Cash flows from operating activities	7,120	(11,003)

The above consolidated statement of cash flows should be read in conjunction with the accompanying notes.

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

1. General information

Fidelity Life Assurance Company Limited ('Fidelity Life') (the 'Company') and its subsidiaries (together called the 'Group') are financial services companies that provide insurance and investment management services. The Company and its subsidiaries are for-profit entities.

The Company is a limited liability company incorporated and domiciled in New Zealand. The address of its registered office is 81 Carlton Gore Road, Newmarket, Auckland, New Zealand.

These consolidated financial statements have been approved for issue by the Board of Directors (the 'Board') on 9 September 2020. The directors do not have the power to amend the consolidated financial statements once issued.

2. Summary of significant accounting policies

Basis of preparation

The consolidated financial statements have been prepared on the historical cost basis, modified by the revaluation of certain assets and liabilities as stated.

The functional and presentation currency of the Group is New Zealand dollars. All values in the consolidated financial statements and notes are rounded to the nearest thousand (\$'000), except when otherwise indicated.

Statement of compliance

The consolidated financial statements of the Group have been prepared in accordance with Generally Accepted Accounting Practice ('GAAP'). They comply with New Zealand Equivalents to International Financial Reporting Standards ('NZ IFRS') and authoritative notices that are applicable to entities that apply NZ IFRS. The consolidated financial statements also comply with International Financial Reporting Standards ('IFRS').

The Company is registered under the Companies Act 1993 and licensed under the Insurance (Prudential Supervision) Act 2010 ('IPSA'). The consolidated financial statements of the Group have been prepared in accordance with the requirements of the Financial Markets Conduct Act 2013.

Statutory fund

IPSA requires that a life insurer keep at least one statutory fund in respect of its life insurance business. The Company has established one statutory fund 'Fidelity Life Statutory Fund Number 1' (the 'Statutory Fund'). The activities of the Statutory Fund are reported in aggregate with non-statutory fund amounts in these consolidated financial statements. For details of the Statutory Fund refer to note 31.

Principles of consolidation

Subsidiaries are all entities controlled by the Group. Control is achieved when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

In preparing the consolidated financial statements, all intra-group transactions, balances, income and expenses have been eliminated.

Foreign currency translation

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated income statement.

Goods and Services Tax (GST)

The consolidated income statement and the consolidated statement of cash flows have been prepared so that the components are stated exclusive of GST. All items in the consolidated statement of financial position are stated net of GST, with the exception of receivables and payables, which include GST invoiced.

Accounting policies

Accounting policies that summarise the measurement basis used and that are relevant to the understanding of the consolidated financial statements are provided throughout the accompanying notes. The accounting policies adopted have been applied consistently throughout the periods presented in these consolidated financial statements.

a) New and amended standards adopted by the Group

A new standard NZ IFRS 16 Leases became applicable in the current reporting period which has led to the Group having to change its accounting policies. The Group has elected the modified retrospective approach for transition which recognises a cumulative adjustment in opening retained earnings without restating the comparative figures as a result of adopting the following standard:

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

2. Summary of significant accounting policies (continued)

a) New and amended standards adopted by the Group (continued)

Adjustments recognised on adoption of NZ IFRS 16 Leases

On adoption of NZ IFRS 16 Leases, the Group recognised lease liabilities in relation to leases which had previously been classified as 'operating leases' under the principles of NZ IAS 17 Leases. These liabilities were measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate as of 1 July 2019. The Group's weighted average incremental borrowing rate applied to the lease liabilities on 1 July 2019 was 4.39%.

	2019 \$'000
Operating lease commitments disclosed as at 30 June	644
Discounted using the lessee's incremental borrowing rate at the date of initial application	610
Add: Adjustment using updated lease term and amount	36
Lease liability recognised as at 1 July	646
Of which are:	
Current lease liabilities	247
Non-current lease liabilities	399
	646

The associated right-of-use assets were measured at an amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognised in the balance sheet as at 30 June 2019. There were no onerous lease contracts that would have required an adjustment to the right-of-use assets at the date of initial application. Please refer to note 16 for the details of recognised right-of-use assets.

The total impact on the Group's retained earnings as at 1 July 2019 is as follows:

	2019 \$'000
Closing retained earnings 30 June - NZ IAS 17	246,205
Difference between right-of-use assets and lease liabilities taken to retained earnings	(17)
Increase in deferred tax assets relating to retained earnings adjustment	5
Adjustment to retained earnings from adoption of NZ IFRS 16 on 1 July 2019	(12)
Opening retained earnings 1 July - after NZ IFRS 16 restatement	246,193

Practical expedients applied

In applying NZ IFRS 16 for the first time, the Group has used the following practical expedients permitted by the standard:

- the use of a single discount rate to a portfolio of leases with reasonably similar characteristics;
- reliance on previous assessments on whether leases are onerous;
- the accounting for operating leases with a lease term of less than 12 months as short-term leases; and
- the use of hindsight in determining the lease term where the contract contains options to extend or terminate the lease.

b) Impact of standards issued but not yet applied by the Group

NZ IFRS 17: Insurance Contracts

This standard establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts that fall within the scope of the standard. NZ IFRS 17 is mandatory for the Group's consolidated financial statements and is expected to apply for periods beginning on or after 1 July 2023. It will replace the current standard, NZ IFRS 4: Insurance Contracts. The Group is still assessing the impact on the Group's results.

Critical accounting estimates and judgements

Preparation of the consolidated financial statements requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from these estimates. Estimates and associated assumptions are based on historical experience and other factors, as appropriate to the particular circumstances. The Group reviews the estimates and assumptions on an ongoing basis.

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

2. Summary of significant accounting policies (continued)
Critical accounting estimates and judgements (continued)

Areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are shown below:

(a) Life insurance and life investment contract assets and liabilities

Liabilities and assets arising from life insurance, and related reinsurance, and life investment contracts are calculated at each reporting date using mathematical and statistical models. These policyholder liabilities and asset valuations are made by suitably qualified members of the New Zealand Society of Actuaries on the basis of actuarial methods set out in Professional Standards issued by the New Zealand Society of Actuaries, a full member of the International Actuarial Association. The methodology takes into account the risks and uncertainties of the particular classes of business written.

The key factors that affect the calculation of these liabilities and assets are:

- The cost of providing benefits and administering these contracts;
- Mortality and morbidity experience on life insurance products;
- Persistency (or discontinuance) experience, which affects the Group's ability to recover the cost of acquiring new business over the lives of the contracts;
- Long term interest rates which affect the rate at which cash flows are discounted; and
- Other factors such as regulation, competition, the performance of the capital markets and general economic conditions.

Actual experience will vary from the policyholder liabilities and assets calculated at the reporting date.

Refer to note 3 for more detail on the valuation of the policyholder liabilities and assets and the assumptions applied.

(b) Deferred tax

Significant judgement is required in determining the Group's deferred tax liabilities and tax assets. In arriving at the deferred tax amounts, the Group has made an assessment of anticipated tax assets and liabilities based on estimates of when additional taxes will be due and benefits will arise. In respect of deferred tax on carried forward tax losses, this has included an assessment of the likelihood of future taxable profits arising in the foreseeable future and of shareholder continuity being maintained during that period.

Where the expected tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the reported profit or loss and current and deferred tax amounts in the period in which such determination is made.

Refer to note 8 for the deferred tax accounting policy.

(c) Reinsurance recapture

During the year, the Group reached an agreement with a reinsurer to take back the risks initially ceded to the reinsurer within a reinsurance arrangement. The key commercial terms and risks transferred were determined to be agreed with the reinsurer on 30 June 2020 with the risk transfer effected as at 31 March 2020. In the consolidated income statement, the settlement of the recapture has led to the recognition of reinsurance recapture contract income of \$8.1 million in "other income" and a loss of \$7.3 million in relation to "net change in life insurance contract assets". In the consolidated statement of financial position, the recapture has led to the recognition of \$6.3m of "assets arising from reinsurance contracts" and the de-recognition of \$7.3m of "life insurance contract liabilities ceded under reinsurance". The transaction did not have a material impact on total profit after tax and the other financial impacts of the recapture were deemed immaterial to the financial statements for the year ended 30 June 2020.

There were judgements applied by the Group in relation to the timing of recognition of the transaction and associated disclosures in the financial statements, given the absence of a formal written agreement at balance date. Due to the lack of explicit guidance in NZ IFRS 4 Insurance Contracts, the Group followed the guidance in NZ IFRS 4 dealing with portfolio transfers and recognised the transaction on the date that control over the recaptured book was transferred to the Group (determined to be 30 June 2020).

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

2. Summary of significant accounting policies (continued)
Critical accounting estimates and judgements (continued)

Significant changes during the year

The financial position and performance of the Group was affected by the following events during the year:

COVID-19 global pandemic

In March 2020, the World Health Organisation designated COVID-19 to be a pandemic, threatening the health and well-being of a large number of people across multiple countries. The global outbreak has caused escalating levels of societal uncertainty. In response to the pandemic, New Zealand entered a Government-directed 'Alert Level 4' lockdown at 11:59pm on 25 March 2020. The Government's Alert Level system dictates the level of business activity and societal interaction that can take place. At Alert Level 4, the highest alert level, strong border restrictions were put in place with only essential services permitted to trade. People were required to remain at home, venturing out only to access the most essential goods and services. At 11:59pm on 27 April 2020 New Zealand moved down to Alert Level 3 under which regional travel was allowed and some businesses, including construction and food retailing, were permitted to operate as long as strict social-distancing practices were adopted. At 11:59pm on 13 May 2020, the country moved down to Alert Level 2, making a significant step towards pre-pandemic normality. Under Alert Level 2 national travel was allowed, schools re-opened and businesses were able to trade, albeit restrictions remained in place around social-distancing and mass gatherings and contact tracing measures were required to be followed. On 8 June 2020 the Government announced that there were no active COVID-19 cases and the country moved down to Alert Level 1 at 11:59pm on the same day, lifting all restrictions apart from border control measures. Please refer to note 29 for details on how COVID-19 has impacted the business post-balance date.

While the Group's business activities were deemed to be essential services during the lockdown period, meaning it could continue to operate, it continued to be impacted by the economic turmoil associated with the COVID-19 pandemic; including wide-ranging and severe impacts upon financial markets and the Reserve Bank's Official Cash Rate.

The pandemic has resulted in impacts to key estimates and judgements used in these financial statements, including:

- Review of actuarial models and policies including how life insurance and investment contract liabilities and assets are calculated as detailed in notes 3, 20 and 21;
- Decisions on capital management as detailed in note 24;
- Exposures to, and the policies and procedure for managing financial risks as detailed in note 26.

