1 Quarterly market overview

NZ cash and fixed interest: 10 year rates in both NZ and the US ended the quarter at similar levels to those of the June quarter so there were no major movements in the returns for bonds over the quarter. Global bonds and the BGA index marginally outperformed the NZ index at 2% versus 1.8% for the NZX Government Stock. Of interest was the stronger performance of global sovereign debt which saw the Citigroup WGBI index up 2.4%. While not the case in NZ, credit spreads widened which impacted adversely on corporate bonds. The global bond story continues to be one of interest rates either not rising or even falling when for a while the talk has been of rising rates - this contradiction will end sometime. This position is expected to continue despite the US Fed expected to announce next Wednesday that the QE programme is at an end.

Shares: Both the NZ and Australian markets had a good quarter. Key contributors to the strong NZ market were Kathmandu, Chorus, Fisher & Paykel Healthcare and Summerset Group. The “dogs” with the worst returns were Mediterranean Shipping and Transpacific Industries. Global markets had a more sanguine quarter and in local currency terms rose just 0.8%. A pause was in order with the market up 15.3% for the 12 months. Emerging markets had a better quarter but still failed to outperform developed markets.

2 KiwiSaver

The quarter saw good results for each of the different risk return sectors. The growth funds were up 3.3% on average while the conservative funds still managed 2.0%. All the different major asset sectors produced similar level of results with the exception of unhedged global shares where the MSCI unhedged index was up 9.9% courtesy of the 11% fall in the NZ dollar against the US. This provided a boost for ASB with its sliding scale approach to hedging levels dependent on the level of the NZ dollar with a top ranking result for both the Growth and Moderate fund sectors. It similarly benefited the AMP Nikko Balanced Fund option with a strong 4% return for the quarter. The ANZ Default funds topped the rankings for the Moderate Balanced and Conservative fund sectors. For reasons well understood by ANZ they offer funds under 3 different brands: ANZ, ANZ Default and OneAnswer.

Looking at the 5 year results the OneAnswer funds were top in the Growth, Balanced and Moderate Balanced fund sectors. Looking at the 1 year results, Mercer was top for the Growth funds, OneAnswer top for Balanced fund, ANZ Default top for Moderate fund and the Russell managed Aon funds top for the Moderate and Conservative Fund sectors.

A common feature of the better performing Funds is they have a higher exposure to global rather than NZ bonds and over the periods illustrated in the survey global bonds have achieved the better results. With a very thin NZ bond market it is surprising that more managers do not choose to have the greater exposure to global bonds. The comment has been made that the overweight NZ position is driven more by the manager’s bottom line than the investment merits of best expected return to the investor.

The Fund with the best return for the 3 and 5 year periods and near top return for the 3 months and 1 year is the Milford Active Growth Fund. It has done exceedingly well and Brian Gaynor and his team are to be commended.

Notes:

- Tracking error is the standard deviation of value added.
- Information Ratio (IR) is value added divided by tracking error, i.e. risk adjusted performance.
- The Alliance Bernstein and Legg Mason global bond fund performance use a simulated hedge back to the NZ dollar.
- Returns in the NZ share sector are shown inclusive of imputation credits, which are not available to all investors.
- The index applied may not in all cases be the benchmark adopted by the manager for the fund.
- Relative outperformance may be due to the different nature of the fund rather than to superior performance skills. Past performance is no guarantee of future performance.
- KiwiSaver fund returns are shown gross of tax and net of investment fees. All other fund returns are shown gross of tax and investment fees.
- The numbers shown are in some cases gross equivalents of the net returns achieved by the manager. Consequently, for a gross investor, returns realised may be different from those shown above.
- Global share results are on an unhedged basis. In some instances hedging the currency is integral to the management of the fund and the client will not experience the results shown above.

Rankings

Where we consider the funds have reasonably similar mandates we group the funds and rank the performance. However, differences in the mandates still apply and will result in different expected return outcomes.

About Melville Jessup Weaver

Melville Jessup Weaver is a New Zealand firm of consulting actuaries. The areas in which we provide advice include superannuation, employee benefits, life insurance, general insurance, health insurance, asset consulting, accident insurance and information technology. The firm, established in 1992, has offices in Auckland and Wellington. The firm is an alliance partner of Towers Watson, a leading global professional services company that helps organisations improve performance through effective people, risk and financial management. The company offers solutions in the areas of employee benefits, talent management, rewards, and risk and capital management. Towers Watson has 14,000 associates around the world and is located on the web at towerswatson.com

Asset consulting services:
