the statement of comprehensive income.

Income recognition

Interest and investment income

Interest income is recognised as it accrues. Investment income also includes realised and unrealised changes in the fair value of investments.

Premium and claims recognition

Insurance contracts are separated into risk and savings components. Premiums and claims related to risk contracts (or components) are recognised in the statement of comprehensive income as either income or expense. All other premiums and claims are recognised as increases or decreases to policy liabilities in the statement of financial position.

Premiums with a regular due date are recognised when the premium becomes due. Premiums with no due date are recognised on a cash basis. Surrenders are recognised when paid. Death and all other claims are recognised when the liability to the policyholder has been established.

Reinsurance

Reinsurance premiums and claims are recognised separately in the statement of comprehensive income when they become due and payable in accordance with the reinsurance agreements. Reinsurance recoveries, when they occur, are also recognised separately in the statement of comprehensive income. Profit shares are treated as a deduction from premiums. The present value of financial reinsurance arrangements, adjusted for any reinsurance recoveries, are recognised in the statement of financial position. Reinsurance reserve deposits and reinsurance recoveries are included, separately from policy liabilities in the statement of financial position.

Expenses

Life insurance expenses are categorised into policy acquisition, investment management and maintenance expenses. Policy acquisition expenses are the incremental and directly attributable costs related to the origination and issue of a policy, including commission. Investment management costs are those directly related to management of investments supporting the life insurance fund, whereas maintenance expenses include all other costs of the business including those related to administration of inforce policies. Policy acquisition costs are initially charged to the statement of comprehensive income, however, are effectively deferred over the life of the policy through inclusion in future profit margins. Interest expense is recognised in the statement of comprehensive income as it accrues.

Notes to the Financial Statements For the year ended 31 March 2013

1. STATEMENT OF ACCOUNTING POLICIES (continued)

Life insurance tax

Life insurers are subject to a special tax regime. These rules have been changed and take effect from 1 July 2010 subject to a 5 year transition period for inforce policies where the sum assured does not increase by more than 10% in each financial year. Under the new rules, premiums will be taxed when raised. This will bring forward the impost of taxation on the Company's business.

Under the new rules, calculations are required to reflect two bases: the shareholder base and the policyholder base. Income and deductions are recognised using ordinary tax principles with the addition of special rules to deal with the unique timing and allocation issues inherent with life insurance products.

Under the previous rules, two tax bases were maintained: the life office base which was subject to tax on investment income less expenses plus underwriting income, and the policyholder base which taxed benefits as they accrued to policyholders under the policies. The life insurer paid tax on the higher of the two bases at the company tax rate of 28%. The life insurer was able to use accumulated imputation credits generated in the life office base to meet any tax liability arising in the policyholder base. As the life insurer was taxed as proxy for the policyholder, returns to policyholders are exempt.

Goods and Services Tax (GST)

The Company's activities are exempt supplies for the purposes of GST. Accordingly, all items of income and expenditure are stated inclusive of GST.

Foreign currency transactions

Foreign currency transactions are translated to New Zealand currency at the exchange rate ruling at the date of the transaction. Amounts receivable and payable in foreign currency at balance date are translated at the rate at that date. Exchange differences arising from the translation of amounts payable and receivable in foreign currencies are recognised in the statement of comprehensive income.

Statement of Cash Flows

The statement of cash flows has been prepared using the direct approach modified by netting the cash flows associated with financing from Seniors Money International Limited.

New accounting standards and interpretations not yet adopted:

A number of new standards, amendments to standards and interpretations are not yet effective, and have not been applied in preparing these financial statements. None of these will have an effect on the financial statements of the Company, with the exception of:

NZ IFRS 9 Financial Instruments, effective for reporting periods beginning on or after 1 January 2015. The requirements of this standard represent a significant change from the existing requirements in NZ IAS 39 in respect of financial assets. The standard contains two primary measurement categories for financial assets: amortised cost and fair value, and eliminates the existing NZ IAS 39 categories of held to maturity, available for sale, and loans and receivables. A financial asset will be measured at amortised cost if it is held to collect contractual cash flows of principal and interest on specified dates. All other financial assets will be measured at fair value. The guidance in NZ IAS 39 in respect to the classification, measurement and recognition of financial liabilities is retained with the exception of the fair value option for certain financial liabilities and valuation of certain derivatives. These requirements are not expected to substantially change the way the Company currently measures and presents financial instruments. Detailed analysis of the new standard has yet to be performed.