An assessment of the impact of COVID-19 on the Group's balance sheet based on the information available at the time of preparing these financial statements is set out below:

Balance sheet item	COVID-19 assessment	Note
Assets classified as held for sale	Asset held for sale is held at the lower of carrying amount and fair value less costs of sale. An independent valuation was obtained as at 30 June 2020. The market value was used as the basis of the valuation, reflecting any COVID-19 related impact to the property market.	9, 17
Financial assets at fair value through profit or loss and derivative financial instruments	COVID-19 has adversely impacted financial markets. Financial assets and liabilities at fair value through profit or loss ("FVPL") and derivatives are recorded at fair value.	13
Loans and other receivables	The Group has updated the provision for impairment for the increase in expected credit losses ("ECL").	14, 15
Deferred tax	Updated forecasting has not indicated a significant deterioration in future taxable income against which the Group can utilise the deferred tax asset.	8
Intangible assets	A review of intangible assets was undertaken in the current financial year and there is no evidence that there has been a decline in the value of these assets resulting from COVID-19.	18
Life insurance contract assets and liabilities	The Group has allowed for an uplift in morbidity and discontinuance rates in calculating life insurance contract balances.	3, 20
Life investment contract liabilities	Life investment contracts are recorded at fair value.	3, 21

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

3. Actuarial methods and policies

The actuarial reports on the policy contract values and solvency calculations for the years ended 30 June 2020 and 30 June 2019 were prepared by the Chief Actuary, Nicholas Smart, M.Com, FNZSA, FIAA and reviewed by the Appointed Actuary John Smith M.Sc. FNZSA, FIAA. Messrs Smart and Smith are satisfied as to the accuracy of the data from which the amount of the policyholder liabilities and assets have been determined.

The values of the policyholder liabilities and assets have been determined in accordance with Professional Standard 20 issued by the New Zealand Society of Actuaries and the requirements of NZ IFRS 4 Insurance Contracts.

The projection method is used to determine individual life insurance contract liabilities and assets. The projection method uses expected cash flows (premiums, investment income, surrenders or benefits payments, expenses) plus profit margins to be released in future periods, to calculate the present value of life insurance contract assets and liabilities.

The accumulation method is used to determine life investment and group life contract liabilities and assets. A prospective reserve is held for the potential shortfall if the market value of assets backing policies is insufficient to cover guaranteed maturity benefits.

The key assumptions used in determining life insurance and life investment contract liabilities and assets are:

Discount rates

Policyholder liability discount rates

	At 30 June 2020	At 30 June 2019
Discounted cash flows on renewable risk plans and level premium risk plans based on 10 year NZ Government bond rate – gross interest rate	0.91%	1.57%
Non-participating assurances – net interest rate	0.66%	1.13%
Claim reserves and provisions for investment guarantees – gross interest rate	0.91%	1.57%
Annuities – net interest rate	0.66%	1.13%
Participating plans with reversionary bonuses. Derived from expected after-tax return on the assets backing the participating fund	0.70%	1.80%

Profit carriers

Policies are divided into related product groups with profit carriers and profit margins as follows:

Product type	Carrier
Risk	Expected claims payments
Savings business	Funds under management/investment management expenses
All other policies	Bonuses

Maintenance expenses

Future maintenance expenses of policies are based on an analysis of existing and projected costs and product margins. Where those expenses relate to life insurance, trauma and disability insurance it has been assumed that those expenses increase at the same rate that premiums increase – according to age rather than the inflation rate. Future inflation has been assumed to be 2.0% p.a. (2019: 2.0%) for determining future expenses and inflation linked increases in benefits and premiums.

Tax

The rates of tax enacted or substantially enacted at the date of the valuation are assumed to continue into the future. The corporate tax rate used is 28% (2019: 28%). Life insurance assets and liabilities are calculated gross of tax with a separate liability being held for tax.

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

3. Actuarial methods and policies (continued)

Mortality rates

Mortality rates for life insurance contracts are based on a proportion of the NZ10 Insured lives mortality table. These rates are adjusted based on the recent experience of the various products. Allowance is made for the level of underwriting and the duration since underwriting, smoker status and type of product.

Participating plans are assumed to experience mortality in line with NZ10 select mortality table.

Annuity plans are assumed to experience mortality in line with the IMA92C20 / IFA92C20 tables with an additional age rating to allow for future mortality improvements.

Morbidity rates

Future morbidity experience is based on proportions of reinsurance rate tables and standard industry tables.

The proportions are based on recent experience and industry trends. Adjustments have been made at 30 June 2020 to reflect the most recent experience against the latest reinsurance tables.

Rates of discontinuance

The range of rates of discontinuance assumed are shown in the table below:

	2020	2019
Yearly Renewable Term: Lump sum	7% - 20%	9.5% - 18.0%
Yearly Renewable Term: Income Protection	7% - 50%	9.5% - 19.0%
Whole of Life and Endowments including participating contracts	3.0%	3.0%
Level Term	3.0% - 15.0%	4.0% - 14.0%
Automatic acceptance with premiums limited to ten years	3.0% - 40.0%	1.0% - 20.0%
Automatic acceptance with level or reviewable premiums	3.0% - 40.0%	3.5% - 40.0%

The discontinuance rates for 2019 have a separate adjustment factor by age that is not included in the table. The 2020 rates are at a more granular level and incorporate the effects of age on discontinuance.

Surrender values

Surrender values are based on the provisions specified in the policy contracts and include a recovery of policy establishment and maintenance costs. It is assumed that the current surrender value bases will be maintained.

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

3. Actuarial methods and policies (continued)

Participating business

Assumed future bonus rates per annum for the major classes of individual participating business were:

	At 30 June 2020	At 30 June 2019
Participating business – policies with-profit assurances	Assumed that the current bonus allocation will continue indefinitely. The bonus is equal to conservative portfolio return on cash deposits.	Assumed that the current bonus allocation will continue indefinitely. The bonus is equal to conservative portfolio return on cash deposits.
Participating plans with reversionary bonuses - supportable bonus rate	0.0% of the sum assured and reversionary bonus.	0.0% of the sum assured and reversionary bonus.
Participating plans with reversionary bonuses – current bonus declaration	0.0%	0.0%
Policyholder's share of the surplus in the participating pool	83.3%	83.3%

COVID-19 and resulting economic slowdown

Additional assumptions have been applied for a limited period of time to allow for the expected impact of COVID-19. These additional assumptions include an increase in discontinuances and higher claims for Income Protection. The effect of the assumptions can be seen in the future profit margins and life insurance contracts assets.

Profit Margins

Profit margins have been incorporated for existing product categories to release those profits arising in the future which are not in relation to the provision of the original acquisition cost as and when those profits are released. Profit margins were adjusted to ensure that there was no capitalisation of future profits arising from changes to demographic assumptions and rates used in the projection. However, changes to economic and financial assumptions are capitalised.

Changes to underlying assumptions

Assumptions used for measuring life insurance contract liabilities and assets are reviewed each year. Where the review leads to a change in assumptions, the change is deemed to have occurred from the end of the year.

The financial effect of a change in discount rates resulting from a change in market conditions is recognised in the year that the rates are changed. The financial effect of all other changes to assumptions is recognised in the consolidated income statement over the future years during which the services are provided to policyholders.

The impact of changes in actuarial assumptions made during the reporting period are:

	2020		2019	
Assumption change	Effect on future profit margins \$'000	Effect on life insurance contract assets \$'000	Effect on future profit margins \$'000	Effect on life insurance contract assets \$'000
Discontinuance rates	1,230	-	14,907	-
Premium rates	73,710	-	-	-
Mortality/Morbidity rates	3,814	-	(12,161)	-
Renewal expenses	(104)	-	(16)	-
Other modelling changes	(20,538)	(6,639)	(18,565)	(198)
COVID-19 assumptions	(20,194)	(2,790)	-	-
Discount rates	26,620	7,368	35,099	9,798
Total	64,538	(2,061)	19,264	9,600

Assets backing life insurance and life investment business

Investment assets inside the Statutory Fund are divided into asset sectors and ownership is pooled across:

- Policyholders investing in a single sector portfolio;
- Policyholders investing in a multi-sector portfolio;
- Participating policyholders; and
- Shareholders.

Investment assets are administered in accordance with the Statement of Investment Policy & Objectives adopted by the Board and the Investment Policy & Procedures Manual adopted by the Asset and Liability Committee ('ALCO').

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

4. Sources of profit

	2020 \$'000	2019 \$'000
Profit for the year arose from		
Life insurance contracts		
Planned margins of revenues over expenses	19,767	18,697
Difference between actual and assumed experience	4,360	(7,106)
Effects of changes in underlying economic and financial assumptions	7,486	9,985
Interest on life insurance contract assets and liabilities	3,298	5,938
	34,911	27,514
Life investment contracts- liabilities		
Difference between actual and assumed experience	(98)	(62)
Effects of changes in underlying assumptions	(119)	(187)
	(217)	(249)
Investment earnings on assets in excess of policyholder liabilities	786	3,404
Shareholder tax	(13,757)	(11,407)
Non-statutory fund (before tax)	(1,612)	(1,008)
Profit after tax	20,111	18,254

5. Revenue

Accounting policies

Insurance premium revenue

(i) *Life insurance contracts*

Premiums on life insurance contracts with a regular due date are recognised on an accruals basis. Where a policy provides for a payment on a specific date, then such premiums are recognised as revenue when due. Unpaid premiums on policies that are deemed to have lapsed at balance date are not recognised as revenue.

(ii) *Life investment contracts*

Amounts received under life investment contracts are separated into their fee and deposit components. The fee component is recognised as income on an accruals basis and the deposit component is recognised as an increase in the liability for life investment contracts.

Insurance premium ceded to reinsurers

Premiums ceded to reinsurers under reinsurance contracts are recorded as an outwards reinsurance expense and recognised when they become due and payable in accordance with the terms and conditions of the reinsurance contracts. Where reinsurance is paid in advance the expense is recognised over the period of indemnity of the relevant contract and a portion is treated at balance date as a prepayment. Where the reinsurance premium is paid in arrears the outstanding amount at balance date is treated as a payable.

Other income

Other income is primarily comprised of reinsurance recapture income. Revenue is recognised in profit or loss when it has been earned.

Under NZ IFRS 15, revenue is recognised in the accounting period in which the performance obligation associated with that revenue is completed. Considerations received are recognised as liabilities if there are remaining performance obligations or refunds are expected.

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

5. Revenue (continued)

	2020 \$'000	2019 \$'000
(a) Net premium revenue		
Insurance premium revenue	275,478	269,493
Insurance premium ceded to reinsurers	(117,187)	(119,181)
Total net premium revenue	158,291	150,312
	2020 \$'000	2019 \$'000
(b) Other income		
Reinsurance recapture ¹	9,317	-
Reinsurance treaty policy administration fees	5,579	6,094
Other income	971	999
Total other income	15,867	7,093

¹ During the current financial year, the Group agreed on a final settlement which will terminate a quota share arrangement with a reinsurer (see note 12).

6. Investment income

Accounting policies

Interest income is recognised using the effective interest method.

Dividend and distribution income is recognised when the right to receive payment is established. Dividends from equity securities are recorded as revenue on the ex-dividend date.

Fair value gains and losses on financial assets at fair value through profit or loss are recognised through the consolidated income statement.

	2020 \$'000	2019 \$'000
Dividends and distributions	6,430	8,443
Net realised and unrealised gains	2,146	5,427
Total unit trusts	8,576	13,870
Interest received on investments at fair value through profit or loss	445	727
Total cash, loans and debt securities	445	727
Net realised and unrealised (losses)/gains	(5,255)	756
Total derivatives	(5,255)	756
Other investment (losses)	(45)	(21)
Total investment income	3,721	15,332

7. Expenses

(a) Insurance claims and related reinsurance

Accounting policies

Claims

Life insurance contract claims are recognised as an expense when a liability has been established. Claims under life investment contracts represent withdrawals of investment deposits and are recognised as a reduction in life investment contract liabilities.

Reinsurance recoveries

Reinsurance recoveries are recognised as revenue at the same time as the claim expense is recognised, if the underlying policy is reinsured.

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

7. Expenses (continued)

(a) Insurance claims and related reinsurance (continued)

Claim and reinsurance recoveries are as follows:

	2020	2019
	\$'000	\$'000
Death, disabilities and income protection claims	137,320	123,222
Maturities	211	126
Surrenders	960	1,236
Annuities	1,229	1,131
Total claims	139,720	125,715
Less: Reinsurance recoveries	(92,705)	(82,803)
Total net claims expense	47,015	42,912

(b) Commission and operating expenses

Accounting policies

Commission and operating expenses are recognised in the consolidated income statement on an accruals basis, unless otherwise stated.

Expenses are categorised into acquisition, maintenance or investment management on the basis of a detailed functional analysis of activities carried out by the Group. Expenses are further categorised into life insurance and life investment expenses based on new business volumes (acquisition costs) and in-force volumes (maintenance and investment management costs).

(i) *Acquisition costs*

Policy acquisition costs comprise the costs of acquiring new business, including commission, advertising, policy issue and underwriting costs, agency expenses and other sales costs.

Where the overall product profitability of new life insurance business written during the year is expected to support the recovery of acquisition costs incurred in that year, these costs are effectively deferred as an element of life insurance contract assets and amortised over the life of the policies written. Unamortised acquisition costs are a component of life insurance assets. Amortisation of acquisition costs is recognised in the consolidated income statement as a component of net change in life insurance contract assets.

Commission that varies with and is directly related to securing new life insurance contracts is capitalised as a deferred acquisition cost asset along with an administration and marketing allowance. All other acquisition costs are recognised as expenses in the consolidated income statement when incurred. The deferred acquisition cost asset is subsequently amortised over the life of the contracts and is recognised in the consolidated income statement as part of net change in life insurance contract assets.

(ii) *Maintenance costs*

Maintenance costs are the fixed and variable costs of administering policies subsequent to sale.

(iii) *Investment management expenses*

Investment management expenses are the fixed and variable costs of managing life investment funds.

Maintenance and investment management expenses are recognised in the consolidated income statement on an accrual basis.

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

7. Expenses (continued)
(b) Commission and operating expenses (continued)

The following table shows a summary of the commission and management expense apportionment between life insurance contracts and the Non Statutory Fund:

	2020 \$'000	2019 \$'000
Life insurance contracts		
Acquisition costs		
Commission expenses	23,575	28,584
Operating expenses	26,515	24,963
Maintenance costs		
Commission expenses	29,442	28,147
Operating expenses	29,104	30,720
	108,636	112,414
Life investment contracts		
Maintenance costs		
Commissions	403	514
Other expenses	332	519
Investment management expenses	444	313
	1,179	1,346
Non Statutory Fund		
Commission expenses	-	123
Operating expenses	(70)	2,943
Total commission and operating expenses	109,745	116,826

Included within other operating expenses are the following:

	2020 \$'000	2019 \$'000
Salaries and wages and other employee costs	32,544	32,042
Restructure costs	36	1,606
Remuneration of auditor (appointed auditor: PricewaterhouseCoopers)		
Audit of statutory financial statements	442	382
Additional audit fees in relation to prior year	-	13
Audit of solvency return	42	41
Tax compliance services	20	21
Tax advisory services	-	8
Custodial control assurance engagement	17	16
Other services ¹	-	5
Total remuneration of auditor	521	486
Directors' fees	623	683
Other professional fees	4,399	2,300
Operating lease costs ²	-	314
Depreciation (note 17) ³	865	895
Amortisation (note 18)	1,651	1,051

¹ Other services include software training for the previous financial year.

² Operating lease costs include rental of commercial office space and office equipment and the lease of motor vehicles for the previous financial year. From 1 July 2019, the Group has recognised right-of-use assets for these leases except for short-term and low-value leases (see notes 2 and 16 for further information).

³ Depreciation excludes right-of-use asset depreciation. For right-of-use asset depreciation, please refer to note 16.

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

8. Taxation

Accounting policies

Current and deferred income tax

Income tax expense comprises current and deferred tax, calculated using the tax rate enacted or substantively enacted at balance date and any adjustments to tax payable in respect of prior years. Income tax expense is recognised in the consolidated income statement except when it relates to items recognised directly in the consolidated statement of comprehensive income, in which case the tax expense is recognised in the consolidated statement of comprehensive income.

Income tax expense reflects tax imposed on both shareholders and policyholders. Tax on shareholders is imposed on cash flows (premiums less claims, less expenses, plus shareholder investment income). Tax on policyholders is imposed on investment income allocated to the policyholders.

Deferred tax expense is recognised in respect of temporary differences between the carrying amounts of assets and liabilities in the financial statements and the amounts used for taxation purposes. A deferred tax asset is recognised only to the extent it is probable that it will be utilised.

Deferred tax assets are offset against deferred tax liabilities to the extent they relate to income taxes which are legally able to be offset against each other.

The tax expense in the consolidated income statement is analysed as follows:

	2020 \$'000	2019 \$'000
Profit before tax	32,633	31,021
Tax at the New Zealand income tax rate of 28% (2019: 28%)	9,137	8,686
Tax effect of non-taxable income	(1,425)	(1,199)
Tax effect of non-deductible expenses	5,056	5,391
Benefit of imputation credits received	(234)	(116)
Prior period adjustment	(12)	5
Income tax expense reported in the consolidated income statement	12,522	12,767
Comprising:		
Current tax	(289)	3,227
Deferred tax	12,811	9,540
	12,522	12,767
Tax expense attributed to policyholders	(1,245)	1,360
Tax expense attributed to shareholders	13,767	11,407
	12,522	12,767

The taxation expense relating to components of other comprehensive income is as follows:

	2020 \$'000			2019 \$'000		
	Before tax	Deferred tax expense	After tax	Before tax	Deferred tax expense	After tax
Fair value (loss)/gains on revaluation of land and building	(2,174)	609	(1,565)	3,393	(950)	2,443
Remeasurement of assets classified as held for sale	(854)	239	(615)	-	-	-
	(3,028)	848	(2,180)	3,393	(950)	2,443

	2020 \$'000	2019 \$'000
Income tax assets		
Income tax prepaid ¹	3,593	3,551
Current tax asset	494	4
Tax benefit recognised on acquired policies	1	58
Total income tax assets	4,088	3,613

¹ The income tax prepaid amount will be utilised to meet the Company's future shareholder income tax liabilities once tax losses carried forward have been exhausted. The Company cannot request a refund for the amount and it will not be utilised in the next financial year.

	2020 \$'000	2019 \$'000
Current tax liabilities		
Current tax liabilities	-	643
Total current tax liabilities	-	643

Balance at 30 June 2020	954	789	1,774	81,788	9,864	7	95,176

¹ Deferred acquisition costs are a component of life insurance contract assets.

Imputation credits

	2020 \$'000	2019 \$'000
Imputation credits available for use in subsequent reporting periods based on a tax rate of 28%	30	8

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

9. Assets classified as held for sale

In May 2020, the Group committed to a plan to sell the owner occupied building at 81 Carlton Gore Road, Newmarket, Auckland ('the Carlton Gore Road property'). Accordingly the Carlton Gore Road property has been reclassified as an asset held for sale. In accordance with NZ IFRS 5, the Carlton Gore Road property value was remeasured at the time of the classification as held for sale at the lower of its carrying amount and fair value less costs of sale, based on an independent valuation. The property value was remeasured again based on an updated independent valuation as at 30 June 2020:

	Jun-19	
Owner occupied building - 81 Carlton Gore Road	\$'000	
Carrying value of the property (before remeasurement)	29,203	
	Initial measurement May-20 \$'000	Subsequent measurement Jun-20 \$'000
Asset held for sale - 81 Carlton Gore Road		
Fair value as per independent valuation	26,600	26,300
Less: costs of sale	(554)	(554)
Measured at fair value less costs of sale	26,046	25,746

Revaluation of property

The Carlton Gore Road property is a commercial office building located in Auckland. The valuation of the property is measured at fair value at each reporting date. The methodology used to value the property includes significant unobservable inputs (level 3 of the fair value hierarchy).

The property was re-measured on 30 June 2020 at \$26,300,000 (2019: \$29,000,000) based on an independent valuation by Bayleys Valuations Limited. The market value was used as the basis for the valuation. Due to COVID-19 there is significant market uncertainty around commercial property prices with the valuation used current at balance date only. The market value may change significantly and unexpectedly over a relatively short period of time.

Primary assumptions used in valuing the property

	Jun-20	Jun-19
Capitalisation rate ¹	6.00%	4.70%
Discount rate ¹	7.38%	5.00%

¹ The fair value of the property would increase if the capitalisation rate or the discount rate were to decrease and vice-versa.

Revalued property historic cost

If the property was stated on the historical cost basis, the amounts would be as follows (prior to being transferred to asset held for sale):

	2020	2019
	\$'000	\$'000
Cost	18,186	18,186
Accumulated depreciation	(3,900)	(3,537)
Net book amount	14,286	14,649

Leases committed not yet commenced

During the year ended 30 June 2020, the Group signed a lease agreement for new premises at 136 Fanshawe Street, Auckland ('Fanshawe property'). The new lease is expected to commence in September 2021 (see note 28 (c)). The Group was offered an underwrite option in order to facilitate the new lease.

Sale and lease back

In the event the Carlton Gore Road property is settled prior to the Fanshawe property completion date, the Group intends to lease back the Carlton Gore Road property until completion between July and August 2021. There is no impact on the consolidated income statement or the consolidated statement of financial position.

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

10. Cash and cash equivalents

Accounting policy

Cash and cash equivalents are held with banks and financial institutions. The assets are short term in nature and the carrying value is approximately equal to their fair value.

Statement of cash flows

The following are the definitions of the terms used in the consolidated statement of cash flows:

- (i) Operating activities include all transactions and other events that are not investing or financing activities.
- (ii) Investing activities are those activities relating to the acquisition, holding and disposal of property, plant and equipment, intangible assets and investments.

Cash flows from the sale and purchase of financial assets in respect of investing activities have been reported on a net basis as they predominantly relate to funds held for the benefit of policyholders or reflect the purchase and sale of investments where turnover is quick, amounts are large and maturities are short.

- (iii) Financing activities are those activities relating to the changes in equity and debt structure of the Group.

Cash and cash equivalents comprise:	2020 \$'000	2019 \$'000
Bank balances	35,526	12,501
Deposits at call ¹	152,531	-
Total cash and cash equivalents	188,057	12,501

¹ The Group has reviewed and restructured its investment portfolio during the year. As a result some of the financial assets were re-invested in call accounts to improve the Group's liquidity and reduce counter party concentration risks. Deposits at call are held with AA- rated banks with 52% of the deposits at call held with one bank.

11. Restricted Cash

	2020 \$'000	2019 \$'000
Restricted cash	-	10,268
Total restricted cash	-	10,268

Under a Subscription Agreement with Guardians of New Zealand Superannuation as Manager and Administrator of the New Zealand Superannuation Fund, \$10,000,000 was placed in escrow on 5 January 2018 to support various warranties and indemnities. On 8 July 2019 the escrow amount including interest was released in full (the release of the escrow amount, excluding interest is shown as 'proceeds from issue of ordinary shares' in the consolidated statement of cash flows).

12. Assets arising from reinsurance contracts

Accounting policy

Assets arising from reinsurance contracts are recognised initially at fair value and subsequently measured at amortised cost less any provision for impairment.