NZ IFRS 13 Fair Value Measurement, effective for reporting periods beginning on or after 1 January 2013. This standard defines fair value, provides a framework of measuring fair value, and specifies disclosure required about fair value. This standard is unlikely to change the manner in which fair value is measured by the Company, however, it is likely to require additional disclosures in the notes to the financial statements.

In addition the International Accounting Standards Board (IASB) has published the Exposure Draft on Insurance Contracts in July 2010. The exposure draft proposes a comprehensive measurement approach for all types of insurance contracts issued by entities. The approach is based on the principle that insurance contracts create a bundle of rights and obligations that work together to generate a package of cash flows (premiums) and outflows (benefits and claims). In February 2013, the IASB issued current tentative decisions and changes since the Exposure Draft in 2010. Once the standard is released, impacts on the Company will be assessed.

Changes in accounting policies

NZ IFRS accounting policies have been consistently applied throughout the year.

Notes to the Financial Statements For the year ended 31 March 2013

2. USE OF ESTIMATES AND JUDGEMENT

The preparation of a financial report in conformity with NZ GAAP requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable in the circumstances, the results of which form the basis of judgements about the carrying values of assets and liabilities. Actual results may vary from estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

In particular, information about significant areas of estimation uncertainty and critical judgement in applying accounting policies that have the greatest effect on the amount recognised in the financial statements are described in the following areas:

Life insurance liabilities

Policy liabilities are determined by qualified actuaries using key assumptions and professional judgements. Key assumptions in determining policy liabilities are as follows:

Policy liabilities have been determined by Mr. Peter Davies B.Bus.Sc., FIA, FNZSA, a Fellow of the New Zealand Society of Actuaries. The Actuary is satisfied as to the nature and quality of the data. The assumptions used in the current year and sensitivities in respect of these assumptions are outlined below.

Solvency reserves have been set by the Directors. Refer Note 8 (e).

Funeral Plan liabilities are calculated as the accumulation of an interpolated scale from the premium at commencement to the projected sum insured at the end of year two.

The negative equity reserve is an accumulation of the previous year's liability, plus interest, plus a proportion of negative equity premiums earned during the year. This proportion equalled 3% for New Zealand (2012: -6%), 10% for Australia (2012: 6%), -1% for Ireland (2012: 11%) and 31% for Spain (2012: 55%).

The rate of accumulation has been affected by changes to the assumption for future interest rates applied by the Actuary.

Discount rate: 3.5% per annum (2012: 4.0%)

House inflation:

New Zealand: An initial 10% reduction, followed by growth of 1.5% per annum (2012: An initial 10% reduction, followed by growth of 2.5% per annum)

Australia: An initial 10% reduction, followed by growth of 1.0% per annum (2012: An initial 10% reduction, followed by

growth of 2.0% per annum)

Ireland and Spain: An initial 10% reduction, followed by growth of 1.0% per annum (2012: same)

Mortality: Realistic assumptions with mortality improvements (2012: same)

Early repayment:

New Zealand: 5% per annum (2012: 5%) Australia: 7% per annum (2012: 7%) Ireland: 1% per annum (2012: 1%) Spain: 1% per annum (2012: 1%)

The rate of accumulation is reviewed each year to ensure that the principles of NZ IFRS 4 are being adhered to, noting that small variations in assumptions can have a magnified impact on the emergence of profit.

Interest margin over cost of funds:

 New Zealand
 1,71% (2012: 1,93%)

 Australia
 1,65% (2012: 1,49%)

 Ireland
 1,41% (2012: 2,25%)

 Spain
 1,76% (2012: 2,72%)

Notes to the Financial Statements For the year ended 31 March 2013 \$ millions

2. USE OF ESTIMATES AND JUDGEMENT (Continued)

Sensitivity analysis

The impact of changes in key outstanding claims variables are summarised below. Each change has been calculated in isolation of the other changes and each change shows the relevant impact assuming that there is no change to the other variables.