	2020 \$'000	2019 \$'000
Life insurance contracts reinsurance assets		
Balance at 1 July	19,889	17,795
Reinsurance claims made to reinsurers	72,512	63,290
Payments received from reinsurers	(73,721)	(61,196)
Reinsurance recapture receivable ¹	6,300	-
Balance at 30 June (expected to be recovered within 12 months)	24,980	19,889

¹ During the current financial year, the Group agreed on a final settlement to terminate a quota share arrangement with one of the Group's reinsurers (see note 5).

13. Financial instruments

Accounting Policies

NZ IFRS 9 contains a classification and measurement approach for financial assets that reflects the business model in which the assets are managed and the contractual terms of the cash flows.

(i) Classification

The Group classifies its financial assets into the following measurement categories:

- those to be measured at amortised cost; and
- those to be measured subsequently at fair value, either through other comprehensive income ('FVOCI') or through profit or loss ('FVPL').

Financial assets are not reclassified subsequent to their initial recognition, except if in the period the Group changes its business model for managing those financial assets. Subsequent measurement of the Group's financial assets depends on the Group's business model for managing the financial assets and the contractual terms of the cash flows.

(ii) Recognition and derecognition

Regular way purchases and sales of financial assets are recognised on trade-date, the date on which the Group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

(iii) Measurement

Amortised Cost

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as being measured at FVPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

FVPL

The Group classifies the following financial assets at FVPL:

- debt investments that do not qualify for measurement at either amortised cost or FVOCI;
- equity investments that are held for trading; and
- equity investments for which the Group has not elected to recognise fair value gains or losses through OCI.

Business model assessment

The Group must make an assessment of the objective of the business model in which a financial asset is held at a portfolio level as this best reflects the way the business is managed. The information considered includes:

- the stated policies and objectives for the portfolio and operation of those policies in practice; and
- how the performance of the portfolio is evaluated and reported to the Group's management.

Assessment whether contractual cash flows are solely payments of principal and interest

For the purpose of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition.

'Interest' is defined as consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time, for other basis lending risks and costs and for a profit margin.

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

13. Financial instruments (continued)

In assessing whether the contractual cash flows are solely payments of principal and interest, the Group considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Group considers:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable rate features;
- prepayment and extension features; and
- terms that limit the Group's claim to cash flows from specified assets.

Recognition of gains or losses

FVPL

A gain or loss on a debt instrument that is subsequently measured at FVPL is recognised in profit or loss and presented net within investment income/(losses) in the period in which it arises.

Amortised Cost

Interest income from these financial assets is included in interest income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in investment income/(losses) together with foreign exchange gains or losses. Impairment losses are presented as a separate line item in the statement of profit or loss.

Financial instruments by category

Financial assets	Fair value through profit or loss \$'000	Amortised Cost \$'000	Total \$'000

13. Financial instruments (continued)

Fair values of financial instruments

The following table shows the Group's financial assets and liabilities at fair value through profit or loss categorised by fair value measurement hierarchy levels. The levels are as follows:

Level 1: Fair values are determined using quoted market prices where an active market exists.

Level 2: Where quoted market prices are not available or markets are considered inactive, fair values have been estimated using present value or other techniques based on market conditions existing at balance date. The valuation techniques rely on market observable inputs.

Level 3: Fair values are estimated using inputs that are not based on observable market data.

	Level 1 \$'000	Level 2 \$'000	Level 3 \$'000	Total fair value \$'000

14. Loans and other receivables

Accounting policy

Loans and other receivables are recognised initially at fair value plus transaction costs and subsequently measured at amortised cost less any provision for impairment.

Impairment

The Group recognises a loss allowance for the estimated credit losses ("ECLs") on financial assets measured at amortised cost subject to NZ IFRS 9 impairments, being loan receivables, cash, cash equivalents and restricted cash.

A Majority of the Group's financial assets represent rights and obligations arising under insurance contracts as defined in NZ IFRS 4 Insurance Contracts which are out of scope and therefore not subject to the NZ IFRS 9 impairment model.

The Group applies a three stage approach to measuring ECLs on financial assets measured at amortised cost. Assets migrate through the following three stages on their change in credit quality since initial recognition:

i) Stage 1: 12-month ECL

For exposures where there has not been a significant increase in credit risk since initial recognition and which were not credit impaired upon origination, the portion of the lifetime ECL associated with the probability of default events occurring within the next 12 months is recognised.

ii) Stage 2: Lifetime ECL - not credit impaired

For exposures where there has been a significant increase in credit risk since initial recognition but that are not credit impaired, a lifetime ECL (i.e. reflecting the remaining lifetime of the financial asset) is recognised. The management practice is to consider three elements in assessing whether there have been a significant increase in credit risk - a quantitative element, qualitative element and the 30 day rebuttable presumption, together with other information.

iii) Stage 3: Lifetime ECL - credit impaired

Financial assets are assessed as credit impaired when one or more events that have a detrimental impact on the estimated future cash flows of that asset have occurred. For financial assets that have become credit impaired, a lifetime ECL is recognised and interest revenue is calculated by applying the effective interest rate to the amortised cost (net of provision) rather than to the gross carrying amount.

The loss allowances which are measured as 12-month ECLs are:

- debt securities that are determined to have low credit risk at the reporting date; and
- other debt securities and bank balances for which the credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

Loss allowance for trade receivables and contract assets are **always** measured at an amount equal to lifetime ECL.

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

14. Loans and other receivables (Continued)

The Group considers the probability of default upon initial recognition of an asset and whether there has been a significant increase in credit risk on an ongoing basis throughout each reporting period.

In assessing whether there has been a significant increase in credit risk, the Group compares the risk of a default occurring on the asset as at the reporting date with the risk of default as at the date of initial recognition. It considers available reasonable and supportable forward-looking information. The following indicators are incorporated:

- internal credit rating;
- actual or expected significant adverse changes in financial or economic conditions that are expected to cause a significant change to the borrower's ability to meet its obligations;
- significant changes in the value of the collateral supporting the obligation; and
- significant changes in the expected performance and behaviour of the borrower, including changes in the payment status of borrowers.

Macroeconomic information (such as market interest rates and unemployment rates) is incorporated as part of the internal rating model.

The Group assumes that the credit risk of a financial asset has increased significantly if it is more than 30 days past due.

The Group considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising the security (if any is held); or
- the financial asset is 90 days or more past due.

The Group considers a debt security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'. The Group considers this to be BBB- or higher per rating agency.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

In all cases, the maximum period considered when estimating ECLs is the maximum contractual period over which the Group is exposed to credit risk.

Measurement of ECL

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls.

Write-off

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent there is no realistic prospect of recovery. This is generally the case when the Group determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off.

15. Impairment on financial assets

The following table shows the loan receivables subject to the expected credit loss model:

(a) Gross carrying amounts of mortgages and loans

	Stage 1 Collective assessed \$'000	Stage 2 Collective assessed \$'000	Stage 3 Individually assessed \$'000	Total \$'000
Balance at 1 July 2018	7,866	241	198	8,305
Movement in gross carrying amounts of loans and mortgages	(6,556)	(241)	1,611	(5,186)
Balance at 1 July 2019	1,310	-	1,809	3,119
Movement in gross carrying amounts of loans and mortgages	(584)	-	(922)	(1,506)
Amounts written off	-	-	(89)	(89)
Balance as at 30 June 2020	726	-	798	1,524

(b) Mortgages and loans by expected credit loss allowance

	Stage 1 Collective assessed \$'000	Stage 2 Collective assessed \$'000	Stage 3 Individually assessed provisions \$'000	Total \$'000
Opening loss allowance as at 1 July 2018	74	33	202	309
Individual financial assets transferred to/(from) stage 3 individually assessed provisions	-	-	1,011	1,011
Other changes	(38)	(33)	-	(71)
Opening loss allowance as at 1 July 2019	36	-	1,213	1,249
Release of provisions due to repayments/ amounts written off	-	-	(514)	(514)
Other changes	50	-	(7)	43
Closing loss allowance as at 30 June 2020	86	-	692	778

While cash and cash equivalents are also subject to the impairment requirements of NZ IFRS 9, the identified impairment loss was immaterial.

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

16. Leases

The Group's leasing activities and how these are accounted for

Rental contracts are typically made for fixed periods of 3 to 5 years with extension options available. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The Group's lease agreements do not impose any covenants, but lease assets may not be used as security for borrowing purposes.

Until the previous financial period, leases of property, plant and equipment were classified as either finance or operating leases. As at 30 June 2019, the Group did not have any finance leases. Payments made under operating leases were charged to profit or loss on a straight-line basis over the period of the lease.

From 1 July 2019, leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

The lease payments are discounted using the lessee's incremental borrowing rate, being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentive receivable;
- amounts expected to be payable by the lessee under residual value guarantees;
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option; and
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

To determine the incremental borrowing rate, the Group:

- where possible, uses recent third-party financing received by the individual lessees as a starting point, adjusted to reflect changes in financing conditions since third party financing was received;
- uses a build-up approach that starts with a risk-free interest rate and adjusted for credit risks; and
- makes adjustments specific to the lease (e.g. term, security).

Lease payments are allocated between the principal and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability;
- any lease payments made at or before the commencement date less any lease incentives received; and
- restoration costs.

Payments associated with short-term leases and leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less. Low-value assets comprise low-value IT equipment.

Variable lease payments relate to operating expenses on regional office leases. Operating expenses include charges for water, gas, electricity, telephone and other utilities.

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

16. Leases (continued)

Extension and termination options are included in a number of leases across the Group. These terms are used to maximise operational flexibility in terms of managing contracts. The majority of extension and termination options held are exercisable only by the Group and not by the respective lessor. In determining the lease term, the Group considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Approximately 28% of the total lease payments made in the current financial period were as a result of exercising the extension option.

The Group leases various assets including offices, IT equipment and motor vehicles. Information about leases for which the Group is a lessee is presented below.

	Office \$'000	IT equipment \$'000	Motor vehicle \$'000	Total \$'000

Leases committed not yet commenced

During the year ended 30 June 2020, the Group signed a lease agreement for new premises at 136 Fanshawe Street, Auckland ("Fanshawe property"). The new lease is expected to commence in September 2021 (see note 28 (c)). The Group was offered an underwrite option in order to facilitate the new lease.

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

17. Property, plant and equipment

Accounting Policies

Property, plant and equipment

Land and buildings are carried at fair value based on an annual valuation by an external independent valuer, less any subsequent depreciation for buildings.

All other property, plant and equipment is stated at cost less accumulated depreciation and impairment. The cost includes expenditure that is directly attributable to the acquisition of the items.

Depreciation

Depreciation is calculated using the straight-line method to allocate an asset's cost or revalued amount, net of any residual value, over the asset's estimated useful life. The rates are as follows:

Property building component	50 years
Building fit-out	8 years
Leasehold improvements	8 years
Plant and equipment	3-5 years

Impairment of assets

Property, plant and equipment is reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell, and value in use.

Property, plant and equipment can be analysed as follows:

	Owner- occupied property measured at fair value \$'000	Building fit-out and improvements \$'000	Plant and equipment \$'000	Total \$'000
At 1 July 2018				
Cost or fair value	25,900	1,174	5,514	32,588

Net book amount	-	-	944	944

18. Intangible assets

Accounting Policies

Software

Acquired software licences are capitalised on the basis that they are costs incurred to acquire and use specific software.

Internally developed software

Costs associated with developing identifiable and unique software controlled by the Group, including employee and contractor costs, are capitalised and treated as intangible assets when the products will generate probable future economic benefits. Amortisation commences once the software is available for use.

Software under development

Costs that are directly associated with the development of software are recognised as intangible assets where the following criteria are met:

It is technically feasible to complete the software so that it will be available for use; there is an ability to use the software; it can be demonstrated how the software will generate probable future economic benefits; the expenditure attributable to the software during its development can be reliably measured.

Software development costs that meet the above criteria are capitalised. Other development expenditure that does not meet the above criteria is recognised as an expense as incurred.

Software costs are amortised over the useful life of 3 to 10 years on a straight-line basis.

Impairment

Intangible assets are reviewed for impairment annually to identify events or changes in circumstances that indicate that the carrying amount may not be recoverable. If an asset's carrying amount is greater than its estimated recoverable amount, the carrying amount is written down to its recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and the asset's value in use. Any impairment loss is recognised immediately in the consolidated income statement.

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

18. Intangible assets (continued)

Intangible assets can be analysed as follows:

	Software \$'000	Internally developed software \$'000	Software under development \$'000	Total \$'000

Net book amount	331	1,231	7,660	9,222

In 2019 the Group began work on developing a new policy administration system to replace several legacy systems. The first phase of the system development commenced during the current financial year, with deployment completed in July 2020. The second phase is expected to be completed in the next financial year.

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

19. Payables and other financial liabilities

Accounting Policies

Payables

Payables are liabilities for goods and services provided to the Group which are unpaid at reporting date. The carrying value of payables is considered to approximate fair value as amounts are unsecured and are usually paid within a month of recognition.

Refer to the accounting policy on Revenue (note 5), and Expenses (note 7) for further details.

Provisions

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

	2020	2019
	\$'000	\$'000
Creditors and accruals	5,085	6,102
Claims notified	18,504	18,171
Contract liability	1,350	-
Income in advance	868	624
Reinsurance liabilities	22,820	25,714
Employee entitlements	5,137	4,933
Total payables and other financial liabilities	53,764	55,544
Due:		
Within 12 months	49,997	52,044
Later than 12 months	3,767	3,500
	53,764	55,544

20. Life insurance contract liabilities and assets

Accounting Policies

Life insurance contracts are those contracts that transfer significant insurance risk. Contracts that contain a discretionary participation feature are also classified as life insurance contracts. A participating contract is eligible for a share of the value of future planned shareholder profit margins and an allowance for future supportable bonuses.

The methodology used to determine the value of life insurance contract liabilities and assets is referred to as Margin on Services ('MoS'), as set out in New Zealand Society of Actuaries Professional Standard No 20: Determination of Life Insurance Policyholder Liabilities ('PS20').

MoS is designed to recognise profits on life insurance policies as services are provided to policyholders and income is received. Under MoS, the planned profit margins are deferred and amortised over the life of the contract, whereas losses are recognised immediately.

Life insurance contract assets and liabilities are generally determined as the present value of all future expected payments, expenses, taxes and profit margins, reduced by the present value of all future expected premiums.

The movement in life insurance contract liabilities and assets is recognised in the consolidated income statement.

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

Future expenses	652,480	601,000
Reinsurance policy liability	58,458	41,457
Planned margins of revenues over expenses	340,341	268,654
Future revenues	(2,910,676)	(2,658,224)
	(190,946)	(178,838)
Life insurance contracts with a discretionary participation feature that have a guaranteed element	36,027	35,978

21. Financial liabilities (life investment contract liabilities)

Accounting Policies

Life investment contracts are those contracts with no significant insurance risk, but which give rise to a financial liability.
Life investment contracts issued by the Group are unit-linked and are measured at fair value. The fair value of a unit-linked contract is determined by using the current unit values that reflect the fair values of the financial assets backing the contract, multiplied by the number of units attributed to the contract holder.

	2020 \$'000	2019 \$'000
Movement in life investment contract liabilities		
Opening balance at 1 July	122,956	142,082
Contributions received	4,284	4,837
Fees deducted from account balances	(199)	(236)
Liabilities released for payments on death, surrender and other terminations in the year	(14,711)	(28,579)
Investment return credited to policyholders	1,354	5,699
Other movements	(674)	(847)
Closing balance at 30 June	113,010	122,956
Due:		
Within 12 months	35,359	37,308
Later than 12 months	77,651	85,648
	113,010	122,956
Life investment contracts with a guaranteed element	94,226	99,784

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

22. Deferred income

	2020	2019
	\$'000	\$'000
Opening balance at 1 July	2,734	3,417
Amortisation	(683)	(683)
Closing balance at 30 June	<u>2,051</u>	<u>2,734</u>

The deferred income arose from reinsurance treaties entered into during the 2014 financial year. This deferred income is being amortised over 10 years.

23. Share capital and dividends

Accounting policies

Share capital

The incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Dividends

Ordinary dividends are recognised as a movement in equity in the year within which they are paid.

Where a dividend is declared after balance date, but prior to the issue of the financial statements, disclosure of the declaration is made but no liability is recognised for the amount.

Share capital

	2020	2019	2020	2019
	Shares	Shares	\$'000	\$'000
Share capital at the beginning of the year	2,091,440	2,091,440	81,586	81,586
Closing balance	<u>2,091,440</u>	<u>2,091,440</u>	<u>81,586</u>	<u>81,586</u>

All shares are fully paid and have no par value. All ordinary shares rank equally and shareholders are entitled to receive one vote per share.

Dividends paid

	2020	2019	2020	2019
	Per share	Per share	\$'000	\$'000
Ordinary shares				
Final dividend	-	2.00	-	4,183
Total dividend paid	<u>-</u>	<u>2.00</u>	<u>-</u>	<u>4,183</u>

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

24. Capital management

The objectives of the Group with regard to capital management are to:

- (i) Maintain a level of target surplus which creates a buffer over minimum regulatory capital while still allowing for efficient use of capital;
- (ii) Maintain a strong capital base to cover the inherent risks of the business; and
- (iii) Support the future development and growth of the business to maximise shareholder value.

The Board has the ultimate responsibility for managing capital and compliance with the Solvency Standard for Life Insurance Business 2014 issued by RBNZ ("Solvency Standard"). The Board approves the capital policy and minimum capital levels and limits. Minimum capital levels are set based on maintaining a target surplus in excess of solvency margin requirements under the Solvency Standard. The Company has two life funds, the Statutory Fund and the Non Statutory Fund. The solvency margin of the Statutory Fund must be at least \$17m (2019: \$0) and the Non Statutory fund must be at least \$0.

During the years ended 30 June 2020 and 30 June 2019, the Company complied with all capital licensing requirements. The Board has ultimate responsibility for maintaining the optimal capital structure. The Audit and Risk Committee oversees the capital computations and advises the Board on dividend payments and share issues. In addition, the Company manages its required level of capital through analysis and optimisation of the Company's product and asset mix, reinsurance programme, insurance risk exposure and investment strategy.

The Appointed Actuary is satisfied that appropriate actions within the Board's control are sufficient to ensure a solvency margin is maintained at all times over the next four years, without raising any extra capital.

The solvency position of the Company is as follows:

	2020			2019		
	Statutory Fund	Non-Statutory Fund	Total	Statutory Fund	Non-Statutory Fund	Total
	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000
Actual solvency capital	283,647	32,210	315,857	246,419	52,445	298,864
Minimum solvency capital	254,585	3,347	257,932	229,213	18,924	248,137
Solvency margin	29,062	28,863	57,925	17,206	33,521	50,727
Solvency ratio	111%	962%	122%	108%	277%	120%

Fidelity Life Assurance Company Limited

Investment income	8,300	6,136	14,436
Claims expense and investment contracts payments	28,579	125,715	154,294
Other operating expenses	1,346	112,414	113,760
Investment revenues paid or allocated to policyholders	5,699	-	5,699
Profit before tax	1,111	30,917	32,028
(Loss)/profit after tax	(249)	19,199	18,950

Fidelity Life Assurance Company Limited
Notes to the financial statements
for the year ended 30 June 2020

26. Risk Management

Risk management framework

The Board has responsibility for the establishment and oversight of the Group's risk framework. It also has the responsibility for approving the risk appetite of the Group and risk related policies.

While the Board is ultimately responsible for risk management, specific responsibility for the monitoring and evaluation of the effectiveness of risk management is delegated to the Audit and Risk Committee who ensure that management have identified, measured and managed the Group's risks in accordance with the Group's policies and risk objectives.

The Group has a formalised risk management programme which is supported by six key components:

- i. The risk management policy, the purpose of which is to communicate why risk management is important and describe the Group's approach to managing risk. Risk management is the cultures, capabilities and practices integrated with the Group's strategy (and its execution), that the Group rely on to manage risk in creating, preserving and realising value. Risk Management is a critical business discipline that reduces uncertainty in the achievement of the Group's objectives; it also strengthens and complements other corporate governance initiatives. Risk and Compliance is part of the cultural fabric of the Group.
- ii. The risk management framework details how the Group ensures that effective risk management is real and reflected in the operational activities of the Group. The risk management framework considers risks at a strategic and operational level. The Group's Risk Management Framework follows the principles of AS/NZ ISO 31000 Risk Management Principles and Guidelines. The risk management programme of work is regularly reviewed to ensure it continues to effectively manage the Group's risks.
- iii. The risk and compliance strategy forms part of the annual strategic and business planning documents, identifying the key risk management initiatives that need to be planned and budgeted for.
- iv. The corporate risk register allows the Risk Management Committee to critically evaluate if the risk management process is effectively identifying and addressing exposures. The risk register continuously evolves as risks are identified, monitored and treated. The identified risks are owned by a member of the Executive team for transparency and accountability with second line assurance provided by Risk & Compliance regarding controls identified.
- v. The risk appetite statement is reviewed annually by the Board. The risk appetite statement is used as a guide to the level of risk the Group is prepared to accept.
- vi. An internal audit function whose purpose is to provide independent and objective assurance on the adequacy and effectiveness of controls has been set up by the Group. This is presently an outsourced function provided by KPMG. The internal audit function follows an agreed program of work which is reviewed at least annually to ensure appropriate subjects for audit are identified and agreed.

The risk management programme of work is regularly reviewed to ensure it continues to effectively manage the Group's risks.

The Asset and Liability Committee ('ALCO'), which reports to and is directly accountable to the Board of Directors, comprises the Chief Financial Officer, the Appointed Actuary, the Chief Risk Officer, one Director and an independent actuarial advisor.

The Group's business lines are exposed to balance sheet and profit or loss risk associated with movements in financial instruments and other assets, as well as the movement in the net present value of future projected income and liability cash flows. The purpose of the ALCO is to construct portfolios of financial assets that maximise expected returns subject to the risk appetite and constraints established by the Board. The ALCO is empowered to investigate any sources of actual or potential change in those values and the key measures of financial condition, including balance sheet strength and liquidity, regulatory solvency levels, profitability, changes in the values of different classes of liability, and the performance of investment assets. The ALCO is responsible for reviewing investment policy and submitting any recommendations for change to the Board for approval, including liability hedging and currency hedging strategies.

During the financial year the Group took a holistic approach to managing the dynamic risks and issues arising from the fast moving COVID-19 situation. The Group responded quickly to the COVID-19 related risks and impacts on the business. Business Continuity Plans were triggered as required to ensure the Group maintained business continuity for all stakeholders during Government Alert Levels.