The net impact on the policy liabilities given the following changes:

	Change in best estimate liability		liability
	Variable change	2013	2012
Discount rate	+1%	7.290	4.450
	-1%	(7.730)	(3.960)
Client interest rate	+1%	40.640	51.960
	-1%	(7.770)	(15.870)
Change in property values	+10%	19.500	20.810
	-10%	(11.610)	(13,080)
House inflation	+1%	38.210	43.540
	-1%	(19.420)	(26.490)
Mortality	+10%	1.620	0.220
	<i>-</i> 10%	(1.180)	0.370
Early repayment	+1%	8.340	6.010
	-1%	(9.180)	(6.260)

The impact on the best estimate liability will result in an opposite impact on the statement of comprehensive income less amounts absorbed within future profit margins.

Balance at beginning of year	0,156	0.180
Withdrawals	(0.153)	(0.028)
Increase in liabilities recognised in the statement of comprehensive income	(0.003)	0.004
Balance at end of year	0.000	0.156
8. (d) SOURCES OF PROFIT		
The profit for the year has originated as follows:		
Surplus arising from experience	11.778	7.332
Investment contract surplus	0.004	0.022
Interest on assets in excess of policy liabilities	0.578	(0.313)
Total	12.360	7.041

Notes to the Financial Statements For the year ended 31 March 2013 \$ millions

8. (e) SOLVENCY POSITION

The Company has adopted the Solvency Standard for Captive Insurers Transacting Life Insurance Business issued by the Reserve Bank of New Zealand in March 2013. The standard requires licensed insurers to hold minimum capital of \$5 million and to also maintain a solvency margin of at least zero for each life fund. Solvency margin is the excess of actual solvency capital over minimum solvency capital.

Ashard and annual and the	2013	2012
Actual solvency capital Capital Deductions from capital:	41.857	29.497
Inadmissable related party receivables (reduced by related party liabilities)	0.000	(46.466)
Actual solvency capital	41.857	(16.969)
Minimum solvency capital		
Insurance risk charge	1.388	3.848
Catastrophe risk charge	0.000	0.000
Asset risk charge	22.349	3.332
Total solvency requirement	23.737	7.180
Total policy and other liabilities	22.775	21.230
Minimum solvency capital Solvency surplus	5.000 36,857	5.000 (21.969)

In the 2012 year the Company applied the Solvency Standard for Life Insurers issued in August 2011. The Company did not achieve the minimum capital requirement of \$5 million as the standard did not allow loan assets due from related party entities to be recognised. The Company is now required to meet the requirements of the Captive life insurer standard which allows related party assets to be included for solvency purposes.

8. (f) SENIORS MONEY LOAN SHORTFALL STATUTORY FUND

The Company established the Seniors Money Loan Shortfall Statutory Fund on 31 March 2013 to record the life insurance business conducted pursuant to the Group Life Policies issued by the Company to fellow members of the Group. This fund comprises all of the assets and liabilities of the Company. Distributions from the statutory fund are subject to advice from the Company's Actuary. No profit is attributed to the statutory fund, as it was established on the last day of the financial year.

9. NZ GOVERNMENT STOCK

The Public Trust holds the statutory insurance deposit on behalf of the Company: \$0.500 million 6% New Zealand Government stock, maturity 15 April 2015 (2012: same),

10. RELATED PARTIES

The Company works with the Group members to optimise capital allocation and usage of funding facilities. This leads to the flow of funds between the companies as needs dictate. Intercompany balances may be settled net.

Notes to the Financial Statements For the year ended 31 March 2013 \$ millions

10. (a) TRANSACTIONS WITH OTHER GROUP ENTITIES

Related party transactions include transactions with other companies in the Group. The Company has entered into a number of transactions with related parties in the normal course of business. A summary of related party transactions during the period and outstanding balances at the statement of financial position date were as follows:

	2013	2012
Premium income - Seniors Money International Limited	6.246	6.473
Premium income - Sentinel Finance Limited	5.315	5.398
Premium income - Australian Seniors Finance Pty Limited	7.076	7.095
Interest income - Australian Seniors Finance Pty Limited	1,199	1.079
Interest income - Seniors Money International Limited	0.418	0.431
Interest income - Sentinel Finance Limited	0.870	0.707
Management fee expense - Seniors Money International Limited	0.938	0.734
Management fee expense - Seniors Money International (Europe) Limited	0.690	0.594
Other expenses paid to Sentinel Limited	0.000	0.025
No-neg profit share - Australian Seniors Finance Pty Limited	1.695	1.779
Commission expense - Seniors Money International Limited	1.874	1,942
Commission expense - Sentinel Limited	1.594	1.619
Commission expense - Australian Seniors Finance Pty Limited	2.123	2.129
NNEG insurance claim expense - Seniors Money International Limited	0.154	0.000
NNEG insurance claim expense - Sentinel Finance Limited	0.014	0.000
Receivable from Seniors Money International Limited	20.344	16.354
Receivable from Sentinel Finance Limited	19.905	15,340
Receivable from Australian Seniors Finance Pty Limited	23.835	18.464