During lockdown the Group maintained the usual customer service levels and had a strong focus on the health and safety and wellbeing of employees. Working remotely increases the likelihood of fraud risk. The Group has a Fraud & Corruption plan with a supporting Fraud Risk Register to identify, assess and monitor key points across the business which are potentially susceptible to fraud occurring.

In addition improvements were also initiated during the financial year around economic scenario response planning.

The Group's activities expose it to market risk, insurance risk, liquidity risk and credit risk:

A. Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, price risk and interest rate risk.

For each of the major components of market risk, the Group has put in place procedures to set out how each risk should be managed and monitored, and the approach to setting an appropriate risk appetite. The management of market risk is undertaken by the ALCO. The ALCO oversees the selection of wholesale managers, construction of wholesale mandates and asset allocation within the permitted guidelines of the Statement of Investment Policy and Objectives ('SIPO').

Fidelity Life Assurance Company Limited
Notes to the financial statements
for the year ended 30 June 2020

26. Risk Management (continued)

(i) Currency risk

Currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign currency rates.

Foreign currency risk arises as the Group has invested in international shares and international bonds which are denominated in foreign currencies. As at 30 June 2020 foreign currency denominated assets amounted to 10.4% (2019: 11.2%) of total assets. The market value of these assets is therefore affected by movements in the New Zealand dollar relative to the currency in which the asset is denominated.

The Group uses foreign currency forward contracts to mitigate its exposure to currency risk from foreign denominated assets.

(ii) Price risk

Price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in market prices (other than those arising from interest rate risk or currency risk) whether those changes are caused by factors specific to the individual financial instrument or its issuer, or by factors affecting all similar financial instruments traded in the market.

The risk is managed by ensuring a diverse range of investments, limits on counterparty exposure and restrictions on types of instruments.

Most price risk is borne by policyholders of life investment contracts who have selected the investment portfolio that invests in a particular mix of assets. However, the Group derives fee income based on the value of the underlying funds; hence revenues are sensitive to changes in market value. For assets which are not contractually linked to policy liabilities and assets, the Group is exposed to equity price risk.

(iii) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's exposure to the risk of changes in market interest rates relates primarily to:

Fair value interest rate risk

Fair value interest rate risk arises from the potential for a change in interest rates to cause a fluctuation in the fair value of financial instruments and life insurance contract liabilities and assets.

Cash flow interest rate risk

Cash flow interest rate risk is the potential for a change in interest rates to change interest expense and interest income in future periods.

Mortgages and policy loans held by the Group are also subject to cash flow interest rate risk.

The Group manages its interest rate risk by regular monitoring of its exposure and assessing whether it is appropriate to adopt interest rate swaps given strategic objectives.

Fidelity Life Assurance Company Limited
Notes to the financial statements
for the year ended 30 June 2020

26. Risk Management (continued)

Sensitivity to market risk

The following table shows the change in profit after tax and the effect on equity if there was a change in market risk assumptions with all other variables assumed unchanged:

		2020 \$'000		2019 \$'000	
Market risks		Impact on post-tax profit	Impact on equity	Impact on post-tax profit	Impact on equity
Currency rates	Increase by 10%	158	158	123	123
	Decrease by 10%	(130)	(130)	(100)	(100)
Equity prices	Increase by 10%	819	819	429	429
	Decrease by 10%	(819)	(819)	(429)	(429)
Interest rates	Increase by 1%	(1,061)	(1,061)	3,974	3,974
	Decrease by 1%	1,061	1,061	(4,316)	(4,316)

This table refers only to the effect on financial instruments and does not include the impact on life insurance contract liabilities and assets.

B. Insurance Risk

Insurance risk is risk, other than financial risk, that is transferred from the holder of an insurance contract to the insurer.

The Group's objectives in managing risks arising from its insurance business are:

- To ensure that an appropriate return on capital is made in return for accepting insurance risk.
- To ensure that internal controls are in place within the business to mitigate underwriting risk.
- To ensure that internal and external solvency and capital requirements are met.
- To use reinsurance as a component of insurance risk management strategy.

Controls implemented to manage insurance risk include:

- Premium rates are set based on the expected incidence of claims, costs of running the insurance pool (including commission to sales intermediaries) and a contingency margin to cover the variability risk and cost of capital that provide solvency support for the insurance pool.
- Underwriting decisions are made in accordance with the procedures detailed in the Group's underwriting manual.
- Claim management procedures are in place to assist in the timely and correct payment of claims in accordance with policy conditions.
- Reinsurance that caps the total amount payable on each claim to a predefined amount of risk is used to control the exposure of the Group to variation in the incidences of claims and concentration of risk. The Group holds a catastrophe reinsurance treaty to limit large losses arising from concentrations of risk due to geographical exposure or single events. The Group also holds a pandemic reinsurance treaty to limit the net exposures to pandemic events. The Group actively manages its exposure under its retention agreements with its reinsurers. Levels of retained risk are increased or decreased to reflect changes in the Group's retention risk profile.

Terms and conditions of insurance contracts

The nature of the terms of insurance contracts written is such that certain variables can be identified on which related cash flow payments depend. The table below provides an overview of these:

Type of contract	Detail of contract terms and conditions	Nature of compensation for claims	Key variables that affect the timing and uncertainty of future cash flows
Non-participating life insurance contracts with fixed and guaranteed terms	Benefits paid on death, ill health, disability or maturity that are fixed and guaranteed and not at the discretion of the insurer. Premiums may be guaranteed through the life of the contract, guaranteed for a specific term or variable at the insurer's discretion.	Benefits, defined by the life insurance contract, are determined by the contract and are not directly affected by the performance of underlying assets or the performance of contracts as a whole.	- Mortality - Morbidity - Discontinuance rates
Life insurance contracts with discretionary participating benefits	These policies include a clearly defined initial guaranteed sum assured which is payable on death. The guaranteed amount is a multiple of the amount that is increased throughout the duration of the policy by the addition of regular bonuses annually which once added are not removed. Regular bonuses are added retrospectively.	Benefits arising from the discretionary participation feature are based on the performance of a specified pool of contracts or a specified type of contract.	- Mortality - Morbidity - Market risk - Discontinuance rates - Market returns on underlying assets
Life annuity contracts	These policies provide regular payments to the life assured.	The amount of the payment is set at inception of the policy.	- Longevity - Market returns on underlying assets

Fidelity Life Assurance Company Limited
Notes to the financial statements
for the year ended 30 June 2020

26. Risk Management (continued)

Sensitivity analysis

The analysis assumes that the value of liabilities will not be affected by changes in demographic assumptions.

The following table shows the changes in the value of profit (post-tax) at 30 June if actuarial assumptions change as follows:

		2020	2019
		Impact on post-tax profit	Impact on post-tax profit
		\$'000	\$'000
Discount rate	Increase by 0.25%	(828)	(1,272)
	Decrease by 0.25%	890	1,238
Mortality / morbidity	Increase by 10%	75	-
	Decrease by 10%	(97)	(15)
Discontinuance	Increase by 10%	229	77
	Decrease by 10%	(338)	(80)
Expenses	Increase by 10%	(37)	(3)
	Decrease by 10%	37	3

Variable	Impact of a movement in the underlying variable
Mortality risk	For insurance contracts providing death benefits, greater mortality rates would lead to higher levels of claims. This is offset by annuities where greater mortality leads to lower levels of claims.
Morbidity risk	The cost of health-related claims depends on both the incidence of policyholders being diagnosed with a critical illness or becoming temporarily or permanently disabled and the duration for which they remain temporarily or permanently disabled. Higher than expected incidence and duration would be likely to increase claim costs, reducing profit and shareholders' equity.
Discontinuance risk	The impact of the discontinuance rate assumption depends on a range of factors including the type of contract, the surrender value basis (where applicable) and the duration in-force.

C. Liquidity risk

Management of liquidity risk is designed to ensure that the Group has the ability to meet its financial obligations as they fall due.

The Group is exposed to daily calls on its available cash resources from maturing policies, policy claims, surrenders and cashing in or switching between investment portfolios.

Through the application of a liquidity management policy the Group seeks to maintain sufficient resources to meet its obligations as they fall due including adverse scenarios for voluntary withdrawals by policyholders.

Investment durations are matched with the expected time frames of liabilities to ensure that liabilities are adequately covered.

Each investment portfolio has a small proportion of non-linked funds to provide immediate liquidity for any policyholder that wishes to withdraw funds or switch portfolios.

26. Risk Management (continued)

Maturity analysis

The table below shows the maturity of the contractual undiscounted cash flows of the Group's financial assets and liabilities. Where the counterparty has discretion in requesting immediate payment without exit penalty, liabilities have been classified according to the earliest time period in which the Group may be required to pay. Cash flows on derivative financial instruments are analysed on a gross basis, unless they are settled net. Life insurance contract liabilities/(assets) cash flows are in relation to maturity values payable.

2020	Less than 1 year	Between 1 & 2 years	Between 2 & 5 years	Over 5 years	Total	Carrying amount

26. Risk Management (continued)

D. Credit risk

Credit risk is the risk of loss arising from failure of a counterparty to meet its contractual obligations.

Credit risk principally arises within the Group from investments in financial instruments and reinsurer payment obligations.

The Group manages its exposure to credit risk by investing and transacting with high credit quality financial institutions. The Group continuously monitors the credit quality of the institutions that it invests and transacts with and further minimises its credit exposure by limiting the amount of funds placed or invested with any one institution at any time. Credit risk with respect to reinsurance programmes is minimised by placement of cover with a number of reinsurers with strong credit ratings.

Risk with respect to debt securities is managed within the guidelines of the Group's SIPO. Mortgages and loans are managed by generally requiring security over property.

The following table provides information regarding the aggregated credit risk exposure. Other financial asset categories are unrated.

2020	AAA+ to A- \$'000	BBB+ to BBB- \$'000	BB+ to B- \$'000	Unrated \$'000	Total \$'000
Cash and cash equivalents	188,057	-	-	-	188,057
Assets arising from reinsurance contracts	24,980	-	-	-	24,980
Derivatives	903	-	-	-	903
Mortgages and loans	-	-	-	1,524	1,524
	<u>213,940</u>	<u>-</u>	<u>-</u>	<u>1,524</u>	<u>215,464</u>
2019	AAA+ to A- \$'000	BBB+ to BBB- \$'000	BB+ to B- \$'000	Unrated \$'000	Total \$'000
Cash and cash equivalents	12,501	-	-	-	12,501
Restricted cash	-	-	-	10,268	10,268
Assets arising from reinsurance contracts	19,889	-	-	-	19,889
Derivatives	897	-	-	-	897
Mortgages and loans	-	-	-	3,119	3,119
	<u>33,287</u>	<u>-</u>	<u>-</u>	<u>13,387</u>	<u>46,674</u>

Included in the consolidated statement of financial position are unutilised funds of \$134,019,000 (2019: \$237,194,000) which are unrated. Unutilised products are invested within the guidelines of the Group's SIPO. The SIPO requires investments to be well diversified, sets exposure limits for each class of asset and credit rating. The Group closely monitors collateral held for the mortgages classified as credit-impaired. Those collateral related to mortgages are held in order to mitigate potential losses.

Concentration of credit risk

Concentration of credit risk exists if a number of counterparties are engaged in similar activities and have similar economic characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic conditions.

The concentration of credit risk on financial assets is generally the carrying amount, net of any provision for impairment. The Group does not expect any investment or reinsurance counterparties to fail to meet their obligations given their high credit ratings.

Notes to the consolidated financial statements
for the year ended 30 June 2020

27. Related parties

Subsidiaries

Fidelity Life Assurance Company Limited is the ultimate parent of the Group. The Company holds the following interests in subsidiaries:

Company	Nature of activities	Class of shares	Ownership	
			2020	2019
Fidelity Capital Guaranteed Bond Limited	Non-trading investment company	Ordinary	100%	100%
Life and Advisory Services Limited	Investment services ¹	Ordinary	100%	100%
Fidelity Life Custodial Services Limited	Custodial/Trustee services	Ordinary	100%	100%

All subsidiaries are incorporated in New Zealand and have a balance date of 30 June.

¹ Life and Advisory Services Limited ceased trading in June 2020.

Related party transactions

(a) Key management personnel compensation

The key management personnel are all the Directors of the Company and the executives with the greatest authority for the strategic direction and management of the Company.

	2020	2019
	\$'000	\$'000
Short-term benefits	5,355	5,578
Total	5,355	5,578

(b) Transactions with related parties

The following transactions occurred with related parties:

	2020	2019
	\$'000	\$'000
Secured loans to shareholders		
Balance as at 1 July	-	672
Loan repayments received - secured loans	-	(672)
Balance as at 30 June	-	-
Interest revenue from secured loans	-	19
Commission paid to related parties		
comprise:		
Shareholders as at 30 June who held agency agreements with the Group	4,351	4,295
	4,351	4,295

(c) Outstanding balances

The following balances are outstanding at the reporting date in relation to transactions with related parties:

	2020	2019
	\$'000	\$'000
Advisor accounts payable to shareholders	(17)	(10)

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

27. Related parties (continued)

Related party transactions (continued)

(d) Terms and conditions

Commissions paid to shareholders

Commissions paid to shareholders who hold agency agreements with the Group are paid at standard rates applicable to other commission agents.

Loans made to shareholders

In prior years, loans secured by mortgages over properties or other assets were made to shareholders during the normal course of business. There were no loans to shareholders in the current financial year. The Group does not intend to make new loans to shareholders in the future.

28. Commitments

(a) Capital commitments

Significant capital expenditure committed for at the end of the reporting period but not recognised as part of liabilities is as follows:

	2020 \$'000	2019 \$'000
Property, plant and equipment	4,500	-
Intangible assets	12,360	-
	<u>16,860</u>	<u>-</u>

(b) Non-cancellable operating leases

The Group leases various offices, IT equipment, and motor vehicles under non-cancellable operating leases expiring between six months to 12 years. The leases have varying terms, escalation clauses and renewal rights. On renewal, the terms of the leases are re-negotiated.

From 1 July 2019, the Group has recognised right-of-use assets for these assets, except for short-term and low-value leases. See notes 2 and 16 for further information.

Commitments for minimum lease payments in relation to non-cancellable operating leases are payable as follows:	2020 \$'000	2019 \$'000
Within one year	-	278
Later than one year but not later than five years	-	366
	<u>-</u>	<u>644</u>

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

28. Commitments (Continued)

(c) Leases committed not yet commenced

During the year ended 30 June 2020, the Group signed a lease agreement for new premises at 136 Fanshawe Street, Auckland ('Fanshawe property'). The new lease is expected to commence in September 2021. In the event the Carlton Gore Road property is settled prior to the Fanshawe property completion date, the Group intends to lease back the Carlton Gore Road property until completion (refer to note 9).

At 30 June 2020, the Group's future cash outflows (undiscounted) for the above lease for future years not yet commenced are expected to be as follows:

	\$'000
Lease of Fanshawe property	24,600
Lease back of Carlton Gore Road property	284
Total	<u>24,884</u>

29. Events occurring after balance date

On 12 August 2020 the government announced a move from Level 1 to Level 3 for Auckland and Level 2 for the rest of the country. This has not resulted in changes to assumptions relating to the Group's key estimates and judgements referred to in these financial statements.

30. Earnings per share

(i) Basic earnings per share

Basic earnings per share is calculated by dividing the profit attributable to the owners of the Company by the weighted average number of ordinary shares on issue during the year.

	2020 \$'000	2019 \$'000
Total profit for the year attributable to the owners of the Company	20,111	18,254
	Shares	Shares
Weighted average number of ordinary shares on issue	2,091,440	2,091,440
Basic earnings per share	\$ 9.62	\$ 8.73

(ii) Diluted earnings per share

There is no dilution in earnings per share as all shares have been issued.

Fidelity Life Assurance Company Limited
Notes to the consolidated financial statements
for the year ended 30 June 2020

31. Statutory Fund

Fidelity Life operates under IPSA which requires that its life business is conducted within at least one statutory fund.

Investments held in the life statutory fund can only be used in accordance with the relevant regulatory restrictions imposed under IPSA and associated rules and regulations. The main restrictions are that the assets in a life statutory fund can only be used to meet the liabilities and expenses of the life statutory fund, to acquire investments to further the business of the life statutory fund or as distributions provided solvency, capital adequacy and other regulatory requirements are met.

The following table shows a summary of the consolidated balances of the Company's statutory fund, Fidelity Life Statutory Fund Number 1:

	2020	2019
	\$'000	\$'000
Income statement		
Insurance premium revenue	275,478	269,493
Insurance premium ceded to reinsurers	(117,187)	(119,181)
Investment income	5,797	14,436
Other income	15,941	7,190
Claims expense	(139,720)	(125,715)
Reinsurance recoveries	92,705	82,803
Commission and operating expenses	(109,817)	(113,760)
Net change in life insurance contract assets	12,108	22,240
Net change in life investment contract liabilities	(826)	(5,477)
Income tax expense	(12,982)	(13,079)
Profit for the year attributable to the owners of the Company (non-participating)	21,497	18,950
Assets		
Cash and cash equivalents	154,568	6,512
Assets arising from reinsurance contracts	24,980	19,889
Assets classified as held for sale	25,746	-
Financial assets at fair value through profit or loss	134,019	259,927
Derivative financial instruments	903	897
Life insurance contract assets	249,404	220,295
Loans and other receivables	5,281	6,883
Property, plant and equipment	944	30,074
Right-of-use assets	426	-
Income tax assets	537	-
Deferred tax assets	28,772	31,573
Intangible assets	9,222	2,835
Total assets	634,802	578,885
Liabilities		
Payables and other financial liabilities	45,104	46,873
Lease liabilities	400	-
Deferred tax liabilities	95,176	86,067
Life insurance contract liabilities ceded under reinsurance	58,458	41,457
Life investment contract liabilities	113,010	122,956
Deferred income	2,051	2,734
Total liabilities	314,199	300,087
Net assets	320,603	278,798

There are no other restrictions on the use of assets invested for policyholder benefits, nor any restrictions on legal titles to assets.

Independent auditor's report

To the shareholders of Fidelity Life Assurance Company Limited

We have audited the consolidated financial statements which comprise:

- the consolidated statement of financial position as at 30 June 2020;
- the consolidated income statement for the year then ended;
- the consolidated statement of comprehensive income for the year then ended;
- the consolidated statement of changes in equity for the year then ended;
- the consolidated statement of cash flows for the year then ended; and
- the notes to the consolidated financial statements, which include a summary of significant accounting policies.

Our opinion

In our opinion, the accompanying consolidated financial statements of Fidelity Life Assurance Company Limited (the Company), including its subsidiaries (the Group), present fairly, in all material respects, the financial position of the Group as at 30 June 2020, its financial performance and its cash flows for the year then ended in accordance with New Zealand Equivalents to International Financial Reporting Standards (NZ IFRS) and International Financial Reporting Standards (IFRS).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (New Zealand) (ISAs (NZ)) and International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Group in accordance with Professional and Ethical Standard 1 *International Code of Ethics for Assurance Practitioners (including International Independence Standards)* (New Zealand) (PES 1) issued by the New Zealand Auditing and Assurance Standards Board and the *International Code of Ethics for Professional Accountants (including International Independence Standards)* issued by the International Ethics Standards Board for Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Our firm carries out other services for the Group in the areas of assurance over custodial controls and solvency and tax compliance. In addition, our Firm has insurance arrangements with the Group covering partners and employees within the Firm. Those arrangements were contracted on normal terms within the ordinary course of trading activities of the Group. Certain partners and employees of our firm may also individually deal with the Group on normal terms within the ordinary course of trading activities of the Group. These matters have not impaired our independence as auditor of the Group.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current year. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Description of the key audit matter	How our audit addressed the key audit matter
<p><i>Measurement of life insurance contract assets and life insurance contract liabilities ceded under reinsurance, including the impact of COVID-19</i></p> <p>As at 30 June 2020 the Group has life insurance contract assets of \$249 million (30 June 2019: \$220 million), life insurance contract liabilities ceded under reinsurance of \$58 million (30 June 2019: \$41 million).</p> <p>The Directors' valuation of these balances involves complex and subjective judgements about future events, both internal and external to the business, for which small changes in assumptions can result in material impact to the measurement of these balances.</p> <p>We considered this a key audit matter due to the subjective actuarial judgements made by the Directors, including any adjustments to allow for the potential impacts of COVID-19. The key actuarial assumptions include:</p> <ul style="list-style-type: none"> • The cost of providing benefits and administering these contracts (maintenance expenses); • Mortality and morbidity experience on life insurance products; • Persistency (or discontinuance) experience, which affects the Group's ability to recover the cost of acquiring new business over the lives of the contracts; • Bonus rates per annum for classes of participating business; • Long-term interest rates which affect the rate at which cash flows are discounted (discount rates); and • Premium rates <p>Refer to the following notes in the consolidated financial statements: Note 2 <i>Summary of significant accounting policies</i>, Note 3 <i>Actuarial methods and policies</i> and Note 20 <i>Life insurance contract liabilities and assets</i>.</p>	<p>Together with PwC actuarial experts, we:</p> <ul style="list-style-type: none"> • Assessed the reasonableness of the key actuarial assumptions including the rates of premium, discontinuance, mortality and morbidity rates, maintenance expenses, bonus rates and discount rates and, where relevant, the impact of COVID-19 on those assumptions. Our assessment of the assumptions included: <ul style="list-style-type: none"> – Obtaining an understanding of the processes in place to determine the assumptions; – Examining the approach used by management to derive the assumptions by applying our industry knowledge and experience; and – Challenging the key assumptions used by management against past experience, market observable data (as applicable) and our experience of market practice. • Assessed the valuation methodologies used by applying our industry knowledge and experience to compare whether the methodologies and changes to those are consistent with recognised actuarial practices and expectations derived from market experience; and • Checked the calculation of the liability adequacy test and assessed the outcome in order to ascertain whether the insurance contract liabilities are adequate in the context of a valuation on the best estimate assumptions at reporting date. <p>Policy data is a key input to these actuarial estimates. Accordingly, we:</p> <ul style="list-style-type: none"> • Evaluated the design effectiveness and tested the operating effectiveness of controls over underwriting and policy administration processes; and • Tested the completeness and accuracy of data between source and actuarial valuation systems.