The Company is owned by Sentinel Limited which is owned in turn by Seniors Money International Limited, (the Parent), a company incorporated in New Zealand. Sentinel Limited promotes and sells equity release loans to seniors in New Zealand. The Company insures the 'negative equity' risk provided by Sentinel Limited, Australian Seniors Finance Pty Limited and the Parent to their customers. Sentinel Finance Limited, a fellow subsidiary, is involved in the ownership and financing of the loans to customers in New Zealand.

The Parent has subsidiary operations in Australia, Ireland and Spain. The net costs associated with the negative equity insurance for the Ireland and Spanish subsidiaries is carried by the Parent. The receivable due by the Parent to the Company is the accumulated net cost of the risk cover.

The Company works with members of the Parent's group to optimise capital allocation and usage of funding facilities. This leads to the flow of funds between the companies as needs dictate. Intercompany balances may be settled net. The amount due will not be settled until the related parties have surplus cash flows.

Group companies have financed their operations with debt provided by the Commonwealth Bank of Australia (CBA). The CBA banking facilities were extended during the year for an additional 7 years through to 30 September 2019.

10. (b) TERMINATION OF REINSURANCE TREATIES

During June 2012, the Group and Hannover Re agreed to terminate the reinsurance treaties and settle the reinsurance debt for payment of \$8.1 million. This was settled in September 2012,

Hannover Re has no remaining liabilities or obligations in relation to the reinsurance treaties and the Company has no continuing obligation to pay reinsurance premiums. Consequently the Company has received no benefit in relation to reinsurance of negative equity risk. The Company has reversed all reinsurance premiums due to Hannover Re under the treaties since their inception in 2004 and 2005 amounting to \$3.724 million. This amount has been deducted from the deficit accounts held by Sentinel Finance Ltd of \$1.790 million, Australian Seniors Finance Pty Ltd \$1.421 million and the Parent \$0.513 million.

Notes to the Financial Statements

For the year ended 31 March 2013

11. CASH FLOW RECONCILIATION	2013	2012
Profit for the year	12.360	7.041
Unrealised loss on NZ Government stock	0.006	0.024
Unrealised foreign currency loss	1.578	2.782
Claims expense	0.168	0.000
Increase in policy liabilities	1.698	1.850
Commission	5.591	5.690
Contribution to Group operating expenses	1.628	1.353
NNEG profit share	1.695	1,779
Reversal of net reinsurance premiums	(3.570)	0.696
Withdrawals	(0.153)	(0.028)
Interest from related parties	(2.487)	(2.217)
NNEG premium income	(18.637)	(18.966)
Net Cash from Operating Activities	(0.123)	0.004

12. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

Exposure to financial risk arises in the normal course of the Company's business. The Company's risk management strategy and policies are set by the Parent's board of directors and monitored through its audit committee. The main categories of financial risk identified by the Company are credit, insurance and treasury, which are explained below.

Credit risk

Credit risk arises on negative equity premium receivables due from Group members. Any claims payable in the future will be first applied against unpaid premiums.

The maximum credit risk exposure to the Company is the carrying value of the assets reported in the statement of financial position.

Insurance risk

Insurance risk is the risk of loss pursuant to an insurance contract. The Group provides a 'no negative equity' guarantee to its customers. This is underwritten by the Company.

The Company manages this risk through establishment of reserves sufficient to meet anticipated claims along with prudential margins to cover unfavourable experience.

The Company has instituted normal insurance management disciplines to ensure insurance risk is properly managed, including asset/liability matching, solvency and capital adequacy.

The insurance reserves as recorded in the statement of financial position should be greater than the likely incidence of claims, however, the maximum risk exposure to the Company is the value of the equity release loans written by the Group: \$1,270 million (2012: \$1,309 million).

Interest rate risk

Interest rate risk is the risk of loss arising from exposure to adverse changes in interest rates. Interest on loans to Group companies is set quarterly.

Liquidity risk

Liquidity risk is the risk the Company is not able to meet its financial obligations as they arise. This relates principally to policy liabilities and is managed via maturity and withdrawal analysis matched with the assets of the Company.

Foreign currency risk

Foreign currency risk is the risk of loss arising from changes in exchange rates. The Company's transactions are primarily carried out in New Zealand dollars. Its exposure to foreign exchange risk arises through its transactions with overseas operations including Australia and Ireland. The Company's functional currency is NZD. The Company has elected not to hedge the transactions in these operations thereby accepting the foreign currency translation risk. The effect of a 5% change in the NZD against the foreign currencies is approximately \$2.21 million based on the 2013 balances (2012: \$1.74 million).

Fair value of financial instruments

The carrying value of the Company's financial instruments approximates their fair values on the basis that they either reprice to market rate, are due to be settled within three months or are carried at fair value.

Notes to the Financial Statements For the year ended 31 March 2013 \$ millions

12. FINANCIAL RISK MANAGEMENT (continued)

The Company measures fair values using the following hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: Quoted market price from an active market for an identical instrument.
- Level 2: Valuation techniques based on observable inputs, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Valuation techniques using significant unobservable inputs.

The fair value of NZ Government stock is determined by reference to quoted prices (level 1). Investment contract liabilities comprised of Funeral Plans. Funeral Plan liabilities are calculated as the accumulation of an interpolated scale from the premium at commencement to the projected sum insured at the end of year two (level 3). All outstanding Fureral Plans were settled during the current financial year.

The table below depicts the maturity profile of all financial assets and liabilities categorised by contractual dates. The maturity profile of insurance contracts and reserves is determined by the occupation term of the property used as security for the equity release loans, which in turn is related to how long people will live and remain in their residence. These factors are assessed by the Group's actuaries. Estimates indicate that the insurance cover on new loans have an average life of 11 years while the insurance cover on individual loans could extend beyond 30 years. The maturity profile of insurance contract liabilities ceded and insurance contract reserves is the discounted value.

Maturity	profile:
2013:	

2013:	Up to	One to	Over five	
	One Year	Five Years	Years	Total

	0.000	0.000	31.879	31.879

Notes to the Financial Statements For the year ended 31 March 2013 \$ millions

12. FINANCIAL RISK MANAGEMENT (continued)

The following table summarises the Company's exposure to interest rate risk relating to all financial assets and liabilities. Financial assets and liabilities are included at carrying amount, categorised by the earlier of contractual repricing or maturity dates.

Interest rate repricing:

2013:	Non-				
	Up to	One to	Over five	interest	
	One Year	Five Years	Years	bearing	Total
Asset class				-	
Cash and cash equivalents	0.007	0.000	0.000	0.000	0.007
NZ Government stock	0.000	0.541	0.000	0.000	0.541
Sentinel Finance Limited	19.905	0.000	0.000	0.000	19.905
Australian Seniors Finance Pty Limited	23.835	0.000	0.000	0.000	23.835
Seniors Money International Limited	20.344	0.000	0.000	0.000	20.344
Insurance contract liabilities ceded	0.000	0.000	0.000	0.000	0.000
	64.091	0.541	0.000	0.000	64,632
Liability class					
Insurance contract reserves	0.000	0.000	0.000	22,775	22.775
Investment contract liabilities	0.000	0.000	0.000	0.000	0.000
	0.000	0.000	0.000	22.775	22.775

An increase in interest rates of 1% from the effective rate at year end would increase the Company's comprehensive income and equity by \$0.646 million for the succeeding 12 months. A reduction would have the opposite effect.