Description of the key audit matter	How our audit addressed the key audit matter
<i>Information Technology (IT) systems</i>	
<p>We focused on this area because the Group has a complex network of IT systems, including multiple administration systems feeding the general ledger, requiring a significant extent of audit effort.</p> <p>The Group has a number of key controls in place, including key data reconciliations, as well as controls preventing unauthorised access to systems and data.</p>	<p>To obtain assurance on the information feeding into the general ledger from the different administration systems, we executed the following procedures:</p> <ul style="list-style-type: none"> • Through the involvement of our IT experts, we evaluated the design effectiveness and tested the operating effectiveness of certain controls over the continued integrity of the IT systems that are relevant to financial reporting; • We carried out direct tests, on a sample basis, of system functionality in order to assess the operation of key system enforced access controls; and • On a targeted basis, we tested key data reconciliations as well as the accuracy and completeness of data transfers between the administration systems and the general ledger and, where applicable, assessed the reasonableness of reconciling items.

Description of the key audit matter	How our audit addressed the key audit matter
<p><i>Recoverability of the deferred tax asset arising from tax losses</i></p> <p>As at 30 June 2020, the Group has a deferred tax asset balance of \$31 million (30 June 2019: \$34 million), of which \$27 million relates to deferred tax assets arising from past tax losses (30 June 2019: \$29 million).</p> <p>We considered recoverability of the deferred tax asset a key audit matter because:</p> <ul style="list-style-type: none"> • significant management judgement is involved in forecasting future taxable profits and the period over which it is probable such losses will be utilised; and • the utilisation of the tax losses is subject to shareholder continuity being maintained from the time the losses were generated until the time the losses are utilised. <p>Refer to the following notes in the Group's consolidated financial statements: Note 2 <i>Summary of significant accounting policies</i> and Note 8 <i>Taxation</i>.</p>	
	<p>Together with our actuarial and tax specialists, we assessed the recoverability of the deferred tax asset arising from tax losses by:</p> <ul style="list-style-type: none"> • assessing the reasonableness of the forecasted taxable profits by comparing prior years actual results with the forecasted financial results; • considering forecasted taxable profits arising from the forecasted financial results and the period over which it is probable that sufficient taxable profits will be generated to utilise the losses; and • considering whether shareholder continuity was maintained at balance date and whether any known future events indicated shareholder continuity may not be maintained until the time the losses are utilised.

Description of the key audit matter	How our audit addressed the key audit matter
<p data-bbox="240 459 1369 521"><i>Owner-occupied building classified as held for sale and material valuation uncertainty relating to COVID-19</i></p> <p data-bbox="240 539 798 784">In May 2020, the Group committed to a plan to sell the owner-occupied building at Carlton Gore Road (located in Newmarket, Auckland). As a consequence, the building has been reported in accordance with <i>NZ IFRS 5 Non-Current Assets Held for Sale and Discontinued Operations</i> and classified as held for sale, at a carrying amount of \$26 million, at balance date.</p> <p data-bbox="240 792 756 853">We considered the asset classified as held for sale to be a key audit matter because the:</p> <ul data-bbox="256 862 798 1420" style="list-style-type: none"> • application of NZ IFRS 5 was significant given the non-routine nature of the transaction and the associated accounting; and • carrying amount of the building was remeasured at balance date, based on the estimate of fair value determined by an independent valuer. Due to the COVID-19 pandemic, there was a lack of commercial property transactional activity to establish fair values. The valuer included a material valuation uncertainty clause in their report. This clause highlights that the market value may change significantly and unexpectedly over a relatively short period of time. Therefore, less certainty and a higher degree of caution, should be attached to the point estimate valuation. <p data-bbox="240 1429 798 1520">Refer to the following note in the Group's consolidated financial statements: Note 9 <i>Assets classified as held for sale</i>.</p>	<p data-bbox="831 539 1358 568">Our audit procedures included, among others:</p> <ul data-bbox="831 577 1439 1769" style="list-style-type: none"> • an evaluation of the Group's conclusions on the classification of the building as held for sale and the suggested accounting treatment. This included assessing, with the help of our technical accounting specialists: <ul data-bbox="874 736 1439 898" style="list-style-type: none"> – the measurement of the building at the lower of the carrying amount and fair value less cost to sell; and – the presentation in the consolidated financial statements. • in addition, with the help of our in-house valuation specialist, we: <ul data-bbox="874 976 1439 1769" style="list-style-type: none"> – reviewed the valuation report at balance date, agreeing the fair value recognised in the consolidated financial statements to the report; – assessed the valuation methodology; – critiqued and challenged the key assumptions used by the valuer by comparison to market evidence and current market conditions, including consideration of the appropriateness of the assumptions made for COVID-19 impacts; – discussed with management and obtained sufficient appropriate audit evidence to demonstrate that management's assessment of the suitability of the inclusion of the valuation in the consolidated financial statements was appropriate in light of the material valuation uncertainty clause included by the valuer in the valuation; and – considered the adequacy of the disclosures made in Note 9 <i>Assets classified as held for sale</i> to the consolidated financial statements, which explains that there is significant market uncertainty around the valuation at balance date.

Description of the key audit matter	How our audit addressed the key audit matter
<p><i>Reinsurance recapture</i></p> <p>During the year, the Group entered into the final stage of negotiations in respect of the recapture of certain parts of its reinsurance book, which has been recorded in the consolidated financial statements and considered effective since 31 March 2020. The most significant impacts of the recapture for the Group were in relation to:</p> <ul style="list-style-type: none"> the recognition of a reinsurance recapture contract income of \$8.1 million in <i>Other income</i>; and the de-recognition of \$7.3 million in <i>Life insurance contract liabilities ceded under reinsurance</i> <p>On an aggregate basis, the net impact of the recapture on the consolidated income statement for the year ended 30 June 2020 was \$0.5 million.</p> <p>Further detail is included in Note 2 <i>Summary of significant accounting policies</i>.</p> <p>We considered the recognition of the reinsurance recapture to be a key audit matter because there were significant judgments applied by the Group in relation to the timing of the recognition of the transaction and associated disclosures in the consolidated financial statements, including the determination of the applicable accounting guidance as this type of transaction is not explicitly covered by NZ IFRS 4 <i>Insurance Contracts</i> and the date the Group gained control over the recaptured share of the book.</p>	<p>Our audit procedures included, among others:</p> <ul style="list-style-type: none"> an evaluation of the Group's assessment in relation to the accounting treatment for the reinsurance recapture. This included assessing, with the help of our technical accounting specialists, the areas for judgement in relation to the applicable accounting treatment as NZ IFRS 4 <i>Insurance Contracts</i> was silent on this specific type of transaction. <p>We also:</p> <ul style="list-style-type: none"> reviewed the technical accounting advice provided by management's external accounting adviser in respect of certain key judgements applied, namely, the applicable accounting treatment and the date that control over the recaptured share of the book was transferred to the Group; reviewed the evidence provided to support the judgement that the Group had gained control over the recaptured share of the book at 30 June 2020; and reviewed the accuracy and completeness of the disclosures in the consolidated financial statements.

Our audit approach

Overview

An audit is designed to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement.

Overall Group materiality: \$2.75 million, which represents approximately 1% of insurance premium revenue.

We chose insurance premium revenue as the benchmark because, in our view, it is the benchmark against which the performance of the Group is most commonly measured by users, and is a generally accepted benchmark within the life insurance industry.

As reported above, we have five key audit matters, being:

- Measurement of life insurance contract assets and life insurance contract liabilities ceded under reinsurance, including the impact of COVID-19
- Information Technology (IT) systems
- Recoverability of the deferred tax asset arising from tax losses
- Owner-occupied building classified as held for sale and material valuation uncertainty relating to COVID-19
- Reinsurance recapture

Materiality

The scope of our audit was influenced by our application of materiality.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the overall Group materiality for the consolidated financial statements as a whole as set out above. These, together with qualitative considerations, helped us to determine the scope of our audit, the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate on the consolidated financial statements as a whole.

Audit scope

We designed our audit by assessing the risks of material misstatement in the consolidated financial statements and our application of materiality. As in all of our audits, we also addressed the risk of management override of internal controls including among other matters, consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the consolidated financial statements as a whole, taking into account the structure of the Group, the accounting processes and controls, and the industry in which the Group operates.

Information other than the consolidated financial statements and auditor's report

The Directors are responsible for the annual report. Our opinion on the consolidated financial statements does not cover the other information included in the annual report and we do not and will not express any form of assurance conclusion on the other information. At the time of our audit, there was no other information available to us.

In connection with our audit of the consolidated financial statements, if other information is included in the annual report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact.

Responsibilities of the Directors for the consolidated financial statements

The Directors are responsible, on behalf of the Company, for the preparation and fair presentation of the consolidated financial statements in accordance with NZ IFRS and IFRS, and for such internal control as the Directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements, as a whole, are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (NZ) and ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

A further description of our responsibilities for the audit of the consolidated financial statements is located at the External Reporting Board's website at:

<https://www.xrb.govt.nz/standards-for-assurance-practitioners/auditors-responsibilities/audit-report-1/>

This description forms part of our auditor's report.

Who we report to

This report is made solely to the Company's shareholders, as a body. Our audit work has been undertaken so that we might state those matters which we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's shareholders, as a body, for our audit work, for this report or for the opinions we have formed.

The engagement partner on the audit resulting in this independent auditor's report is Michele Embling.

For and on behalf of:

Appointed Actuary's review of Fidelity Life Assurance Company Limited at 30 June 2020

This return is prepared under sections 77 and 78 of the Insurance (Prudential Supervision) Act 2010 which requires that a licensed insurer must ensure that the actuarial information contained in, or used in the preparation of, financial statements of the insurer and any group financial statements is reviewed by the Appointed Actuary.

In relation to the Financial Statements for Fidelity Life Assurance Company Limited for the year ended 30 June 2020 and as that date, I confirm the following:

Appointed Actuary: John Laurence Smith

Work undertaken: The review of the actuarial information contained in, or used in the preparation of, financial statements of the insurer and group was conducted in accordance with the Solvency Standard for Life Insurance Business (RBNZ, December 2014).

Scope and limitations: The actuarial information reviewed was:

- (a) information relating to an insurer's calculations of premiums, claims, reserves, dividends, insurance and annuity rates, and technical provisions; and
- (b) information relating to assessments of the probability of uncertain future events occurring and the financial implications for the insurer if those events do occur; and
- (c) information specified in the Solvency Standard for Life Insurance Business as actuarial information for the purposes of this review.

There were no restrictions on the scope of my investigation.

The return is provided as a statutory disclosure by Fidelity Life Assurance Company Limited (and is the same for both the insurer and group). No warranty is provided to third parties for any other purpose.

Relationship with insurer: I am a permanent full-time employee of Fidelity Life Assurance Company Limited. I do not own any shares in Fidelity Life Assurance Company Limited.

Information: I obtained all information and explanations that I required.

Actuarial Opinion: In my actuarial opinion and from an actuarial perspective:

- (i) the actuarial information contained in the insurer and group financial statements at and in the year to 30 June 2020 has been appropriately included in those statements;

- (ii) the actuarial information used in the preparation of the insurer and group financial statements at and in the year to 30 June 2020 has been used appropriately.

Solvency margin:

In my actuarial opinion and from an actuarial perspective:
Fidelity Life Assurance Company Limited (licensed insurer) is maintaining the solvency margin calculated under the solvency standard for life insurance business (IPSA 21(2)(b))

Statutory Funds:

In my actuarial opinion and from an actuarial perspective:
Fidelity Life Assurance Company Limited (licensed insurer) will maintain the solvency margin in respect of the Fidelity Life Statutory Fund No. 1 calculated under the solvency standard for life insurance business (IPSA 21(2)(c)).

John Smith