2012:				Non-	
	Up to	One to	Over five	interest	
	One Year	Five Years	Years	bearing	Total
Asset class				-	
Cash and cash equivalents	0.022	0.000	0.000	0.000	0.022
NZ Government stock	0.000	0.547	0.000	0.000	0,547
Sentinel Finance Limited	15.340	0.000	0.000	0.000	15.340
Australian Seniors Finance Pty Limited	18.464	0.000	0.000	0.000	18.464
Seniors Money International Limited	16.354	0.000	0.000	0.000	16.354
Insurance contract liabilities ceded	0.000	0.000	0.000	10.615	10.615
	50.180	0.547	0.000	10.615	61.342
Liability class					
Insurance contract reserves	0.000	0.000	0.000	31,689	31.689
Investment contract liabilities	_ 0.156	0.000	0.000	0.000	0.156
	0.156	0.000	0.000	31.689	31.845

An increase in interest rates of 1% from the effective rate at year end would increase the Company's comprehensive income and equity by \$0.506 million for the succeeding 12 months. A reduction would have the opposite effect.

Capital management

The Company works with Group members to optimise capital allocation and the usage of funding facilities. The Company's capital includes share capital, retained earnings and reserves, Specific solvency requirements apply to the Company, explained in Note 8(e).

Notes to the Financial Statements For the year ended 31 March 2013 \$ millions

13. CONTINGENT LIABILITIES

The Company has no contingent liabilities at 31 March 2013 (2012; \$nil).

14. CAPITAL COMMITMENTS

The Company has no capital commitments at 31 March 2013 (2012: \$nil).

15. EVENTS SUBSEQUENT TO BALANCE DATE

There are no events subsequent to balance date which require adjustment or disclosure in the financial statements.

Independent auditor's report

To the shareholder of Sentinel Assurance Company Limited

Report on the financial statements

We have audited the accompanying financial statements of Sentinel Assurance Company Limited ("the company") on pages 5 to 21. The financial statements comprise the statement of financial position as at 31 March 2013, the statements of comprehensive income, changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Directors' responsibility for the financial statements

The directors are responsible for the preparation of financial statements in accordance with generally accepted accounting practice in New Zealand that give a true and fair view of the matters to which they relate, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing (New Zealand). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the company's preparation of the financial statements that give a true and fair view of the matters to which they relate in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates, as well as evaluating the presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Our firm has also provided other services to the company in relation to other assurance services. Partners and employees of our firm may also deal with the company on normal terms within the ordinary course of trading activities of the business of the company. These matters have not impaired our independence as auditor of the company. The firm has no other relationship with, or interest in, the company.

Opinion

In our opinion the financial statements on pages 5 to 21:

- comply with generally accepted accounting practice in New Zealand;
- give a true and fair view of the financial position of the company as at 31 March 2013 and of its financial performance and cash flows for the year then ended.

Report on other legal and regulatory requirements

In accordance with the requirements of sections 16(1)(d) and 16(1)(e) of the Financial Reporting Act 1993, we report that:

- we have obtained all the information and explanations that we have required; and
- in our opinion, proper accounting records have been kept by Sentinel Assurance Company Limited as far as appears from our examination of those records.

Appointed Actuary

Re: Sentinel Assurance Company Limited: Report as at 31st March 2013 under Sections 77 and 78 of the Life Assurance (Prudential Supervision) Act 2010

You have asked me to prepare this report in terms of the above sections of the Act, and I would like to comment further as follows:

- 1. I have reviewed the actuarial information included in the audited accounts for Sentinel Assurance Company Limited as at 31st March 2013. õActuarial informationö includes the following:
 - policy liabilities;
 - solvency calculations in terms of the RBNZ Solvency Standard;
 - balance sheet and other information allowed for in the calculation of the companyøs solvency position; and
 - disclosures regarding the methodology and assumptions used for calculating policy liabilities, and other disclosures.
- 2. No limitations have been placed on my work.
- 3. I am independent with respect to Sentinel Assurance Company Limited as defined under professional standard ISA (NZ) 620 of the New Zealand Institute of Chartered Accountants.
- 4. I have been provided with all information that I have requested in order to carry out this review.

- 5. In my view the actuarial information contained in the financial statements has been appropriately included, and the actuarial information used in the preparation of the financial statements has been appropriately used.
- As at 31st March 2013, Sentinel Assurance Company Limited met the 6. solvency requirements of the RBNZøs solvency standard for captive insurers transacting life insurance business. With the funeral policies all having been surrendered, the company now qualifies as a ocaptiveo.

The company is expected to meet the solvency requirements at all times over the next three years.

Telephone (09) 489-3551

I would be very happy to answer any queries concerning this report.

Yours sincerely

Peter Davies B.Bus.Sc., FIA, FNZSA

Appointed Actuary
